Who We Are

Education.
Service.
Community.

Puyallup Extrication Team (PXT) is a training company committed to improving rescue standards throughout the world by bringing together the rescue services and developing their skills to **serve the public**. Our goal is to:

1. Be a resource for all Emergency Responder stakeholders to support exceptional **Education and Skill Development**.
2. Support our communities with the best care possible

Our staff consists of 19 professional Fire Fighters from several South Puget Sound Fire Departments from Western Washington however we serve and provide instruction nationally and internationally.

“ PXT Mission [Saving Lives]

Prevent death and injury by providing a training platform for first responders to share and advance rescue science and technology

Achieved by:

01

Competition and shared knowledge with firefighter teams from all over the US and the world (Canada, UK, Sweden, Czech Republic, Australia, South Africa & more). These interactions have had a compounding effect on the way they perform auto extrication rescues in their own communities

02

Introduction and maintenance of an industry recognised standard for dealing with road collisions on a global basis.

03

The development of enhanced proficiency in rescue techniques, incident management and medical care.

04

Development of partnerships at national and international levels

Why Train with Us?

Learn, Train, Teach

- Group of Career Firefighters, Medics and Officers from Central Pierce, East Pierce, South King, & Tukwila Fire Departments.
- We base our instruction off of our **“Learn, Train, Teach”** hands on model.
- We all share a common goal of educating responders in extrication from dispatch to the successful termination of the incident.
- We are a mobile extrication company able to instruct up to 50 Firefighters.
- Possess state of the art equipment in hydraulics, pneumatics and hand tools.

“

PXT Training Courses

- Not just “our way” but “a way with options” through trial and error.
- An effective approach used internationally.
- Objective based criteria to SAFE scene control.
- What is our Goal within the fire service pertaining to auto extrication?
 - To have complete Situational Awareness.
 - Provide the safest working environment.
 - Provide the best patient care we can.
 - Be as efficient as we can by developing and executing plans managed by the Extrication leader.
