

# PROBLEM GAMBLING: CLOSE CONNECTIONS

PROBLEM GAMBLING

BRONX

RESOURCE CENTER

*Here to Help*

## *Veterans & Military*

Veterans and Military Personnel are at higher risk of developing gambling problems. Veterans have elevated rates of problem gambling (PG).

**60%**

Vets with PTSD have a 60% higher rate of gambling addiction than the general population (Dept. of Veterans Affairs).

**44%**

Forty-four percent of Vets in treatment for PG reported making suicide attempts.

**2-3x**

Vets are at least twice as likely than the general population to have a gambling problems.

**0**

DoD & Coast Guard do not actively screen active-duty service members for GD.

Most importantly, the Bronx Problem Gambling Resource Center is here to serve the men and women who have served us so bravely.
