Protection from Corrosion

Corrosion Cops sells Products and provides Solutions to prevent rust & corrosion for government, commercial, industrial and residential customers.

- Fleet & heavy equipment preservation
- Concrete structure encased steel preservation.
- Steel structure preservation.
- Electronic systems preservation.
- Marine industry preservation.
- Weapons and Firearms preservation.
- Sodium Chloride (Salt) removal
- Wastewater Treatment Plant preservation
- Railings, fences, window frame preservation.
- Vehicle, Motorcycles, ATV preservation.
- Bridge preservation
- HVAC & Cooling Tower preservation.
- And so much more.....

Corrosion Cops

Rust & Corrosion
Protection since 1992

Lucky you live Hawaii!

Did you know the Department of Defense (DoD) has **rated Hawaii as a Zone 4 corrosion region** the highest corrosion or most difficult for metals to survive their design life?

1. None 2. Moderate 3. Severe 4. Extremely Severe

Why?

Sulfuric dioxide (VOG from our active Volcano on the Big Island) + chlorides (Salt from ocean) = Super electrolyte resulting in **SEVERE CORROSION** of metals.

OUR MISSION STATEMENT

Corrosion Cops is committed to providing environmentally friendly products and solutions for rust and corrosion that work in our harsh tropical island environment. Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust through exceptional product performance and customer service.

Providing Solutions and Products for Rust & Corrosion in Hawaii since 1992

Solutions

Living on an Island, nothing escapes the ocean's salt (chlorides) carried by the wind and rain that silently attacks everything we own. Thinking about taking care of it is not the same as actually doing it. Now is the time to take action.

Contact us at (808) 676-1963

because as well all know
Rust never sleeps
especially in Hawaii.

Unprotected fence

Protected with CarWell CP90

We get a lot of calls from building managers who need to keep properties maintained and rust is a big problem because you can physically see it everyday.

Corrosion Cops can better help you if you help us with some background information. Send digital images to info@corrosioncops.com

Prevention and implementing a maintenance program is **KEY** to insuring long life for everything you own or manage. Better to maintain what's good now than try to fix what's gone wrong later.

Let us find the right solution so you can move on to your next project on that "to do list".

Prevention is KEY

Maintain and Retain or Ignore and Pay More

Chlorides are known to accelerate corrosion, even areas in the center of our islands experience corrosion as chlorides can travel up to 35 miles inland. These chlorides form a easy path for condensation to form i.e. in many of our homes and eateries a few grains of rice are mixed with the table salt shaker. The rice absorbs the moisture the salt (chlorides) attracts. Otherwise, the salt would not come out.

Those same chlorides also work to accelerate corrosion of metals. Various colored oxide deposits form on the solution of chlorides, moisture and oxygen at the active corrosion cell—see Stages of Corrosion.

Easily preventable
with CarWell CP90
Rust Cop

Call us at (808) 676-1963 to stop this cycle and keep what you have—corrosion free.

Stages of Corrosion

The stages of corrosion are stage 1 to stage 4

Stage 1 - Earliest signs of corrosion.

Late Stage 2 corrosion conditions.

Stage 3 corrosion is found with heavy scale and minor edge erosion.

Stage 4 looks like Swiss cheese condition, many holes, heavy scale similar to stacked Maui chips and loss of 50% or more of original metal.

Preventative maintenance to stay in stage 1.

"When it's RUST...Call US!" (808) 676-1963

About Us

Since 1992, Rich and Linda Moran have built a niche business as one of Hawaii's most trusted and unique businesses in corrosion and rust prevention and control.

Committed to providing quality services and products that work in our harsh island environment, Our motto is **"When it's RUST ...call us!" (808) 676-1963**

In 2011 we became a Disadvantaged Woman Owned Small Business.

Services

Corrosion Cops, is a Hawaii based Corporation that specializes in sales and technical support of corrosion control products and corrosion control application services that work in our harsh environment. Because Hawaii is situated within a DoD rated zone 4 region for corrosion—what works in other areas does not necessarily work in our harsh environment.

Highly corrosive environments, as indicated by the maps, include "severe" and "extremely severe" corrosive regions. A highly corrosive environment refers to areas where the use of road salts or other chemical de-icers is common, high humidity areas and areas with a high concentration of salt in the air are also considered to be highly corrosive.

We focus on environmentally friendly alternatives to what you are currently using which eliminates hazmat disposal, and creates greener corrosion prevention programs.
