

Enviroklean® is a **water based environmentally friendly formulation stain remover**. Simply apply by brush, spray or roller and rinse with potable water. Follow label instructions, work safely and always neutralize with fresh water when stain is removed.

Enviroklean can be used on almost all metals, including stainless and aluminum. Enviroklean can dull some aluminum. Test for compatibility in a non-conspicuous area.

After removal of stains if the surface is to be painted, use of alkaline degreaser, i.e. Bullfrog 94166 should be performed to return surface to base pH.

If surfaces are to be treated for corrosion control i.e. CarWell CP90/Rust Cop, rinsing with water is all that is required to halt further cleaning activity of Enviroklean® .

*If you wear polycarbonate or glass type lenses, Enviroklean® will damage (etch) the lenses should Enviroklean® contact the lenses.*

**RUST OCCURS ON METALS**  
Rust staining occurs on ALL surfaces!

Rust stains left untreated become ugly unsightly eyesores, shorten the life of any paint system and degrade equipment and property.

Enviroklean's simple brush, spray or wipe on and rinse off formula is an affordable solution that safely removes unwanted staining from a variety of surfaces such as metal, concrete, stainless steel, porcelain and fiberglass.

# Enviroklean—Stain Neutralizer and Multi-purpose cleaner

**Enviroklean®** is a unique formulation that was initially developed to remove rust stains on oil rigs caused by crevice corrosion.

**Enviroklean's** unique ability to remove running rust stains and unwanted stains from a multitude of areas, does not leave a film on the surface and is not affected by temperatures means less frequent painting and reduces costs attributed to downtime in industrial settings and applications.

Concrete Wall

Porcelain

Stainless Steel

ENVIROKLEAN Stain Remover allows surfaces to be cleaned of rust stains without damage to original coatings. DIY Videos [www.corrosioncops.com](http://www.corrosioncops.com)

Safely removes Red Dirt Stains from Vinyl fencing

[www.corrosioncops.com](http://www.corrosioncops.com)

**Enviroklean®** removes rust deposits from stainless steel, concrete walls, fiberglass, vinyl, metal, other surfaces including painted metal surfaces and boat hulls. Works exceptionally well on vehicles, pumps, equipment and surfaces exposed to rain and caustic atmospheres.

**Enviroklean®** is a versatile boat and hull cleaner that will not harm fiberglass, paint or gel-coat. Removes waterline stains, exhaust fume stains and running rust stains. Simply brush on Enviroklean Stain Remover and rinse with fresh water for an incredibly clean surface.

Case histories and Videos Under MORE

[www.corrosioncops.com](http://www.corrosioncops.com)

**Enviroklean®** is ready to use environmentally friendly formulation and can be applied by brushing, rolling or spraying.

Apply product liberally onto stained area and allow one to five minutes until stains fade or disappear. Rinse off with fresh water. Heavily stained areas may require more than one application or longer contact time before rinsing.

Do not let product dry. Do not apply to glass, polycarbonate or glazed tile surfaces as product will etch surface.

**Enviroklean** can be used on almost all metals including stainless and aluminum. Enviroklean can dull some aluminum—this can be polished out.
