When it's Rust Call US!

Bullfrog Rust Blocker Strips (91016)

Bull Frog Emitter Strips (91016). Consumer Version of VpCI-101.

Stick it up in a Second...Stop Rust for a Year!

Stops rust and corrosion placed in small spaces up to one (1) cubic foot.

Protect your tool box, fishing tackle box, electronic equipment, jewelry, coins and silver from corrosion and tarnish with the invisible protection of VpCI's (Vapor Phase Corrosion Inhibitors).

How it works

Cortec VpCI's bond electro-chemically with metal surfaces to form a protective "molecular umbrella," sealing out the air and moisture that causes rust and corrosion.

Features

- Works better than conventional rust inhibitors, yet is Environmentally and User Safe
- No nitrates, silicones, phosphates, heavy metals or other harmful chemicals
- Won't harm plastics, elastomers or painted surfaces
- Each emitter protects for a full year and works even under extreme conditions

Applications

- Tool boxes to protect tools
- Tackle boxes to prevent rust from forming on fishing tackle and gear
- Circuit breaker boxes
- Safety deposit boxes to keep coin or metal collectables corrosion free
- Any thousands of other uses

How to Use

Simply stick a Bullfrog Rust Blocker Emitter Strip in any enclosed space where there is metal. The VpCIs migrate from the strip to all metal surfaces within the enclosed space sealing out air and moisture that causes rust and corrosion. Each strip will protect up to 1 cubic foot of space for 1 year and measures 1-1/4" x 3" x 1/4".

6 strips per pack/12 case
