

CARWELL PRODUCTS

Aerosol Can

RUST COP—12.75 ounce
12/case
(UPC 7 00409 00321 2)

Non-Aerosol

CarWell CP-90—16 ounce 12/case
CarWell CP-90 - Gallon 4/case
CarWell CP-90—5 Gallon
CarWell CP-90—55 Gallon drum

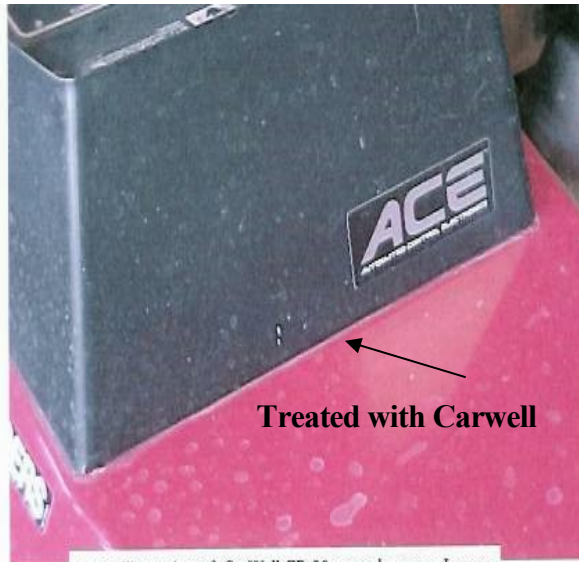

Applicators

Tricon Gun
1800GCW
32 ounce pot with
applicator wand

CARWELL RUST INHIBITORS

PRODUCT/SERVICE INFORMATION

CarWell CP90/RUST COP

A unique blend of rust inhibitors that guard against rust and corrosion on all metals. It eliminates moisture containing salt, dirt and other pollutants from the metal providing long lasting protection.

Complies with
OSHA Regulations

Rust and Corrosion Protection

CARWELL RUST PROTECTION SYSTEM

Ever wonder if you're getting your money's worth, much less the performance when you buy a product?

Well rest assured, CARWELL is a quality performance based product. Not a "me too" product.

WHY? Ingredients are the number one key to a products performance.

Carwell is a highly refined thin film inhibitor and does not use mineral spirits, solvents, silicones or other thinning agent as do other brands.

Thinning agents cause gumming and build up.

After Carwell is applied, you can expect it to lift and remove dirt, moisture, other contaminants and even some surface rust.

Carwell departs the "me too" look of a rust or corrosion protectant, as Carwell is designed to penetrate to the good metal and form its protection there. It will continue to penetrate to the good metal, pushing out existing corrosion.

Since metal is combined under heat, the melting of dissimilar metals is where corrosion starts.

Specifically, when the hot metal cools it induces moisture through condensation and that moisture acts as the electrolyte to start the flow of electrons from the positive to the negative pole of the corrosion cell. Carwell acts to insulate the metal at the anode and cathode within the metal, the positive and negative pole of the corrosion cell.

Carwell is designed to creep deep into cracks and crevices providing maximum protection. So even if the initial application cannot reach one of these areas, this self healing process makes sure the protection is provided!
Bonus: Carwell does not gum up and provides long lasting clean protection.

BENEFITS

- Carwell works by reducing the need for replacement parts, brake cables, bolts and battery compartments.
- Carwell rust protection retards the electrolysis (aluminum/steel) problems.
- Carwell protects galvanized metals.
- Reduces electrical wiring breakdowns caused by corrosion or the "greening" of wires.
- Carwell works on any level of corrosion new, used or even rusted vehicles, equipment, metal chassis and structures.
- **Surfaces are easily painted after Carwell treatment as Carwell will not interfere with adhesion.**

APPLICATIONS

Carwell Rust Inhibitor is ideal for:

- Seams, welds, folds and crevices
- Riveted pieces, chains
- Door & lock mechanisms
- Gas tanks & straps
- Brake cables
- Wheel hub nuts
- Seized parts, nuts and bolts
- Coil & leaf springs, U bolts
- Electrical wiring, lights, electrical connectors, battery posts & cables

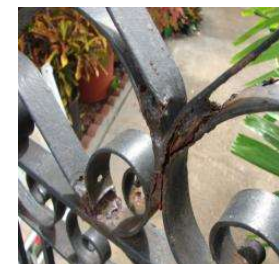

- Wrought iron fences
- Any area where dissimilar metals are fastened by welds or fasteners
- Fishing reels, roller guides on poles
- Firearms
- Lawn mowers, trailers, tools

Whether you are responsible for a fleet of vehicles and equipment or you want to protect your own equipment from rust, Carwell Rust Inhibitor is for you.
