## Company

**Established in 1992, CorrosionCOPS** has built a niche business as one of Hawaii's most trusted and unique businesses in corrosion and rust prevention and control committed to providing environmentally friendly products and solutions. In 2011 we became a **Disadvantaged Woman Owned Minority Small Business**. CorrosionCOPS specializes in corrosion control products that work in Hawaii's harsh environment. Hawaii is situated within a DoD (Department of Defense) rated zone 4 region for corrosion - the highest corrosion or most difficult for metals to survive their design life - what works in other areas does not necessarily work in our harsh environment.
