When it's Rust Call US!

## **The O-1800-1 - Atomized Canister Sprayer**

The most durable sprayer made in America. The O-1800-1 is a great alternative to small HVLP systems.

32 ounce unit operates at 40-125 PSI. Optimal spraying pressure is 40-80 PSI. The O-1800-1 is a revolutionary new product for applying rust preventatives and other commercial uses to any type of surface.

The unit incorporates an agitated pressure concept which will deliver the product in a fine, atomized state. By adhering to a few simple instructions and maintenance steps, you will get extended years of service from this unit. The O-1800-1 is primarily designed to spray lighter material. This gun provides a great misting to allow you to spray into tight areas and get excellent coverage. The O-1800-1 comes equipped with our 1818 super-flex wand with hooked brass tip that delivers a fan spray. The quick disconnect makes removing the wand fast and easy. The O-1800-1 Sprayer is intended for use at 40-125 PSI air pressure.

Use at higher air pressures constitutes misuse of the product and could result in serious personal injury.
