

WI-FI SETUP INSTRUCTIONS

INTRODUCTION

Wi-Fi internet connectivity is needed in order to provide live streaming of Sunday service and Children's Ministry Check-In. Additionally, internet connectivity within the facility is poor. This free wi-fi connectivity is available for members and visitors to utilize during in-person services.

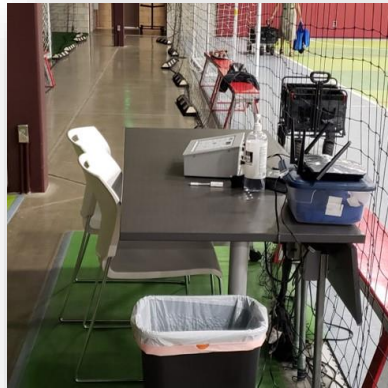

LOCATING THE EQUIPMENT

The container housing the wi-fi router and accessories can be found in Change Room 3, left side of the room, on the bench, near the entrance.

EQUIPMENT SETUP

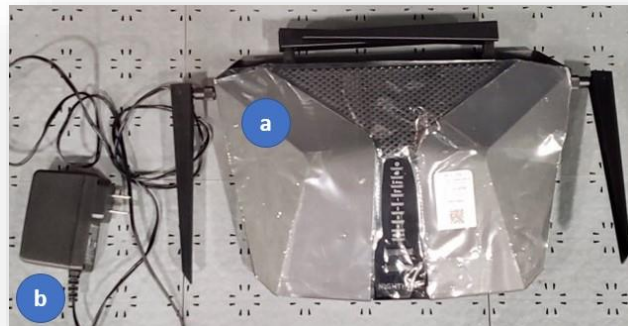

1. The wi-fi router is setup on the table in the center of the facility between the two fields.

2. Remove all contents from the container. The container contents include the following:

- a. Netgear wi-fi router

- b. Wi-fi power cord

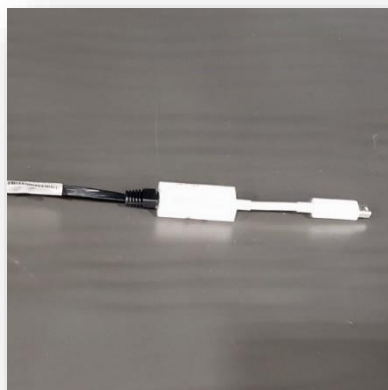

- c. Blue fitted table cover. This will be used to cover the table used to live stream church service.

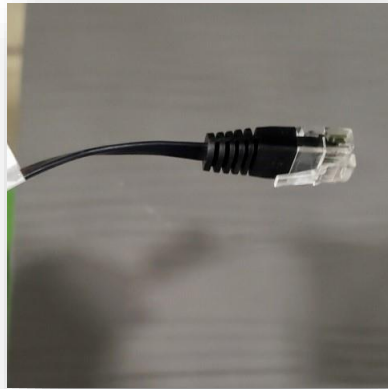

4. On the back of the router, do the following:
 - a. Plug the internet cable into the yellow internet jack. **(A)**

- i. On the table, you will find the internet cable (Category 5/6 cable) connected to a white converter cable.

- ii. Disconnect the white converter.
- iii. Plug the internet cable into the yellow internet jack on the back of the wi-fi router. **(A)**

- iv. However, ensure the internet cable is plugged into the top outlet under the table as the bottom outlet will not work.

- b. Connect the power cable to the wi-fi router. **(C)**
 - c. Plug the power cable into the electrical outlet under the table.
 - d. Turn on the router by pressing the power button. **(B)**
 - i. Allow a few minutes for the wi-fi router to power up.
5. Antennas on the wi-fi router should be upright and securely fastened.

6. Found at the top part of the wi-fi router, the wi-fi router is properly functioning when the top four indicators are illuminated in white.

TESTING WI-FI CONNECTIVITY

To test the wi-fi connectivity, on a mobile phone, find and connect to the **Connections Church Guest** wi-fi network. There is no password to connect to the wi-fi.

TROUBLESHOOTING

- If the wi-fi router indicators are not illuminated in white, check all connectivity.
- Ensure the internet cable is plugged into the top internet outlet found under the table.

CLEAN UP

1. Unplug the internet cable and the power cable from the router.
 - a. Pack wi-fi router and power cable into the container
2. Plug the internet cable back into the white converter piece.
3. Return the container back into Change Room 3, on the bench, on the left side, near the entrance of the room.
