VeloSAT M

Mycorrhizal Biofertiliser

VeloSAT M

Mycorrhizal Biofertiliser

VeloSAT M (Mycorrhizal Biofertiliser) when applied to soil or crop it forms a symbiotic association with plant roots. It enhances the nutrient and water uptake, improve soil structure and promote plant growth.

VeloSAT M (Mycorrhizal Biofertiliser) Growth medium has unique blend of naturally occurring nutrients and gives best result in the field.

Benefits of VeloSAT M :

- ❖ Enhanced Nutrient uptake - increases absorption of Phosphorus, Nitrogen, and Micronutrients.
- ❖ Helps plants to survive in drought condition through the extension of root surface in the soil by extra radical mycelia .
- ❖ Stronger root systems effectively manages abiotic stress in crops.
- ❖ Improves soil structure and microbial activity.
- ❖ Improves plant growth in saline soil by reducing uptake of Na^+ and Cl^- ions.
- ❖ Environmentally friendly and sustainable.

Dosage :

Seed treatment : 100 ml / lit of water. Soak seeds for 30 min; Shade dry and sow.

Soil Application : Mix 1 lit with 20kg of decomposed FYM; Broadcast in field; Irrigate within 48 hrs.

Root Dipping : 100 ml /lit of water.

Drip Irrigation : 1 lit / acre. Don't mix with Fertilizers / Agrochemicals.

Packing : 100 ml, 250 ml, 500 ml, 1 Litre & 5 Litres.
