Instructor: San Diego State University- Pre-
design Planning and Educational
Specifications

Fran Pickett is the President of Fran Pickett & Associates, Inc., founded in 1998. Ms. Pickett has over 30 years of experience as a designer, master planner, programmer, and School Board member. Her command of strategic planning and policy development and her superior communications skills enable her to coordinate A/E design and educational planning and programming initiatives. Her recent projects have included entire school districts' educational plant surveys, work plans, space utilization studies, school facilities analysis and master planning, educational facility specifications, Castaldi analyses, and project-implementation guidance for educational facilities.

In K-12 school facilities planning, Ms. Pickett serves as the facilitator of planning meetings with school boards, their constituents and the end-users and designers; as the coordinator of existing facility assessments and new facility design specifications; and as the lead author of planning documents. In the area of higher education, she has served as a liaison for coordination between community colleges and universities for the development of joint-use facility building programs.
