State of Wisconsin – Assembly Bill 132:

Assembly Bill 132: Relating to: immunization-related mail

This bill requires a government entity; public or private elementary, middle, junior high, or senior high school; childcare center or nursery school; or health care provider that sends a piece of mail containing information that could disclose another person's immunization status to ensure that any information that could disclose a person's immunization status or otherwise allow someone to infer a person's immunization status is enclosed and sealed in the piece of mail and that no such information is visible on the outside of the piece of mail.

Example Email:

Dear Representative _____,

I am writing to share my support of AB132. This bill is a common sense medical privacy bill. For example, currently, a postcard from the state or local health department containing private medical information regarding immunizations could be placed in a mailbox for anyone to accidentally see. Having your medical information displayed while in transit with the US Postal Service is not acceptable. This bill protects our medical privacy from being disclosed to others, during a time when our medical privacy is of the utmost importance. This common sense bill simply requires a sealed envelope.

Please vote “yes” to further ensure the privacy of our protected health information.

Sincerely,
