

Vaccine Schedule **EXPLODING** for U.S. Children

What Year Were You Born?

1960

Smallpox
DTP
Polio

1983

DTP (2 months)
OPV (2 months)
DTP (4 months)
OPV (4 months)
DTP (6 months)
MMR (15 months)
DTP (18 months)
OPV (18 months)
DTP (4 years)
OPV (4 years)
Td (15 years)

2020

Influenza (pregnancy)
DTaP (pregnancy)
Hep B (birth)
Hep B (2 months)
Rotavirus (2 months)
DTaP (2 months)
HIB (2 months)
PCV (2 months)
IPV (2 months)
Rotavirus (4 months)
DTaP (4 months)
HIB (4 months)
PCV (4 months)
IPV (4 months)
Hep B (6 months)
Rotavirus (6 months)
DTaP (6 months)
HIB (6 months)
PCV (6 months)
IPV (6 months)
Influenza (6 months)
Influenza (7 months)
HIB (12 months)
PCV (12 months)
MMR (12 months)
Varicella (12 months)
Hep A (12 months)
DTaP (18 months)

Influenza (18 months)
Hep A (18 months)
Influenza (30 months)
Influenza (42 months)
DTaP (4 years)
IPV (4 years)
MMR (4 years)
Varicella (4 years)
Influenza (5 years)
Influenza (6 years)
Influenza (7 years)
Influenza (8 years)
Influenza (9 years)
HPV (9 years)
Influenza (10 years)
HPV (10 years)
Influenza (11 years)
HPV (11 years)
DTaP (12 years)
Influenza (12 years)
Meningococcal (12 years)
Influenza (13 years)
Influenza (14 years)
Influenza (15 years)
Influenza (16 years)
Meningococcal (16 years)
Influenza (17 years)
Influenza (18 years)

1986

Following a 1986 law, the National Vaccine Injury Compensation Program¹ was created – removing the right for victims of vaccine injury /death to sue manufacturers.
Vaccine manufacturers and providers who administer vaccines are shielded from liability for vaccine injuries and deaths.

And then this happened!

Are you ready to add a **FAST-TRACKED** Covid-19 to the schedule?
With initial studies showing an efficacy of less than 6 months, what will our new schedule look like?

+COVID-19

Influenza (pregnancy)
Covid-19
DTaP (pregnancy)
Hep B (birth)
Hep B (2 months)
Rotavirus (2 months)
DTaP (2 months)
HIB (2 months)
PCV (2 months)
IPV (2 months)
Rotavirus (4 months)
DTaP (4 months)
HIB (4 months)
HPV (9 years)

Influenza (17 years)
Covid-19
Influenza (18 years)
Covid-19

It Does NOT Stop with COVID-19.

There are currently an additional **260** vaccines in development?

Do you want to have a CHOICE? FREEDOM, it's worth fighting for.

Scan for additional COVID information.

www.WUFFstrong.org

FREEDOM, It's Worth Fighting For

The US gives 2-3x more vaccines to children than most developed countries, yet we have skyrocketing rates of childhood issues that are NOT seen in other countries. Things like asthma, childhood diabetes, food allergies, childhood leukemia, developmental delays, tics, ADHD, autism, lupus, arthritis, eczema, epilepsy, Alzheimers, brain damage, etc.

It's NOT a coincidence

Since 1989, the U.S. Government has paid out over \$4.4 billion dollars to vaccine victims through the National Vaccine Compensation Program.³ This money does not come from the pharmaceutical companies responsible for the injuries and death caused by their vaccine products. The program is funded by U.S. taxpayers, through a 75-cent tax levied on all administered vaccines.⁴

The CDC currently recommends that all children receive 50 doses of 14 different vaccines between the day of birth and age six and at least 69 doses of 16 vaccines between the day of birth and age eighteen.⁵ This more than doubles the government childhood schedule of 34 doses of 11 different vaccines in the year 2000.⁶ In the past 15 years, 35 doses and 5 more unique vaccines have been added to the schedule. While adding vaccine after vaccine and dose after dose, **the CDC has yet to do a single study on whether or not this ever-growing vaccine schedule is actually safe for our children.**

There is no end in sight to the number of vaccines that could be added to the schedule, with over 260 vaccines currently in development, including for Covid-19.⁷ The personal conviction exemption is necessary and protects us from any future vaccines which could potentially be added to the schedule.

Data from the **Wisconsin Department of Health** reports that vaccines don't always work and that vaccinated individuals can still get sick and even spread illness on to others. Mumps outbreaks are occurring in highly vaccinated populations. People vaccinated for pertussis can still spread the disease, even without symptoms.^{8 9 10 11}

While public health officials often use the argument that everyone should be vaccinated to protect those who cannot be, the reality is, according to the CDC nearly all persons with chronic illness, including immunocompromised children, can receive vaccines. Few school children qualify for medical exemptions to vaccination^{12 13} Wisconsin's own data reports on the failure of vaccines to work. Immunocompromised school children are at risk for diseases stemming from both vaccinated and unvaccinated schoolmates, and for diseases that we do and do not vaccinate against.

The removal of the personal exemption to vaccination in Wisconsin will not solve this problem.
