To whom it may concern,

I'm thrilled Dennis is a part of our North America ERP team at AGCO. He moves the needle forward and challenges the team in their way of thinking by questioning the status quo. Dennis has consistently proven his willingness and ability to fulfill whatever need the team has. He not only contributes consistently with his extensive knowledge of JDE and data but is also willing to take that knowledge and use it to learn new things.

He has also proven he is willing to jump into something he knows little about and dig until he can figure it out. Whether that's a process, a new technology, analyzing existing code to look for issues or documentation, he has proven over and over he is not only willing but exceedingly capable.

Dennis takes great pride in a job well done and he demonstrates it daily by his commitment to do what it takes to help ensure AGCO's North America teams are running smoothly in JDE.

Best regards,
Wendy Anderson
