#### **Independent Auditors' Report**

To the Board of Directors of Desert Hills Fire District

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities and each major fund, of Desert Hills Fire District, as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### **Auditors' Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of Desert Hills Fire District, as of June 30, 2017, and the respective changes in financial position, and the respective budgetary comparison for the general fund.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the pension related schedules as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 13, 2017, on our consideration of the Desert Hills Fire District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Desert Hills Fire District's internal control over financial reporting and compliance.

Pat Dennen Fire Chief

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of Desert Hills Fire District, we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year ended June 30, 2017. Please read it in conjunction with the accompanying basic financial statements.

#### FINANCIAL HIGHLIGHTS

- Total liabilities exceed total assets (net position) by \$123,522 at the close of the fiscal year.
- Total net position decreased by \$172,165
- Total revenues from all sources were \$2,020,298 and the total cost of all District programs was \$2,192,463.
- Total revenue received in the General Fund was \$35,029 more than the final budget and expenditures were \$51,697 less than the final budget.
- Unassigned fund balance increased \$65,444 during the fiscal year. The unassigned balance at June 30, 2017 was \$510,815 compared to \$445,371 at June 30, 2016.

#### USING THIS ANNUAL REPORT

This annual report consists of a series of financial statements. The three components of the financial statements are: (1) Government-wide financial statements which include the Statement of Net Position and the Statement of Activities. These statements provide information about the activities of the District as a whole. (2) Fund financial statements tell how these services were financed in the short term as well as what remains for future spending. Fund financial statements also report the District's operations in more detail than the government- wide statements. (3) Notes to the financial statements.

#### Reporting the District as a Whole

#### The Statement of Net Position and the Statement of Activities (Government-wide)

A frequently asked question regarding the District's financial health is whether the year's activities contributed positively to the overall financial well-being. The Statement of Net Position and the Statement of Activities report information about the District as a whole and about its activities in a way that helps answer this question. These statements include all assets and liabilities using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

The Statement of Net Position presents financial information on all of the District's assets, liabilities, and deferred inflows/outflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The Statement of Activities presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported for some items that will only result in cash flows in future fiscal periods.

The Statement of Net Position and the Statement of Activities, present information about the following:

- Government activities All of the District's basic services are considered to be governmental activities. Property and fire assistance taxes, intergovernmental revenues and charges for services finance most of this activity.
- Proprietary activities/Business type activities The District currently does not maintain any proprietary activities; all activities are accounted for as governmental activities.

#### Reporting the District's Most Significant Funds

#### **Fund Financial Statements**

The fund financial statements provide detailed information about the most significant funds—not the District as a whole. The District's major fund uses the accounting approaches as explained below.

• Governmental funds – All of the District's basic services are reported in governmental funds.

Governmental funds focus on how resources flow in and out with the balances remaining at yearend that are available for spending. These funds are reported using an accounting method called the modified accrual accounting method, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the District's general government operations and the basic services it provides. Government fund information shows whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. We describe the relationship (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds in a reconciliation included with the Basic Financial Statements and in footnote 2.

#### GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net position may serve over time as a useful indicator of the District's financial position. The District's combined liabilities exceed assets by \$123,522 as of June 30, 2017 as shown on the following condensed statement of net position.

	Governmental activities		
	6/30/2017	6/30/2016	
Current and other assets	\$ 611,576	\$ 549,819	
Capital assets	770,740	341,780	
Total assets	1,382,316	891,599	
Deferred outflows related to pensions	542,759	387,243	
Long-term liabilities outstanding	1,145,833	836,029	
Other liabilities	275,285	117,849	
Total liabilities	1,421,118	953,878	
Deferred inflows related to pensions	627,479	276,321	
Net position:			
Invested in capital assets, net			
of related debt	378,003	341,780	
Unrestricted	(501,525)	(293,137)	
Total net position	\$ (123,522)	\$ 48,643	

#### **Governmental Activities**

The cost of all Governmental activities this year was \$2,192,463. Program revenues totaled \$534,253 and general revenues, including taxes, investment earnings and other revenues totaled \$1,486,045.

The District's programs includes: General Government (fire protection services). Each program's revenues and expenses are presented below.

	Governmental			
	activities			
	6/30/2017		6	/30/2016
Revenues:	•			
Program revenues:				
Charges for services	\$	135,384	\$	49,071
Operating grants and				
contributions		327,059		339,745
Capital grants and				
contributions		71,810		-
General revenues:				
Taxes		1,477,712		1,416,310
Unrestricted interest earnings		3,001		1,458
Other revenues		5,332		16,304
Total revenues	2,020,298		1,822,888	
Expenses:				
Public Safety		2,192,463		1,926,315
Total expenses		2,192,463		1,926,315
Increase/(decrease) in net position		(172,165)		(103,427)
Net position, beginning		48,643		(1,137)
Restatement adjustment				153,207
Net position, ending	\$	(123,522)	\$	48,643

Total resources available during the year to finance governmental operations were \$2,068,761 consisting of net position at July 1, 2016 of \$48,463, program revenues of \$534,253 and General Revenues of \$1,486,045. Total Governmental Activities expenses during the year were \$2,192,463; thus Governmental Net Position at year end decreased by \$172,165 to (\$123,522).

#### **General Fund Budgetary Highlights**

The final appropriations for the General Fund at year-end were \$51,697 more than actual expenditures. Actual revenues were more than the final budget by \$35,029.

#### CAPITAL ASSET AND DEBT ADMINISTRATION

#### **Capital Assets**

The capital assets of the District are those assets that are used in performance of District functions. Capital Assets include land, buildings and improvements, emergency vehicles, and equipment. At the end of fiscal year 2017, net capital assets of the government activities totaled \$770,740. Depreciation on capital assets is recognized in the Government-Wide financial statements. (See notes to the financial statements.)

#### Debt

At year end, the District had \$1,226,737 in governmental-type debt. This amount includes compensated absences, capital leases and net pension liability.

#### NEXT YEAR'S BUDGET AND ECONOMIC FACTORS

In considering the District Budget for fiscal year 2018, the District Board and management were cautious as to the growth of revenues and expenditures. Overall General Fund operating expenditures were budgeted so as to contain costs at the same level as fiscal year 2017.

#### CONTACTING THE DISTRICT'S FINANCIAL MANAGEMENT

This financial report is designed to provide a general overview of the District's finances for all those with an interest in the government's finances and to show the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact Pat Dennen, Fire Chief, 3983 London Bridge Road, Lake Havasu City, AZ 86406 or call (928) 764-3333.

Fund Balance - Beginning of Year	445,371	445,371
Fund Balance - End of Year	\$ 510,815	\$ 510,815

#### Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds To the Statement of Activities For the Year Ended June 30, 2017

Amounts reported for governmental activities in the statement of activities are different because:	
Net change in fund balance - total governmental funds	\$ 65,444
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the costs of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation expense exceeded capital outlay in the current period.	428,960
The issuance of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. This amount is the net effect of these differences in the treatment of long-term debt and related items.	(384,631)
Pension contributions are reported as expenditures in the governmental funds when made. However, they are reported as deferred outflows of resources in the Statement of Net Position because the net pension liability is measured a year before the Town's report date. Pension expense, which is the change in the net pension liability adjusted for changed in deferred outflows and inflows of resources related to pension, is reported in the Statement of Activities.	(160,133)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.	(10,995)
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.	(102,704)
Change in net position of governmental activities	\$ (172,165)

#### Statement of Revenues, Expenditures and Changes in Fund Balance General Fund – Budget and Actual For the Year Ended June 30, 2017

#### Note 1. Summary of Significant Accounting Policies

#### Description of government-wide financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. All fiduciary activities are reported only in the fund financial statements. *Governmental activities*, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges to external customers for support. Likewise, when applicable, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

#### Reporting entity

Desert Hills Fire District (the District) was organized as a Special Service District pursuant to the provisions of Chapter 5 of Title 48 of the Arizona Revised Statutes – Special Taxing Districts, which sets forth the legal framework for a fire district. The District provides fire protection, emergency medical services, and public education programs for the community of Desert Hills. The District is governed by an elected five member board of directors, which appoints the chairman. The day to day operations are supervised by a fire chief and his staff. The District does not have any component units, meaning entities for which the District is considered to be financially accountable.

#### Basis of presentation – government-wide financial statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds.

#### Basis of presentation – fund financial statements

The fund financial statements provide information about the government's funds. The emphasis of the District's fund financial statements is on major governmental funds, each is displayed in a separate column. Currently the District has only one fund, the General Fund.

The District reports the following major governmental funds:

The **General Fund** is the government's primary operating fund. It accounts for all financial resources of the general government.

#### Measurement focus and basis of accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

#### Note 1. Summary of Significant Accounting Policies (Continued)

The government-wide financial statements are reported using the *economic resources measurement* focus and the *accrual basis of accounting*. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the *current financial resources measurement* focus and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital leases are reported as other financing sources.

Property taxes, Fire District Assistance Taxes (FDAT), and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). All other revenue items are considered to be measurable and available only when cash is received by the government.

#### Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance

#### Cash, cash equivalents, and investments

Cash includes cash on hand, demand deposits with banks and deposits with the Mohave County Treasurer. The District's policy allows for the investment of funds in time certificates of deposit with federally insured depositories and other investments as allowed by state statutes.

#### Inventories and prepaid items

The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed. Also, the District's inventory of materials and supplies is deemed to be immaterial; thus, no provision for inventory has been made in these financial statements.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government—wide and fund financial statements. The cost of prepaid items is recorded as an expenditure when consumed rather than when purchased.

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### Capital Assets

Capital assets, which include land, buildings, improvements, vehicles, equipment and furniture and fixtures, are reported in the governmental activities column in the government-wide statement of net position. In accordance with GASB 34, the District has opted not to retroactively report infrastructure assets. Capital assets are defined by the District as assets with an individual cost of more than \$2,500 and an estimated useful life in excess of two years. Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Depreciation of capital assets is computed and recorded by the straight-line method. Estimated useful lives of the various classes of depreciable capital assets are as follows:

Buildings and improvements 5-40 years Vehicles 5-10 years Equipment 5-7 years

#### Deferred outflows/inflows of resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/ expenditure) until then. The government currently has one type of item which qualifies for reporting in this category. It is pension related items reported on the government-wide financial statements. See footnote 7 for more information.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government has two types of items that qualify for reporting in this category. The item, *unavailable revenue*, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from only one source, property taxes. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. The other item is pension related items reported on the government-wide financial statements. See footnote 7 for more information.

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### **Pensions**

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the pension plan's fiduciary net position of the Public Safety Personnel Retirement System (PSPRS) and additions to/deductions from the plan's fiduciary net position have been determined on the same basis as they are reported by PSPRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

#### Net position flow assumption

Sometimes the District will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the District's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

#### Fund balance flow assumptions

Sometimes the District will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the District's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

#### Fund balance policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing board is the highest level of decision-making authority for the government that can, by adoption of a resolution prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the resolution remains in place until a similar action is taken (the adoption of another resolution) to remove or revise the limitation.

#### Note 1. Summary of Significant Accounting Policies (Continued)

Amounts in the assigned fund balance classification are intended to be used by the District for specific purposes but do not meet the criteria to be classified as committed. The governing board (board) has by resolution authorized the board chairman to assign fund balance. The board may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

#### Revenues and expenditures/expenses

#### Program revenues

Amounts reported as program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than as program revenues.

#### Property taxes

Property tax revenues are recognized as revenues in the year collected or if collected within 60 days thereafter unless they are prepaid.

The County levies real property taxes on or before the third Monday in August, which become due and payable in two equal installments. The first installment is due on the first day of October and becomes delinquent after the first business day of November. The second installment is due on the first day of March of the next year and becomes delinquent after the first business day of May. The County also levies various personal property taxes during the year, which are due the second Monday of the month following receipt of the tax notice and become delinquent 30 days thereafter. A lien against real and personal property assessed attaches on the first day of January preceding the assessment and levy thereof.

#### Compensated Absences

The District's policy permits employees to accumulate earned but unused vacation and sick time, which are eligible for payment upon separation from government service. For governmental funds, amounts of vested or accumulated vacation that are not expected to be liquidated with expendable available financial resources are reported as liabilities in the government-wide statement of net position and as expenses in the government-wide statement of activities. No expenditures are reported for these amounts in the fund financial statements.

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

#### Note 2. Reconciliation of Government-Wide and Fund Financial Statements

## Explanation of certain differences between the governmental fund balance sheet and government-wide statement of net position:

The governmental fund balance sheet includes a reconciliation between total governmental fund balances and net position of governmental activities as reported in the government-wide statement of net position. The differences primarily result from the long-term economic focus of the statement of net position versus the current financial resources focus of the governmental fund balance sheet.

When capital assets (property, plant and equipment) that are to be used in governmental activities are purchased or constructed, the cost of those assets are reported as expenditures in governmental funds. However, the statement of net position includes those capital assets among the assets of the District as a whole.

Cost of capital assets	\$ 1,983,067
Accumulated depreciation	 (1,212,327)
Net adjustment to increase fund balance - total governmental	_
funds to arrive at net position - governmental activities	\$ 770,740

#### Note 2. Reconciliation of Government-Wide and Fund Financial Statements (Continued)

### Explanation of differences between governmental fund statement of revenues, expenditures, and changes in fund balance and the government-wide statement of activities:

The governmental fund statement of revenues, expenditures, and changes in fund balance includes a reconciliation between net changes in fund balances-total governmental funds and changes in net position of governmental activities as reported in the government-wide statement of activities. The first element of this reconciliation states that capital outlays are reported in the governmental funds as expenditures while the government-wide statement of activities allocates these costs over the useful lives of the assets as depreciation. While shown in the reconciliation as the net difference, the elements of this difference are as follows:

Capital outlay	\$ 499,410
Depreciation expense	(70,450)
Net adjustment to decrease net changes in fund balance -	
total governmental funds to arrive at changes in net position -	
governmental activities	\$ 428,960

#### NOTE 3. Stewardship, Compliance and Accountability

#### **Budgets and Budgetary Accounting**

Annual budgets are adopted on a basis consistent with GAAP for all governmental funds. Budgeted amounts are as originally adopted, or as amended by the Board.

Budgetary Process: State law requires that on or before the third Monday in July of each fiscal year, the Board must adopt a tentative budget. Once this tentative budget has been adopted, the expenditures may not be increased upon final adoption, however, they may be decreased.

Final Budget Adoption: State law specifies that at least seven days prior to the day the property tax levy is adopted, the Board must adopt the final budget for the fiscal year. The date in State law for adoption of the tax levy is on or before the third Monday in August. The adopted budget then becomes the amount proposed for expenditure in the upcoming fiscal year. The adoption of the final budget may take place through a simple motion approved by the Board.

Budget amendments are required to increase expenditure budgets. Expenditures may not legally exceed budgeted appropriations at the local activity level.

#### NOTE 3. Stewardship, Compliance and Accountability (Continued)

#### **Expenditures over Appropriations**

Expenditures may not legally exceed budgeted appropriations at the fund level. The Statement of Revenues, Expenditures and Changes in Fund Balance - Budget and Actual report as listed in the table of contents present expenditures/expenses over appropriations for the year ended June 30, 2017, if any.

#### Note 4. Deposits and Investments

Deposits as of the District at June 30, 2017 consist of the following:

Total deposits

Donosita

Deposits:	
Cash on hand	\$ 100
Cash in bank	353,531
Cash on deposit with the	
Mohave County Treasurer	173,050

526,681

\$

#### **Deposits**

#### Custodial Credit Risk

For deposits this is the risk that in the event of a bank failure, the government's deposit may not be returned to it. The District does not have a formal policy for custodial credit risk. As of June 30, 2017, none of the District's bank balance of \$543,043 was exposed to custodial credit risk because it was uninsured and uncollateralized.

#### **Investments**

The District's policy allows for the investment of funds in time certificates of deposit with federally insured depositories, investment in the county treasurer's pool, and other investments as allowed by state statutes. Eligible Arizona depositories as defined by state statutes are any commercial bank or savings and loan association with its principal place of business in the state of Arizona, which are insured by the federal deposit insurance corporation, or any other insuring instrumentality of the United States. The District had no investments as of June 30, 2017.

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The District had no assets measured at fair value as of June 30, 2017.

#### Note 4. Deposits and Investments (Continued)

#### Interest rate risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The District's policy for managing its exposure to fair value loss arising from increasing interest rates is to comply with the state statutes which define allowable investments.

#### Credit risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The District's policy for reducing exposure to credit risk is to comply with the state statutes which define allowable investments.

#### Note 5. Capital Assets

The following table summarizes changes to capital assets for the year ended June 30, 2017:

Governmental Activities:	Balance						Balance					
	6	6/30/2016	Additions		Deletions		Additions Deletion		tions Deletions		eletions 6/30/2017	
Capital assets, not being depreciated:		_						<u>.</u>				
Land and land improvements	\$	25,000	\$		\$		\$	25,000				
Total capital assets, not being depreciated		25,000						25,000				
Capital assets, being depreciated:												
Buildings and improvements		276,785		-		-		276,785				
Emergency vehicles		792,440	42	7,600		(30,000)		1,190,040				
Equipment, Admin		21,000		-		-		21,000				
Equipment, Fire		398,432	7	1,810		_		470,242				
Total capital assets, being depreciated		1,488,657	49	9,410		(30,000)		1,958,067				
Less accumulated depreciation for:												
Buildings and improvements		(122,014)	(	6,997)		-		(129,011)				
Emergency vehicles		(762,454)	(3	6,503)		30,000		(768,957)				
Equipment, Admin		(21,000)		-		-		(21,000)				
Equipment, Fire		(266,409)	(2	6,950)		_		(293,359)				
Total accumulated depreciation		(1,171,877)	(7	0,450)		30,000		(1,212,327)				
Total capital assets, being depreciated, net		341,780	42	8,960				770,740				
Governmental activities capital assets, net	\$	341,780	\$ 42	8,960	\$	_	\$	770,740				

Depreciation expense of \$70,450 was charged to the public safety function of the District.

#### Note 6. Long-Term Debt

The following is a summary of changes in long-term debt for the year ended June 30, 2016:

Governmental Activities:	_	Balance /30/2016	Additions		Additions Retirements		 Balance 5/30/2017	Current Portion	
Capital leases Compensated absences Net pension liabilities	\$	68,212 818,976	\$ 427,600 51,818	\$	(42,969) (61,391) (35,509)	\$ 384,631 58,639 783,467	\$	36,925 43,979 -	
Total	\$	887,188	\$ 479,418	\$	(139,869)	\$ 1,226,737	\$	80,904	

#### **Capital Leases**

In June 2016, the District entered into a capital lease agreement with First Bankers Corporation. as lessor to finance the purchase of the 2003 and 2001 Pierce Pumper vehicles. The capital lease to First Bankers Corporation totaled \$427,600. Under the terms of the lease, annual payments of \$50,822 shall be made including interest at an effective rate of 3.61 percent. The final payment is due December 1, 2025.

A summary of the assets financed through capital leases is as follows:

	Depreciation		Accumulated			
	Cost E			Expense		preciation
Emergency Vehicles	\$	427,600	\$	28,507	\$	28,507
Total	\$	427,600	\$	28,507	\$	28,507

The following is an annual schedule of future minimum lease payments with the present value of the net minimum lease payments for the years ended June 30<sup>th</sup>:

		Pierce
<u>Year</u>	Pun	per Trucks
2018	\$	50,822
	Ф	,
2019		50,822
2020		50,822
2021		50,822
2022		50,822
2023-2026		203,288
Total ramaining lassa naumants		457,398
Total remaining lease payments		437,396
Less: amount representing interest		(72,767)
Present value of net remaining		
minimum lease payments	\$	384,631

#### Note 7. Retirement and Pension Plans

The District contributes to the plan described below. The plan is a component unit of the State of Arizona.

At June 30, 2017, the District reported the following aggregate amounts related to pensions for all to which it contributes:

Statement of Net Position and Statement of Activities	ernmental ectivities
Net pension liabilities	\$ 783,467
Deferred outflows of resources	542,759
Deferred inflows of resources	627,479
Pension expense	330,793

The District's accounts payable and other current liabilities includes \$12,382 of outstanding pension contribution amounts payable to all pension plans for the year ended June 30, 2017. Also, the District reported \$170,660 of pension contributions as expenditures in the governmental funds related to all pension plans to which it contributes.

#### **Public Safety Personnel Retirement System (PSPRS)**

**Plan description** – The District contributes to the Public Safety Personnel Retirement System (PSPRS), an agent multiple-employer defined benefit pension plan and an agent multiple-employer defined benefit health insurance premium plan that covers public safety personnel who are regularly assigned hazardous duty in the employ of the State of Arizona or a political subdivision thereof. The PSPRS, acting as a common investment administrative agent, is governed by a nine-member board, known as the Fund Manager, and the participating local boards according to the provisions of A.R.S. Title 38, Chapter 5, Article 4. The PSPRS issues a publicly available financial report that includes financial statements and required supplementary information for PSPRS. The report is available on the PSPRS website at www.psprs.com.

#### Note 7. Retirement and Pension Plans (Continued)

**Benefits provided** – The PSPRS provides retirement, health insurance premium supplement, disability, and survivor benefits. State statute establishes benefit terms. Retirement, disability, and survivor benefits are calculated on the basis of age, average monthly compensation, and service credit as follows:

	Initial Membership Date Before January 1, 2012	Initial Membership Date On or After January 1, 2012			
Retirement and Disability	•				
Years of service and age required to receive benefit	20 years, any age 15 years, age 62	25 years, age 52.5			
Final average salary is based on	Highest 36 consecutive months of last 20 years	Highest 60 consecutive months of last 20 years months			
Benefit percent Normal Retirement	50% less 2.0% for each year of credited service less than 20 years OR plus 2.0% to 2.5% for each year of credited service over 20 years, not to exceed 80%	2.5% per year of credited service, not to exceed 80%			
Accidental Disability Retirement	50% or normal retiremen	at, whichever is greater			
Catastrophic Disability Retirement	90% for the first 60 months the normal retirement, w				
Ordinary Disability Retirement	Normal retirement calculated with or 20 years of credited service, wh years of credited service (not to expect the control of	ichever is greater, multiplied by			
Survivor Benefit					
Retired Members	80% to 100% of retired m	ember's pension benefit			
Active Members	80% to 100% of accidental disability retirement benefit or 100% of average monthly compensation if death was the result of injuries received on the job				

Retirement and survivor benefits are subject to automatic cost-of-living adjustments based on excess investment earnings. In addition, the Legislature may enact permanent one-time benefit increases after a Joint Legislative Budget Committee analysis of the increase's effects on the plan. PSPRS also provides temporary disability benefits of 50 percent of the member's compensation for up to 12 months.

#### Note 7. Retirement and Pension Plans (Continued)

**Employees covered by benefit terms** – At June 30, 2017, the following employees were covered by the agent pension plans' benefit terms:

Inactive employees or beneficiaries currently receiving benefits	2
Inactive employees entitled to but not yet receiving benefits	3
Active employees	24
Total	29

Contributions and annual OPEB cost – In accordance with state statutes, annual actuarial valuations determine active member and employer contribution requirements for pension and health insurance premium benefits. The combined active member and employer contribution rates are expected to finance the costs of benefits employees earn during the year, with an additional amount to finance any unfunded accrued liability. For the year ended June 30, 2017, active PSPSR members were required by statute to contribute 11.65 percent of their annual covered salary to the PSPRS and the District was required to contribute 18.87 percent, the remaining amounts necessary to fund the PSPRS, as determined by the actuarial basis specified by statue. The health insurance premium portion of the contribution rate was actuarially set at 0.54 percent.

For the agent plans, the District's contributions to the pension plan and annual OPEB cost and contributions for the health insurance premium benefit for the year ended June 30, 2017, were:

Pension	
Contributions made	\$ 165,743
Health Insurance Premium Benefit	
Annual OPEB cost	\$ 4,917
Contributions made	4 917

**Pension liability** – At June 30, 2017, the District reported a net pension liability of \$783,467. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liabilities as of June 30, 2016, reflect the following changes of benefit terms and actuarial assumptions.

- In May 2016 voters approved Proposition 124 that authorized certain statutory adjustments to PSPRS' automatic cost-of-living adjustments. The statutory adjustments change the basis for future cost-of-living adjustments from excess investment earnings to the change in the consumer price index, limited to a maximum annual increase of 2 percent.
- Laws 2016, Chapter 2, changed the benefit formula and contribution requirements for members hired on or after July 1, 2017.
- The investment rate of return actuarial assumption was decreased from 7.85 percent to 7.50 percent for PSPRS and CORP plans.

The net pension liabilities measured as of June 30, 2017, will reflect changes of actuarial assumptions based on the results of an actuarial experience study for the 5-year period ended June 30, 2016. The change in the District's net pension liabilities as a result of these changes is not known.

#### Note 7. Retirement and Pension Plans (Continued)

**Pension actuarial assumptions** – The significant actuarial assumptions used to measure the total pension liability are as follows:

Actuarial valuation date	June 30, 2016
Actuarial cost method	Individual Entry Age Normal
Investment rate of return	7.50%
Projected salary increases	4.0% to 8.0% including inflation
Inflation	4.0%
Permanent benefit increase	Included
Mortality rates	RP-2000 mortality table (adjusted by 105% for both males and females)

Actuarial assumptions used in the June 30, 2016, valuation were based on the results of an actuarial experience study for the 5-year period ended June 30, 2011.

The long-term expected rate of return on PSPRS pension plan investments was determined to be 7.50 using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These real rates of return are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Long-Term

Target Allocation	Expected Arithmetic Real Rate of Return
16.00%	6.23%
14.00%	8.25%
11.00%	9.50%
7.00%	2.92%
13.00%	7.08%
5.00%	4.11%
10.00%	4.38%
8.00%	4.77%
10.00%	4.48%
4.00%	5.13%
2.00%	0.75%
100.00%	
	16.00% 14.00% 11.00% 7.00% 13.00% 5.00% 10.00% 8.00% 4.00% 2.00%

#### Note 7. Retirement and Pension Plans (Continued)

**Discount Rate** –At June 30, 2016, the discount rate used to measure the PSPRS total pension liabilities was 7.50%, which was a decrease of 0.35% from the discount rate used as of June 30, 2015. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

#### **Changes in the Net Pension Liability**

		tal Pension Liablity (a)		n Fiduciary Position (b)	Net Pension Liability (a) - (b)		
Balances at June 30, 2016	\$	2,681,082	\$	1,862,106	\$	818,976	
Changes for the year:			·	-			
Service cost		220,878		-		220,878	
Interest on total pension liability		214,025		-		214,025	
Changes of benefit terms		140,399		-		140,399	
Difference between expected and actual experience in the measurement							
of the pension liability		(465,946)		-		(465,946)

Net changes		110,820		146,329		(35,509)	
Balances at June 30, 2017	\$	2,791,902	\$	2,008,435	\$	783,467	

<sup>\*</sup> Other changes include adjustments for prior year GASB 68 and reserve transfer to/from employer and employee reserves.

#### Note 7. Retirement and Pension Plans (Continued)

Sensitivity of the proportionate share of the net pension liability to changes in the discount rate – The following table presents the District's net pension liability calculated using the discount rate noted above, as well as what the District's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1% Decrease	D	iscount Rate	1% Increase
	 (6.50%)		(7.50%)	 (8.50%)
Proportionate share of	 			 
Net pension (asset) / liability	\$ 1,265,941	\$	783,467	\$ 397,487

**Pension plan fiduciary net position** – Detailed information about the pension plan's fiduciary net position is available in the separately issued PSPRS financial report.

**Pension expense and deferred outflows/inflows of resources** – For the year ended June 30, 2017, the District recognized pension expense for PSPRS of \$170,660. At June 30, 2017, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	 Deferred Outflows of Resources	 Deferred Inflows of Resources
Differences between expected and actual experience Changes in assumptions	\$ 252,587	\$ 627,479
Net difference between projected and actual earnings on pension plan investments	124,429	-
Contributions subsequent to the measurement date  Total	\$ 165,743 542,759	\$ 627,479

#### Note 7. Retirement and Pension Plans (Continued)

The \$165,743 reported as deferred outflows of resources related to PSPRS pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to PSPRS pensions will be recognized in pension expense as follows:

Year Ended June 30	(In	Outflows (Inflows) of Resources		
2019	¢	(14 592)		
2018	\$	(14,582)		
2019		(14,583)		
2020		921		
2021		(13,479)		
2022		(41,538)		
Thereafter		(167,202)		

**Agent plan OPEB actuarial assumptions** – The health insurance premium benefit contribution requirements for the year ended June 30, 2017, were established by the June 30, 2015, actuarial valuations, and those actuarial valuations were based on the following actuarial methods and assumptions.

Actuarial valuations involve estimates of the reported amounts' value and assumptions about the probability of events in the future. Amounts determined regarding the plans' funded status and the annual required contributions are subject to continual revision as actual results are compared to past expectations and new estimates are made. The required schedule of funding progress for the health insurance premium benefit presented as required supplementary information provides multiyear trend information that shows whether the actuarial value of the plans' assets are increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Projections of benefits are based on (1) the plan as the District and plans' members understand them and include the types of benefits in force at the valuation date, and (2) the pattern of sharing benefit costs between the District and plans' members to that point. Actuarial calculations reflect a long-term perspective and employ methods and assumptions designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets. The significant actuarial methods and assumptions used are the same for all PSPRS plans and related benefits (unless noted), and the following actuarial methods and assumptions were used to establish the fiscal year 2017 contribution requirements:

## DESERT HILLS FIRE DISTRICT Notes to the Financial Statements June 30, 2017

## Note 7. Retirement and Pension Plans (Continued)

Actuarial valuation date	June 30, 2015
Actuarial cost method	Entry Age Normal
Amortization Method	Level percent closed for unfunded actuarial accrued liability, open for excess
Remaining Amortization Period	21 years for unfunded actuarial accrued liability; 20 years for excess
Asset valuation method	7-Year smoothed market value; 80%/120% market corridor
Actuarial assumptions:	
Investment rate of return	7.85%
Projected salary increases	4.5%-8.5%
Wage growth	4.50%

**Agent plan OPEB trend information** – Annual OPEB cost information for the health insurance premium benefit for the current and 2 preceding years follows:

Plan	Year Ended June 30,	P	Annual ension/ PEB Cost	Percentage of Annual Cost Contributed	Net Pension/ OPEB Obligation	
Health Insurance	2015 2016	\$	10,461 7,992	100% 100%	-	
	2017		4,917	100%	-	

**Agent plan OPEB funded status** – The health insurance premium benefit plans' funded status as of the most recent valuation date, June 30, 2016, along with the actuarial assumptions and methods used in those valuations follow.

		Insurance Subsidy			
Actuarial accrued liability (AAL)	\$	72,851			
Actuarial value of plan assets		63,763			
Unfunded acturarial accrued liability (UAAL)	\$	9,088			
Funded ratio (acturarial value of plan assets/AAL)		87.53%			
Covered payroll (active plan members)	\$	1,151,007			
UAAL as a percentage of covered payroll		1.08%

#### Note 8. Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets and natural disasters. The District has insurance protection and the limit for basic coverage is for \$1,000,000 per occurrence on a claims made basis. No significant reduction in insurance coverage occurred during the year and no settlements exceeded insurance coverage during any of the past three fiscal years.

#### Note 9. Commitments

In 2011, legislators passed Senate Bill 1609, which contained several provisions meant to shore up the plans administered by PSPRS. One of those provisions was a gradual increase in member contribution rates from 7% to 11% in the elected officials' plan (EORP) and from 7.65% to 11.65% in the public safety plan (PSPRS). In August 2011, those provisions were challenged via two separate, but parallel, lawsuits—*Hall* for EORP and *Parker* for PSPRS. In November 2016, the Supreme Court upheld the lower court decision in *Hall* that ruled those increased member contribution rates were unconstitutional. These two lawsuits have been adjudicated separately where the *Parker* case was stayed pending the outcome of *Hall*. Nevertheless, the facts and circumstances are essentially the same where both parties to *Parker* agreed, at the time of stay, to appropriately apply the remedies of *Hall* when finalized.

After seeking further clarification from the Supreme Court on their ruling, the PSPRS Board of Trustees in April directed employers in both EORP and PSPRS plans to revert the rates back to pre-SB1609 levels for affected members. As a result, members who were hired prior to July 20, 2011 are also entitled to receive a return of those excess contributions with interest. Therefore, at its May 31, 2017 meeting, the PSPRS Board of Trustees authorized local boards who have stopped withholding at the higher rate to begin working with their employer in returning those contributions as soon as practicable. However, while the *Hall* case has been

## DESERT HILLS FIRE DISTRICT Notes to the Financial Statements June 30, 2017

## Note 9. Commitments (Continued)

remanded to the Superior Court, the ruling on the interest amount from a hearing on June 6, 2017 has yet to be decided and released. As such, the *Hall* case is not finalized yet, but the excess contributions should be returned as soon as possible to stop interest from accruing.

Because the plans administered by PSPRS are 401(a) qualified plans, the IRS dictates the method used to return the excess contributions to members. PSPRS is not allowed to return the contributions directly to members or employers. Instead, employers are required to return the excess contributions to members, and then may take advantage of credit memos set up by PSPRS to offset future employer contributions. PSPRS will prepare credit memos equal to the contributions plus pre-judgment interest. Employers that want to take advantage of those credit memos may use those credit memos in lieu of sending PSPRS future employer contributions until the credit memos are used up. As of June 30, 2017 the District owed refunds totaling \$112,277 to current and former employees, excluding interest. The payable and related claims and judgement expense are reported on the government-wide statement of net position and the statement of activities.

## DESERT HILLS FIRE DISTRICT Notes to Pension Plan Schedules June 30, 2017

#### Note 1. Actuarially Determined Contribution Rates

Actuarially determined contribution rates for PSPRS are calculated as of June 30 two years prior to the end of the fiscal year in which contributions are made. The actuarial methods and assumptions used to establish the contribution requirements are as follows:

Actuarial cost method Entry Age Normal

Amortization Method Level percent closed for the unfunded actuarial

liability, open for excess

Remaining Amortization Period 21 years for unfunded actuarial accrued

liability; 20 years for excess

Asset valuation method 7-Year smoothed market; 80%/120% market

corridor

Actuarial assumptions:

Investment rate of return

In the 2013 actuarial valuation, the investment

rate of return was decreased from 8.0% to

7.85%

Projected salary increases In the 2014 actuarial valuation, the projected

salary increases were decreased from 4.5%-

8.5% to 4.0%-8.0%.

In the 2013 actuarial valuation, projected salary increases were decreased from 5.0%–

9.0% to 4.5%–8.5%.

Wage growth In the 2014 actuarial valuation, wage growth

was decreased from 4.5% to 4.0%. In the 2013

actuarial valuation, wage growth was

decreased from 5.0% to 4.5%.

Retirement age Experience-based table of rates that is specific

to the type of eligibility condition. Last

updated for the 2012 valuation pursuant to an experience study of the period July 1, 2006 -

June 30, 2011.

Mortality RP-2000 mortality table projected to 2015

using projection scale AA (adjusted by 105%

for both males and females)

## DESERT HILLS FIRE DISTRICT Notes to Pension Plan Schedules June 30, 2017

#### Note 2. Factors that Affect the Identification of Trends

In February 2014, the Arizona Supreme Court affirmed a Superior Court ruling that a 2011 law that changed the mechanism for funding permanent benefit increases was unconstitutional. As a result, the PSPRS changed benefit terms to reflect the prior mechanism for funding permanent benefit increases and revised actuarial assumptions to explicitly value future permanent benefit increases. These changes are included in the PSPRS' changes in total pension liability for fiscal year 2015 (measurement date 2014) in the schedule of changes in the District's net pension liability and related ratios. These changes also increased the PSPRS' required contributions beginning in fiscal year 2016 in the schedule of district pension contributions.

# Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

To the Board of Directors of Desert Hills Fire District

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities and each major fund of Desert Hills Fire District, as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise Desert Hills Fire District's basic financial statements, and have issued our report thereon dated October 13, 2017.

#### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered Desert Hills Fire District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Desert Hills Fire District's internal control. Accordingly, we do not express an opinion on the effectiveness of the Desert Hills Fire District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Desert Hills Fire District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

## **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

## Independent Auditors' Report on State Legal Compliance

Desert Hills Fire District Lake Havasu City, Arizona

We have audited the basic financial statements of Desert Hills District (the District) for the year ended June 30, 2017, and have issued our report thereon dated October 13, 2017. Our audit also included test work on the District's compliance with selected requirements identified in the State of Arizona Revised Statutes and the Arizona State Constitution including, but not limited to, Title 48, Chapter 5, Article 1.

The management of Desert Hills Fire District is responsible for the District's compliance with all requirements identified above. Our responsibility is to express an opinion on compliance with those requirements based on our audit; accordingly, we make the following statements:

ARS 48-805.02 requires the audit or report to include an attestation by the auditor of the District as to the following:

- 1. That the District has not incurred any debt or liability in excess of taxes levied and to be collected and the monies actually available and unencumbered at that time in the District general fund except for those liabilities as prescribed in section 48-805, subsection B, paragraph 2 and sections 48-806 and 48-807.
- 2. That the District complies with subsection F of section 48-805.
- 3. Whether the audit or report disclosed any information contrary to the certification made as prescribed by subsection D, paragraph 1 of section 48-805.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the Desert Hills Fire District complied, in all material respects, with the requirements identified above for the year ended June 30, 2017.

The purpose of this report is solely to describe the scope of our testing of the applicable compliance requirements identified in the Arizona Revised Statutes as noted above and the results of that testing based on the state requirements. Accordingly, this report is not suitable for any other purpose.

Sincerely,

HintonBurdick, PLLC Flagstaff, Arizona October 13, 2017

Fundeds, PLLC
