

Dear Cygnus Dealer,

We are writing to confirm to you that from 1st January 2020, the support the MR320 taximeter was withdrawn. This is because the product is now over a decade old and continued support within our infrastructure is no longer economically viable. This had been true for the last five years, which we communicated previously as a transition period in line with MID and UK government timetables. We appreciate that drivers still using the MR320 will now require a new meter at their next tariff change so we are offering you a tariff special offer allowing you to buy multiple meters at a reduced rate when your local authority rate change is due.

Kind regards

Mrs M Brown

Cygnus Manager.
