CADDY TWIST CLIPS

CADDY CLIPS W/ T-BAR MOUNT

Caddy clips are an attachment for a T-Grid system, the baffles are mounted with the use of coupling nut. The clip system has four main parts, nutsert, threaded rod, coupling nut and lastly the caddy clip itself.

The caddy twist clip is suitable for projects with large amounts of acoustical baffles within a condensed area. This reduces/removes swaying and allows for a cleaner and easier install compared to other mounting solutions.
