

D-RINGS MOUNTING SOLUTION

D-rings are fastened to the top of the Baffle and clipped to an adjustable hanger hook with an aircraft cable. Hardware kits are available with pre-installed D-rings and the anchor wires and hanger hooks shipped loose. Standard anchor wires are 5' feet (1524mm) but can be sold in many other lengths depending on requirements.

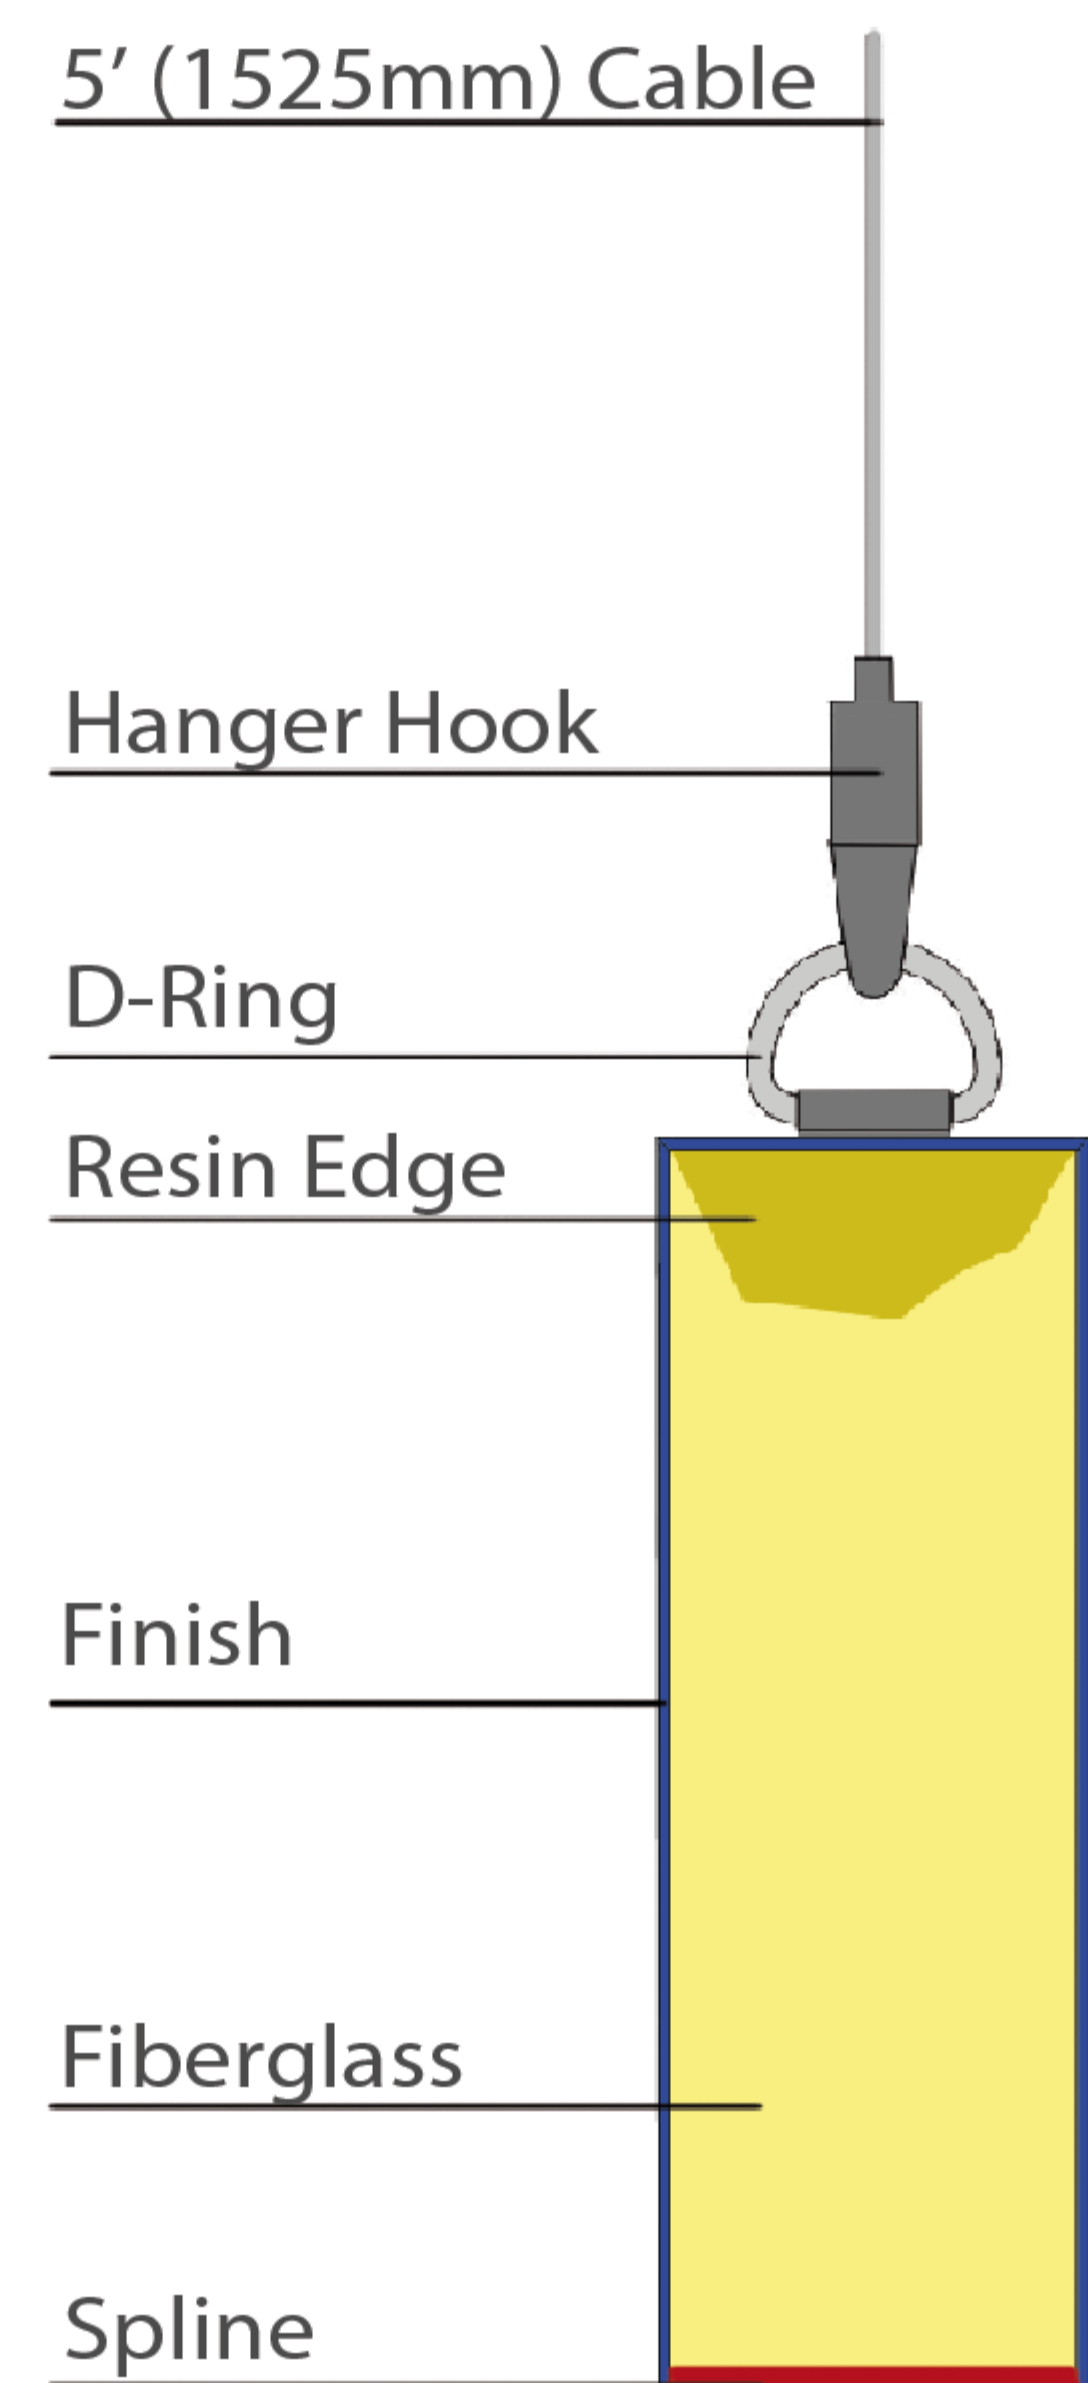

Hanger Hooks are used to adjust height for acoustical baffles. Wire will be inserted into the hanger hook and adjusted for height, excess wire can be clipped off.

Alternate method to hang Acoustical Baffles include Caddy Twist Clips via T-Bar, please contact Sky Acoustics for more information on this mounting solution.
