SO CLEAN

The antibacterial covering for hygiene-sensitive environments

By helping to create safe and environmentally friendly interiors, SOTM CLEAN adequately meets the sanitary needs of hygiene-sensitive environments such as hospitals, medical and dental offices, spas and pools, etc.

Designed to combat bacterial and fungal growth, the SO CLEAN range of coverings is particularly well suited for medical settings and high-humidity environments. Classified A+ and GREENGUARD GOLD Certified, SO CLEAN is kind to humans and the environment as it is guaranteed to be free of volatile organic compounds and cancer-causing atmospheric emissions.

SO CLEAN antibacterial coverings can be installed in a matter of hours by a cold, clean, dry installation process that requires minimal site prep and inconvenience to the staff or patrons of the facility, thus further enhancing their wellness expectations.

SO CLEAN

Sanitized®-Treated CLIPSO®:
safe and protected
interior surfaces

Designed for safety and durability, the SO™ CLEAN range of coverings is treated with Sanitized® protective solutions that destroy 99.9% of bacteria.

Sanitized technology prevents bacteria from developing and restricts the growth of microbes, mold, mildew, rot and algae by directly destroying the various bacterial food sources. As a result, these bacteria can neither form nor spread.

Sanitized-treated SO CLEAN coverings also inhibit the presence of dust mites and their allergens, thereby providing added protection for allergy sufferers. Since it is an antibacterial and antifungal barrier, Sanitized delivers long-term action and effectiveness, even after exposure to disinfectants or cleaning solutions.

SO CLEAN

A high-quality custom solution

In addition to its antimicrobial and antibacterial properties, the SO™ CLEAN range of coverings provide further custom design and performance opportunities.

Properly managing sound and light aids in creating a more relaxing and healing space, which is crucial for the comfort of healthcare environments. SO CLEAN coverings can be combined with an acoustic or luminous solution to better enhance the comfort of a room.

For a unique yet practical solution, create custom-shaped design elements with the protection of SO CLEAN coverings. This offers a versatile and fun alternative to standard ceiling and wall coverings.

SO CLEAN

Also complements
pools and spas

SO™ CLEAN creates pleasant and enjoyable environments while also optimizing hygiene in public spaces.

Beautiful, bright and exquisite, the benefits of the SO CLEAN range of coverings are perfectly suited for resorts, pools and spas, which require a combination of alluring aesthetics, measurable acoustics and attention to hygiene.

SO CLEAN can be paired with lighting or acoustic solutions to meet the specified requirements of the location, achieve a perfect blend of style and function, and help create a particular mood or atmosphere.

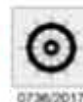

Expertise and experience at your service!

At CLIPSO®, our strength is in our custom solutions and high-quality product offerings. Our experienced and talented team of experts is always available to help you achieve your design goals. From sales and engineering, to design and project management, CLIPSO provides assistance with your project every step of the way.

Our ultimate goal is to help you achieve yours!
