

# DOEDEN CONSTRUCTION

Since 1968, our family business has provided ready-mix concrete, gravel, and various other construction services in the rural areas of Montana. In 2009, your sales representative Kelly, stopped in and met with my dad. Kelly had been referred to us by a local hay operation.

He showed him a demonstration on the red grease. Dad was quite impressed and knew that the equipment we used for dredging needed a better grease for the pins that were constantly exposed to water and dust. Those first three cases of 880 Crown & Chassis proved that TRC was different. We had never seen a grease stay where it was needed like this. Through the years it has proved to eliminate grease related issues.

One of the most impressive products we have seen is the motor oil. We have loaders, dredging equipment, graders, trucks, and concrete trucks, all equipment has the Moly XL Pro Spec IV XP in it. The oil analysis program has given us peace of mind to more than double our drain intervals. Most typical changes are 500-700 hours. Even at these extended drain intervals none of our equipment consumes oil between changes. With the harsh dusty conditions we operate, this oil has proven to be worth its weight in gold. Since we switched to TRC motor oils we have not had a single issue, even when we have neglected equipment and ran longer than we intended, the oil has held up! The no-charge oil analysis has helped us safely extend the drain intervals to areas we are comfortable with and to where we feel the oil is providing great value.

We also use Takilube II for our exposed gears, 890 Vari-Purpose for our few pieces of equipment that need gear lube, UTF Red for our hydraulics, and DZL PEP Arctic for our fuel conditioner. All of these products have performed exceptionally through the years. However, my favorite product is the Power Cleanse hand cleaner. I cannot believe how quickly it cleans my hands. It removes, grease, oil, or anything else I put my hands into. It is powerful and fast acting.

In all, our family operation is very happy that Kelly stopped in to visit with us. TRC has been a great product to trust our equipment to.

Sincerely,

Dirk Doeden
