

BURKARD CUSTOM CABINETS

Now Supplying RTA Cabinets Custom Fit. Budget Smart.

Burkard Custom Cabinets partners with Cabinotch® to deliver CNC-cut, job-ready flat-pack cabinets — customized, clearly labeled, and built for builders.

What's the program:

- Burkard designs your space. Cabinotch cuts each cabinet to exact size.
- You get a clearly labeled, flat-packed kit — ready for job-site assembly.
- Faster than full custom. Better than big-box.

Who It's For:

- Builders & GCs looking to cut costs without sacrificing fit
- Remodelers who need fast, flexible cabinetry solutions
- Handymen & carpenters without CNC capability
- Homeowners who want pro-level design with DIY pricing

What You Get:

- KCD Drawings + layout design
- CNC-cut precision
- Unfinished / primed / painted
- Flat-packed, labeled kits by cabinet
- Drawer boxes, hardware, trim, crown, and accessories (optional)
- Pickup or delivery

WHY CHOOSE RTA?

RTA (Ready-To-Assemble) cabinets give you the best of both worlds: custom sizing, real wood materials, and expert design — without the full custom price tag. You get CNC-cut parts, labeled by cabinet, delivered flat-packed and ready to install. It's ideal for pros who want speed and control, or DIYers who want to save without settling for stock.

HOW DOES IT WORK?

You send measurements or book a site visit. We design your layout and get sign-off. Then Cabinotch® cuts each part to spec and ships it to us. We inspect, label, and re-pack your kit for pickup or delivery — job-site ready from day one.
