

PIMAG® 10 WATER SYSTEM

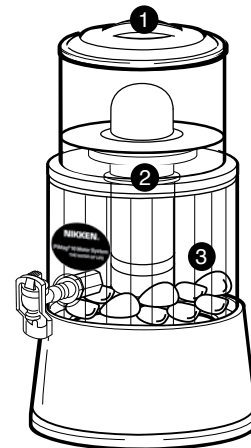

QUICK REFERENCE SHEET

- *Portable and economical — simple operation, advanced technology*
- *Filtration that works naturally by gravity flow*
- *Ionized minerals help regulate acid/alkaline (pH) balance*
- *Mineral elements produce pi water, “the water of life”*
- *Nikken Magnetic Technology*

PiMag®10 Water System

- 1** Water is poured into the upper (filler) tank.
- 2** Gravity directs the water flow through multiple levels of filtration, plus pi ceramics.
- 3** Water collects in lower (supply) tank, and passes through a magnetic field.

PIMAG®10 FEATURES AND BENEFITS:

- **Compact design**..... Can be set up on a counter or practically anywhere.
- **Gravity flow operation** Requires no electricity or plumbing.
- **Ceramic Filter**..... Provides more intensive filtration, for areas with high sediment or rust content.
- **Microsponge Filter**..... Reduces particulates.
- **Filter Cartridge** Reduces chlorine, odours, chemical contaminants.
- **Pi ceramic material** Reproduces conditions for creating pi water.
- **Mineral Stones**..... Help maintain a balanced range of minerals which help to regulate the pH to mildly alkaline.
- **Silver Stones**..... Anti-bacterial effect to preserve the quality of the water.
- **Magnetic technology**..... Adds the magnetic component to produce PiMag water.

PIMAG® 10 WATER SYSTEM

QUICK REFERENCE SHEET

THE FACTS

- 1 Nikken based its evaluation of domestic water treatment on the premise that good water involves more than just a lack of impurities. It should provide sparkling clear, good tasting water, while retaining beneficial minerals in a magnetic environment. The PiMag 10 Water System meets each of these requirements at a fraction of the price of bottled water.
- 2 The Ceramic Filter reduces the presence of particulates such as soils, clays and foreign materials to a range of 0.2 to 0.5 microns.
- 3 The Filter Cartridge reduces residual chlorine, unpleasant odours, trihalomethanes (THMs), lead and other heavy metals. The top stage of the filter cartridge contains activated carbon to reduce chemical contaminants, and an ion exchange resin to reduce heavy metals. The second stage is pure activated carbon to further reduce chemical contaminants, while the final stage contains silver/copper/zeolite to provide an antibacterial action plus additional contaminant absorption.
- 4 Silver Stones placed in the lower storage tank contain silver impregnated mineral stones that provide an anti-bacterial effect to preserve the quality of the water.
- 5 Mineral Stones, placed in the lower storage tank, along with the Silver Stones, contain calcium, magnesium, silicon, iron, phosphorous and others that help maintain a balanced range of mineral which contribute to good health. The stones also help adjust the pH to mildly alkaline.
- 6 The PiMag 10 Water System adds a fourth dimension by delivering water through a high field strength (1,200 gauss) magnetic tube attached to the tap of the lower storage tank.

This product is free of BPA (Bisphenol A)

The contaminants or other substances removed or reduced by this water treatment device are not necessarily in your water. Use only on municipally treated water or other supply known to be safe for drinking. This system is unsuitable for use with bore, dam or tank water due to possible high levels of particulates that would rapidly clog filters and reduce the flow rate. Possible bacterial contamination would also be of concern.

Hand wash the water tanks and rinse all components periodically, approximately once a month. Refer to Product Guide that comes with unit for important care instructions.

If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, do not use or wear magnetic products. Women in the first trimester of pregnancy or anyone who has a health problem should first consult a physician before using magnetic products. Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/DVDs credit cards, portable electronic equipment, etc.

PRODUCT INFORMATION

ITEM CODE	DESCRIPTION
#1360	PiMag® 10 Water System
# 302	Ceramic Filter - Replacement (Up to 2 years)
#1362	Microsponge Filter - Replacement (When sponge becomes permanently hardened or discoloured)
# 301	Filter Cartridge - Replacement (6 months or 2,000 litres, whichever comes first)
# 303	Silver Stones - Replacement (1 year)
# 304	Mineral Stones - Replacement (5 years)

FEATURED NIKKEN TECHNOLOGY

PiMag Water Technology, gravity flow, multiple filtration

WEIGHT AND DIMENSIONS

5kg, Base Diameter - 24.9cm, Height - 53.3cm

CAPACITY

Fill tank (5 litres), supply tank (10 litres)

WARRANTY INFORMATION

TAP - 1 year.

QUICK

SHARING TIPS

- Offer a drink of water from the PiMag® 10 Water System. PiMag water is not only "the water of life," it tastes delicious.
- Because the PiMag®10 Water System works without electricity or plumbing, it can be used in any situation.
