

SOUTHWESTERN PETROLEUM CORPORATION

HIGH PERFORMANCE LUBRICANT EXTENDED SERVICE WARRANTY

Southwestern Petroleum Corporation hereby warrants that a SWEPCO Gear Oil, Engine Oil, Compressor Oil, Hydraulic Fluid or Transmission Fluid *used in either standard or extended service intervals* will NOT be the sole cause of a mechanical failure. This warranty applies to any stationary, over-the-road or off-road equipment used in industrial or commercial service in the United States, Canada or Europe, including Allison, Eaton, Caterpillar, Detroit Diesel, Cummins, Mack, Ford, GM, Daimler-Chrysler, Volvo, Sullair, Ingersoll-Rand, Gardner-Denver, Quincy and all other commercial and industrial equipment. The protection of this warranty extends only to equipment that:

1. is operated within the load, speed and temperature requirements of the Original Equipment Manufacturer, and
2. is maintained according to the Original Equipment Manufacturer's recommendations and specifications, in all respects other than brand of lubricant specified (if any) and lubricant drain intervals, and
3. is lubricated exclusively with the recommended SWEPCO Lubricant for the application and operating conditions, and
4. is regularly monitored according to the requirements and sampling and drain recommendations of Southwestern Petroleum Corporation's Lab *Tec*SM Fluid Analysis Program.

If a piece of equipment that meets the requirements stated above in all respects suffers a mechanical failure as a direct result of SWEPCO Lubricant failure, Southwestern Petroleum Corporation will pay for replacement of damaged parts of like kind, condition and quality at labor rates equal to or less than those published in current industry accepted flat rate guides. In the event of a failure, Southwestern Petroleum Corporation's technical support team will work with the customer to determine the exact cause of failure. This process will require access to related parts, filters, detailed maintenance records and all oil that was in the unit at time of failure. In order to qualify for reimbursement, repairs must be pre-authorized by Southwestern Petroleum Corporation. In the event it is determined that a SWEPCO Lubricant is not responsible for the equipment failure, Southwestern will assist the customer in documenting a claim with the responsible party.
