Fan-shape and Rectangle Combination

Other shapes

Soundproof Security

Effective sound insulation

When the ventilation window is closed, the isolation volume is up to 45 dB.

Make the indoor activity space more safe and comfortable.

Sunshade Insulation

Provide Natural insulation for your windows

Light transmission and ventilation, blade angle can be adjusted freely, light adjustment and control is simple;

Wooden ventilation windows have good heat insulation effect, reduce air conditioning energy consumption, energy conservation and environmental protection;

Keep warm in winter, keep the cold current out of the window and keep the room temperature.

Quality Details

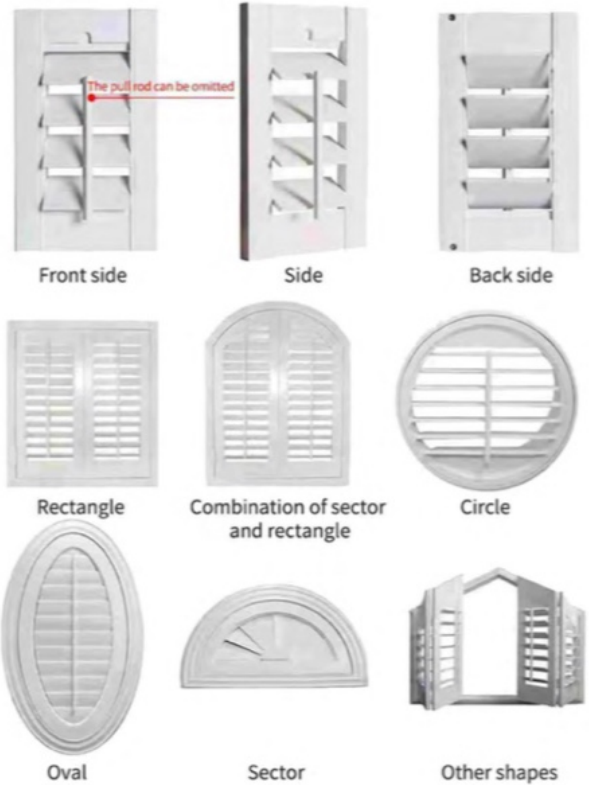

Easy-to-use Tilt rod

Adjust the blade closure to control the light at will. The irradiation angle can be changed into an invisible pull rod according to the demand, which is placed on the blade outside the window sash, so that you can open the blade to enjoy the scenery outside the window and have a wider field of vision.
