

Media Invitation

UCONN STUDENT FOG-TO-BIODIESEL PROJECT, GREATER NEW HAVEN WPCA IS A SUCCESS!

Date: Thursday, September 27th

Time: 11:00 AM

Location: Greater New Haven WPCA
345 E. Shore Parkway
New Haven, CT 06512

You are invited....

Governor Dan Malloy tours the Greater New Haven WPCA's biodiesel production plant, operated in conjunction with The University of Connecticut chemical engineering department. UCONN students partake in the daily operation and testing of this FOG-to-biodiesel production equipment. This equipment transforms Fats, Oil and Grease (FOG) from the wastewater treatment plant into biodiesel, creating a useful energy source from what was previously considered waste material.

We invite all media to join Governor Malloy and Mayor Toni Harp in a meet and greet with the inventors of this patented technology from REA Resource Recovery Systems and the UCONN students participants. The Governor will discuss the environmental benefits and the potential impact that it could have on the wastewater industry and CT job market.

We look forward to seeing you at our exciting event!
