

# VACCINATED

# NOT

# VACCINATED

For a group of 20 to 40 people –  
print 20 vaccinated and 20 not vaccinated pages  
print 1 haus sik sign  
print 1 home sign  
print 1 morgue sign for the those who die.

The scenario can be played to describe any workplace or community.

Round 1:

20 people stand in a room holding NOT vaccinated cards

Nobody is vaccinated when patient zero arrives in the community.

Patient zero – infects 2 people,

1. 1 with his left hand - who goes home sick or disappears and
2. 1 with his right hand who needs to go to hospital.

Each person who is touched then touches two more people as the leave the workplace to go home, disappear or to the hospital.

The game ends very quickly when no body is vaccinated... DISCUSS

Replay the game with 20 people holding vaccinated cards and 20 people holding not vaccinated cards.

See what happened when patient zero tries to infection by touching one NOT vaccinated person with their left hand and 1 with their right hand and so on....

Discuss what happens for different settings – work, home village community, schools? AND for different levels of vaccination
