Learn how to access FREE testing, treatment and support

Enrol NOW., Book a training date. Save Lives. [CLICK HERE](#) to contact B4H

PNG's rates of TB and drug resistant-TB are amongst the worst in the world. In 2022, it is estimated that another 40,000 people will be sick and at least 4,300 will die of TB. Workplaces can play a huge part in finding TB cases sooner, and improving treatment adherence. Most adults with TB are of working age.

INVEST IN TB. SAVE LIVES.

Businesses for Health (B4H) will train your staff and support you to develop your own TB program. We provide advice to ensure your business is best placed to look after your employees and improve productivity.

ABOUT B4H PNG

B4H trains non-health-staff in simple and effective TB and HIV workplace health promotion programming. We help to find people with TB and to minimise the impact of PNG's deadliest infectious disease on your business
