

2025 Businesses for Health PNG HIV Workshop

Triple elimination: HIV, Hepatitis B & Syphilis

Prepare for World AIDS Day and join our work to support the elimination of HIV, Syphilis, Hepatitis B in Papua New Guinea

2025 TB Wardens NO FEE

STOP Hepatitis B
STOP Syphilis
STOP HIV

Why Triple Elimination

Triple Elimination Matters. PNG faces growing numbers of adults and babies affected by HIV, Syphilis & Hepatitis B. This leads to infant deaths, lifelong illness, and poor health outcomes for workers.

Transmission from parents to baby is preventable. Now, more than ever, Triple Elimination of these three STIs must be a national priority.

PNG Businesses are key

Be part of PNG's private-sector solution to end transmission of sexually transmitted infections (STIs). Workplaces are key to reducing stigma and promoting health service seeking.

Your leadership makes a difference. STIs harm productivity and increase costs. Together, we can save lives, protect babies, and strengthen our workforce.

Designed for Workplace HSE reps, HIV champions, TB wardens, Training, CSR, HR, GEDSI teams and leaders.
