Tips

Ordering TroLase ADA Signage with self-adhesive film applied to the back will allow you to easily mount letters cut-out from the material plate onto base plates or walls. During assembly, use the cut material plate as a template for spacing and as a line level.

A few tips for best results:
- A cutting grate should always be used when cutting plastics, in order to lift the material.
- Remove the protective film in order to prevent discoloration or excessive smoke.
- If excess smoke results, then too much energy is being used. In this case increase the speed.

The ideal material
for each application

The Trotec Materials business unit was launched in February 2017. Today our broad line of materials includes more than 800 products designed for laser and rotary processing — including laminates, acrylic sheets, wood panels, and laserable paper. Materials are available in a wide selection of colors and surface finishes, and are used for many applications such as indoor and outdoor signage, illuminated displays, ADA signage, print-and-cut applications, name plates, data tags, plaques and more.

Combined with our extensive line of CO_2 and fiber laser systems, our materials product line has enabled us to provide you with a complete range of support for your business – including laser equipment, materials and expertise – in a convenient and unique single-source solution. Our materials provide high-quality results in fewer passes and leave less residue. Other major benefits include:

– Lowest cost on premium products
– In-house technical support for lasers and materials
– Fast delivery
– Easy online purchasing

You can quickly and easily purchase our high-quality laser and engraving materials online at our webshop at shop.troteclaser.com/en-US/ . On our webshop, you will find a comprehensive assortment of products, up-to-date information about our materials, usage and processing tips, and practical sample instructions.
