All materials and construction must comply with the most stringent applicable national and local fire and safety codes. All drawings and paperwork represent concepts and construction suggestions only. The designer is unqualified to determine structural appropriateness of the design and will not be responsible for improper engineering, construction, installation, maintenance, use, or handling of the lighting system. This light plot and all paperwork associated with this design is the sole property of the lighting designer and may not be reproduced or given to unauthorized individuals without the prior consent of the lighting designer.

NOTES:

- Dimensioning has not been placed on this plot. Please measure all spacing of units with a scale rule.
- Any color listed with 7° (ex. L-40/R25) will be custom gels split and taped on the diagonal seam.
- Units drafted off-center of the pipe should be yoked at the angle stated on the light in the direction in which they are drafted.
- Please drop all color and accessories before focus.
- See paperwork for accessories, as they are not drawn on plot.
- All Taildown units should be hung at the height depicted.
- All Scroller Units should get Heat Shield between unit and scroller.
- Wybron Forerunner Scrollers will use 'Rock and Roll Scrol'
- Please have extra R132 and R119 available at focus.
- Please have blackout and blackback available at focus.
- Units with matching Channel Numbers may be two-fered.
- House Lights = Channel 500, see paperwork.
- Work Lights = Channel 499
- Running Lights = Channel 498
- Tech Lights = Channel 501
- No substitutions or changes without the express consent of the lighting designer or assistant.
