

Advisory Committee

WAYNE COUNTY HAZARD MITIGATION PLAN

The Advisory Committee is a critical component of providing community input to update the Hazard Mitigation Plan (HMP). The committee will assist the County in identifying and prioritizing hazards and mitigation strategies, and will provide review for the draft HMP. Using a combination of web-based surveys and workshops, committee members will provide the input necessary to focus the HMP on those hazards that are specific to Wayne County, and to coordinate future mitigation strategies with existing goals and objectives of the County and its communities.

As a committee member you will be asked to complete two web-based surveys, attend two workshops, and be available by phone for follow-up questions if needed. In addition, you will be asked to become familiar with the hazard mitigation process, and to review and provide comments on the draft HMP.

The web surveys will be completed prior to the workshops in order to provide information for discussion. Each one should take 15 to 20 minutes to complete. The workshops are scheduled for

First Workshop	March 14, 2019
Second Workshop	March 28, 2019
