Mr. Miller

Thank you so much for your quick response.

I apologize for my earlier email cancelling my document request, then reinstating. Hope this hasn't caused the documents to now be delayed.

Thanks again...Lori

Good morning!

There are currently 6 lift stations throughout our system. Our engineer is revisiting our master utility plan to project what future growth and development may necessitate, though I can for certain state that at least 2 additional lift stations are in

the District's future.

Regarding payments, 2017 there was \$462,522.26 paid, 2018 was \$1,542,567.38 and 2019 was \$1,273,223.92.

Mr. Miller

Please cancel my request for all invoices paid to RS Smoke and WSR as David Hackett sent me copies of what you had given him. I do however still want the dollars paid in the years outlined below.

Additionally, do you know how many lift stations are in San Leon, or do I need to call the engineer for the information?

Thank you for your help

Mr. Miller

I have been reviewing all the board minutes currently on SLMUD website and have downloaded all the monthly financial data as posted.

It came to me that the contract Mr. Hackett posted was dated in 2016. Has SLMUD been paying this contractor prior to the April 2019 checks that were posted?

I would like the total dollars paid to R.S. Smoke Test & Multi Service Company and WRS Water, Sewer Repair & More for the years 2017, 2018, 2019 as applicable. I do not need a check by check basis...I only want the year to date totals based on your fiscal year end date.

Thank You

Not all of the work R. S. performs for the district is directly related to smoke testing and repairs, they also do other general contracting work for the San Leon. I am in the process of responding to several open records requests, including your own, but should have everything ready for you by the end of the week. If the file is too large to email, I'll let you know and will have it available for pickup in the office.

Mr. Miller,

Below, I took the dollars paid to R.S. Smoke Test and converted it to the average footage. I wanted to see how many feet/miles this company did to be paid that much money. A typical smoke testing job is 50 cents per foot because the only equipment required is a blower, smoke bombs, and a pickup truck. As you can see, the dollars equated to more than 83 miles of pipe. I don't believe San Leon has that many miles of pipe in the whole area. If I increased the cost to 75 cents per foot (which is extremely high), the miles would be 55 miles of pipe. Either way, you get my point. I believe the MUD District and the taxpayers of San Leon have been taken advantage of, and I hope you are relaying this to the board members.

SMOKE TESTING		Convert to	Convert to

Mr. Miller,

I found the DBA and both companies are owned by the same person. So now we have a former employee of SLMUD working under 2 different companies, and has an exclusive contract with SLMUD of which he has earned more that 1.2M.

This looks awful and should have never happened. How in the world has this gotten by the board of directors for this amount of time???

San Leon MUD is paying on the average \$50,000.00 per month between smoke testing and repairs, and these are for emergency repairs? For the money that has already been paid to this company, San Leon should have all new pipe through the whole town. I understand your field Superintendent should make decisions on any emergency calls, but to allow that person to sign any contracts for the amount of work that has been done, is irresponsible of the board members. Someone should have questioned this long ago.

Again, who reviewed the data that should have come from the contractor when the smoke testing was done, showing what repairs/maintenance needed to be done? Or are the board members taking the contractor's word for it?

I work for Specialized Maintenance Services, Inc., part of the Carylon Corporation ([www.caryloncorp.com](http://www.caryloncorp.com)). This company has been in business more than 70 years and though we specialize in the type of work you have had done, there are a lot of other reputable contractors, like us, who would have given San Leon a bid on this project. I could not find any previous work history, clients, etc. on the contractor you used. If a contractor is needed for call-out, maintenance and repairs, then it should be bid, so as to save the taxpayers money.

Thank You

**Subject:** RE: Attn: Andrew Miller

Good afternoon!

I understand your concern and look forward to providing a more comprehensive understanding of the situation. While Mr. Haskett's facts are valid (payments were made to both WSR and R. S. Smoke Testing for multiple jobs that were done throughout San Leon), his narrative couldn't be further from the truth. The District contracts out all manners of work when the task at hand is deemed beyond the capacity of our in house crew, be that a result of specialized equipment or a larger number of personnel required to safely perform the work. These individual repairs are not of sufficient size that would warrant a formal bidding process, though collectively they result in invoices that appear that a formal bid is required. Emergency repairs are also conducted in many situations as the bulk of our system's infrastructure dates back to the creation of the District and is in a constant state of needing repairs.

Regarding WSR, it is our understanding that they have a DBA on file with Galveston County.

One of the inherent responsibilities of field superintendent is to facilitate the repairs and maintenance of the District's infrastructure. As such, Mr. Keller is authorized to pursue and engage in contracts for repairs deemed necessary to

maintain operations that do not rise to the level of required bids for projects. If the projected costs are anticipated to exceed the State mandated thresholds, then the District will follow all necessary protocol to receive bids.

Checks require 3 signatures for endorsement and only the current board members and our office manager have authority to sign. This creates a system of accountability that is standard for most Districts.

I will make copies of the requested documents as soon as possible and notify you once they are available for pickup, at no charge. In addition, please forward me any information on your company so we can directly contact you should we require any sewer cleaning and televising in the future.

Mr. Miller

Over the weekend documents were posted showing the payment of more than \$800,00 to a company called WRS Water, Sewer Repair & More and another \$222,000 to R.S. Smoke Test for a period of 9 months. As a homeowner and tax payer in San Leon, I am very disturbed with these findings and would like the following questions answered immediately:

1. When was this project advertised for bid? As you can see, I work for an established sewer cleaning and televising company of which I have been employed with for more than 32 years. We watch for local bids continually and never saw this bid advertised.
2. Who is WRS Water Sewer Repair and More? I could not locate where this is a viable company.
3. Who authorized a field superintendent to sign and bind San Leon into a contract?
4. Who is authorizing and signing the checks?
5. Who or what company reviewed the data showing major repairs needed? I want a complete copy of those documents.
6. I want copies of all invoices paid to both contractors.

As a contractor who provides this type of service to the City of Houston and other municipalities on a daily basis, these rates are obscene. San Leon has no where near the line footages of Houston, Pasadena, etc.

Please let me know the cost of my request for copies and I will come by the office with the necessary funds.

Should you have any questions, please don't hesitate to contact me.

Thank You,

**Lori Brockman**
