

Welcome to the Haygain Way

HAYGAIN® FORAGER

THE IDEAL SLOW FEEDING METHOD

The Forager extends your horse's meal times and allows for eating in a healthy, natural, head-lowered position. Reduces the risk of ulcers, colic and boredom behaviors and prevents hay waste!

PATENTED
STEAM
TECHNOLOGY

HAYGAIN® HAY STEAMERS

High Temperature Haygain Hay Steamers are scientifically proven to **REDUCE UP TO 99%** of the dust, mould, bacteria and other allergens commonly found even in good quality hay. These particles are the main cause of respiratory disease in horses.

OUR STEAMER RANGE:

1

HG 2000

Ideal for steaming hay for multiple horses at home.

Full Bale
Capacity

2

HG 600 **Most Popular**

Go-to model for home and travel with pop-up handle & wheels for easy transport.

Half Bale
Capacity

3

HG ONE

Ideal for one horse, ponies or donkeys. Great for travel.

2-3 section
capacity

HAYGAIN® COMFORTSTALL®

SEALED ORTHOPAEDIC STABLE FLOORING

Medical grade foam for built-in cushion, with a single-piece, durable non-latex top cover. Seals to stall wall to prevent urine seepage. More comfort and support. Less bedding, labor and cost. 15-20 year life expectancy.

BENEFITS OF THE HAYGAIN WAY

HAYGAIN®

Haygain Steamed Hay:

Reduces up to 99% of the respiratory irritants that cause respiratory problems.

Supports digestive health and a forage-first diet.

Up to 3X the moisture content of dry hay.

Proven appetite appeal ensures your horse gets their needed nutrients.

The Forager Slow Feeder:

Regulates the pace at which your horse eats.

Containment reduces hay waste and contamination.

Helps prevent ulcers and obesity, while keeping your horse happily busy.

Natural head-lowered eating position lessens neck and back tension.

ComfortStall Sealed Orthopaedic Flooring:

Encourages deep rest and REM sleep.

Significant savings on bedding and labour.

Supports joint health and prompts therapeutic blood flow.

Relieves sore feet and symptoms of laminitis.

Helping owners help their horses with science-backed, non-medication approaches to the many health challenges of modern equine management.
