

# First Responders WISH LIST Foundation

division of SAFETY FUEGO

## Just what is First Responders Wish List Foundation?

The First Responders WISH LIST Foundation is a non-profit corporation that supports small rural and volunteer departments. We obtain surplus equipment from large public safety departments and fulfil the WISH LIST request from the smaller communities through the non-profit program. These communities are located throughout southern Arizona and northern Mexico.

## What is the Wish List all about?

Our wish list is a way for us to discern what our various communities need, or what they have that they might be able to part with.

## How do I get equipment from the Wish List?

There is an exceptional form that you can fill out at [safetyfuego.com](http://safetyfuego.com). This will let us know the items that you need and allows us to see if we have any; or if any of our contacts have them to donate.

## Some of the people that have helped us help our communities.
