B Eco Food Trays Eco food trays are made from all kraft paperboard. Like all of our other food trays, the new Eco trays are highly recyclable and compostable when disposed in proper commercial facilities. The trays have disposal logos printed on the bottom to effectively communicate this with your customer. In addition, Eco Trays are made using a totally chlorine free manufacturing process, which consumes less raw material and water, leaving more of those resources untouched. Clearly, Eco Trays are the natural choice for your foodservice needs and our environment.

★ This product is not available for sale in California.

E Vio™ Biodegradable Food Containers Convenient food containers offer all of the performance benefits of foam: superior insulation, versatility, leak resistance. Vio™ containers have been shown to biodegrade 84.3% after 1154 days under conditions that simulate a wetter, biologically active landfill, using the ASTM D5511-11 test. Note that stated rate and extent of degradation do not mean the product will continue to decompose. A cost effective solution for everyday foodservice needs. An excellent choice for serving soups at grab-and-go applications.
