BATHROOM COLLECTION

January 2020

**Bathrooms
to inspire**

**Exclusively
designed for
everyone**

FIND YOUR OWN IDEA OF PERFECTION

*Whoever you are, wherever you live,
you deserve a beautiful bathroom.*

nuiebathrooms.com

Urban elegance

*Create your own
sanctuary with our latest
styles. Perfect for even the
coziest apartments.*

We do bathrooms differently

Whoever you are, wherever you live, you deserve a beautiful bathroom. After all, it's the first place you visit in the morning and the last place you see before bed. It's where you relax and unwind, and it's often the only time you have for yourself.

That's why it's important to get things right – the right curves, the right shapes, the right taps – without needing to wait another year. We think deep baths matter more than deep pockets and that's why our bathrooms are exclusively designed for everyone.

*Now all you need to worry about is what
to sing in the shower.*

Go en-suite

*An en-suite bathroom
makes any bedroom feel
grand, and it's no less
than you deserve.*

**Make the
queue worth it**

*Family bathrooms should
be as lovely as they are
practical, so you won't
mind waiting your turn.*

**The latest
designs**

*A sleek surface, an angle,
an edge – all our modern
interiors are on-trend.*

Timeless design

*Beauty is in the details,
and that's why some styles
never go out of fashion.*

Taps & Showers.

There's nothing like the glint of a shiny new tap or shower.

In a beautiful bathroom, it's the fixtures that make all the difference.

CE Approval /

All our radiators have been designed to provide a comfortable level of warmth needed for everyday indoor use, as well as being manufactured to conform to BS EN 442-1:2014, and all current European standards.

Our heating products have all been independently tested and we are delighted to present our collection of fully certified CE products that conform to all applicable standardized regulations.

Heating FAQs /

How much heat will I need?

All rooms are individual and therefore the heat output required from your selected radiator will vary. It is important that you choose the correct radiator to ensure that enough heat is generated to keep you comfortable. A sensible tip is to always choose a model with a higher heat output than you require, as this can always be controlled by turning them down.

What is the measurement for heat output?

All our radiators carry the heat output measured in either:
• BTUs (British Thermal Unit) or
• Watts
BTUs are shown with water temperature of 80°C at radiator inlet.

What heat output will I need for my room?

It is highly recommended that your installer calculates the BTU requirement for each applicable room, so you can get the maximum heat benefit from your chosen radiator. We strongly suggest this is done before purchasing your radiator.

What radiator designs offer the best heat output?

Basically, the bigger surface area that a radiator has, the more heat output will be generated. Another general guide is that painted finishes offer a slightly better heat output than chrome-finished items. To optimize the space you have available, we offer radiator designs that can be fitted horizontally or vertically. To get additional heat output from the same area, you can also choose options that include multiple rows of tubes, panels and columns.

Radiator colour options

From stock, we offer the most current fashionable colour options across a wide range of products. Please note that owing to the printing process, the actual colours on the radiators may vary slightly from those shown in our brochure.

Pipe centres

All our dimensional details are published in our current brochure and on our website. However, owing to manufacturing tolerances, we strongly suggest that your final pipework position is not completed until you actually receive delivery of your radiator.

Electric-only radiators

Where your installation location does not have immediate access to an existing water supply, we can offer purpose-made electric-only products for a quick and easy solution to your heating needs. These electric-only products are supplied pre-filled with an electrical inhibitor solution, and fitted with a compatible heating element.

Dual-fuel radiators

Some of our radiators can also work as dual-fuel applications, which means that when your main heating system might be turned off in the summer months, you can still operate your radiators electrically if required. Please consult your plumber before purchasing heating elements.

Radiator valves options

Depending on your choice of radiator, we have several styles to choose from, details of which can be found on the left hand page.

Warning / Precautions

Qualified persons should make all electrical and plumbing connections. When fitting radiators with heating elements, the radiator must always be mounted with the element at the bottom with the radiator in the upright position. Failure to do so may result in a fire hazard.
