

# Bureau Card Printing

SJC offer a complete bureau service with fast turnaround times for plastic card printing. Backed by a wealth of experience and a variety of printers to tackle any job size from a few cards to thousands, SJC are able to produce cards and offer support and advice from the initial design stages right through to delivery and beyond.

SJC have the capability to print cards in full colour or monochrome, dye sublimation or re-transfer and the facility to offers cards magnetically encoded in a variety of ways ranging from magnetic stripe for gift cards through to proximity cards for access control applications. Offering a wide selection of coloured and specialist cards to further extend design options, SJC also offer cards in varying thicknesses – from 0.25mm to the 0.76mm industry standard, cards with signature panels, scratch off panels, even holographic and UV for extra security, sticker cards and magnetic backed cards, the list is extensive.

The in house design consultation team can come to you and help you produce your idea from scratch. SJC can also accept entire databases and photographs in most formats for mass production of ID cards.

The potential of printed plastic cards is almost unlimited and can be adapted to suit any application including ID, loyalty, discount, and membership to name just a few. To complete the service, SJC offer a comprehensive range of card accessories from card holder and clips to lanyards and chains, or, if preferred, SJC can offer an on-site consultation to design the cards, to take photos, enter data and produce cards on site instantly.
