

# iPad Visitor Management System

## Move on from your paper sign in book!

VPass is a cloud-based iPad visitor management system that is easily customisable. Manage Visitors, Contractors, Staff, Students... and much more.

### Why VPass?

✓ Replaces existing hand-written visitor books

✓ Live secure cloud-based Storage

✓ Easy self-registration process

✓ Cost effective iPad visitor management

✓ Monitors and stores all visitor attendance

✓ Brandable with your logo and colour scheme

✓ Photo capture facility

✓ Apple approved solution

# How It Works

**1**

The visitor registers on the VPass App, customised with your logo and the fields you want.

**2**

Press 'Sign In' to get started.

**3**

Select visitor type.

**4**

Enter your personal details.

**5**

Create photo ID.

**6**

Agree to the terms & conditions and sign.

**7**

You have now signed in and can enter the premises.

## What They Are Saying...

“

Overall a fantastic product which offers an easy way to track visitors.

”

**Sean Snelson**  
*Get Hooked on Positive Activities (UK)*

“

VPass showcases how we use technology to do what we did for many years on paper... VPass has been a real game changer.

”

**Kenneth Ryan**  
*Principal, Sunshine North Primary School*

Visitors can sign-off on an access-to-premises agreement

Use your own... or custom designed badges and lanyards

---

## What you Need

iPad2 (or greater) with Wi-Fi & VPass App

+

iPad Desktop Stand

+

Wireless Badge Printer

OR

Badges & Lanyards

# Additional Features

## Multi-Syncing

Set up more than one terminal (iPad) and they will automatically sync, allowing your visitors to sign in at one terminal and out of another.

## Photo Capture

Take a photo of your visitor and view it live in your admin system, it always helps to put a face to a name and adds an extra level of security.

## Customisable iPad App

Complete customisation of visitor types, fields, forms, logo.

## Visitor Identification Options

- Print badges on a selected wireless label printer
- Use existing numbered badges
- Create unique codes

## Non-Disclosure Agreements

Create multiple NDA's and have your visitors sign on the iPad to agree.

## Terms and Conditions

Provide your complete Terms and Conditions for all visitors to agree to.

## Emergency Evacuation Report

No need to grab the iPad, access your Admin from any internet enabled device and hit the Emergency Evacuation button to see everyone who is onsite.

## Run Reports on Your Visitors

You can create your own favourite reports for specific visitor types and date select a date range of when they had visited.

## Manage Your iPads From One Account

Have more than one terminal at the one location, within one or more sites... all managed from a single account.

## Tiered Administration Levels

Create new admin users to your account and select restriction on what they can and cannot see or do.

## Sign Out Visitors Remotely

With the touch of a button you can sign out all visitors from the previous day.

## Self Sign Out

A visitor can securely sign out if they have lost their badge or forgotten their ID code via a secure sign out process.

## Create Your Own User-Friendly Forms

Capture the data you need by building forms using drop downs, checkboxes, radio buttons, headings, section breaks, text boxes... and more.

## Registered Visitors

For your regular visitors, create a record for them in your admin that provides them with a unique ID code for quick and easy entry and exit.

## QR Code Capabilities

Create your own QR codes (via third party providers) with your Registered Visitors ID code or even your badge numbers for a seamless sign in process.

## No More Missing Badges

Print sticky visitor badges and hence not have the expense of replacing lost badges & lanyards.

## Wireless Keyboard Compatibility

Use a Bluetooth wireless keyboard with your iPad for typing convenience.

## Visitor Privacy

All visitor information on the iPad can be secured so it will not be displayed for anyone to see.
