

MUSTERD

Enhanced Mustering & Roll-Call System

A CORPORATE RESPONSIBILITY
SOLUTION FOR...

- Company Directors
- Facilities Managers
- Fire Marshalls
- Safety Officers
- Anyone with Safety Authority

Why **MUSTERD**?

...Because the next time,
that **ALARM** might be for **REAL**...

Safety is a Corporate Responsibility...

In an Emergency, what's the Problem?

- Most Access Control Systems provide a basic, paper-based Roll-Call List.
- A Paper Roll-Call List is difficult to use, and might be useless in the dark, or bad weather.
- What's worse – if the printing failed – or if fire, network damage or loss of power has disabled your Access Control System – then the Paper Roll-Call List might not be available at all.
- Without a list, you won't know who is UNSAFE, or where to find them.

YOU COULD FACE AN EMERGENCY WITHOUT THE INFORMATION YOU NEED TO PROTECT THE PEOPLE IN YOUR CARE.

In an Emergency, MUSTERD is the Solution...

- MUSTERD works alongside your current Access Control System.
- MUSTERD keeps a secure, real-time List of WHO is on site and WHERE they're located.
- In an Emergency, MUSTERD is ready to help you protect your workforce, and to keep them safe.

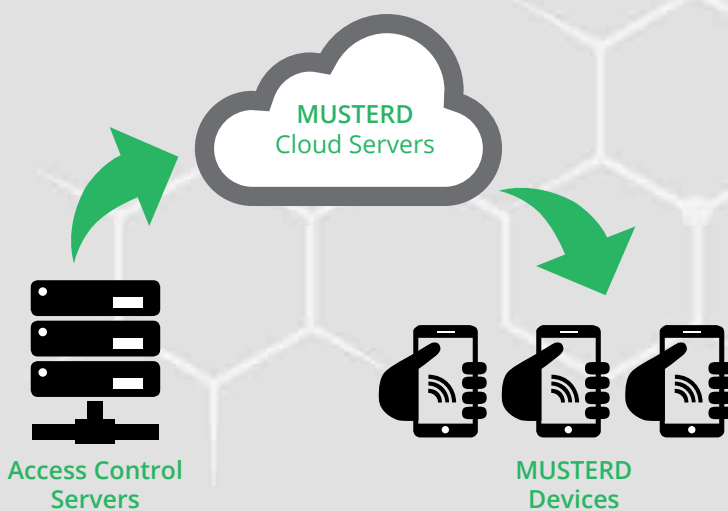

DAY OR NIGHT, RAIN OR SHINE – YOU'LL HAVE THE INFORMATION YOU NEED TO SAFEGUARD YOUR PERSONNEL.

☎ 0800 854 471

How Does MUSTERD Work?

- MUSTERD integrates with your Access Control System, so it stays informed about the up-to-date status of your site.
- MUSTERD understands your Access Control set-up – it knows about your Access Control Readers and Areas, and about the People (employees, contractors, visitors and others) within the Access Control System.
- During normal working, MUSTERD collects real-time safety information about the People moving around your site – who they are, and where they are.
- MUSTERD uses fast, secure communications to push this data UP into the Cloud, and back DOWN to your network of MUSTERD hand-held devices.
- In an Emergency – even if your Access Control system is disabled by fire or loss of power – any MUSTERD device can instantly produce a list of UNSAFE People for Roll-Call, Mustering and Rescue operations.
- As People assemble at any Muster Point, they register with MUSTERD, and this quick, simple operation moves them to the consolidated SAFE list.
- Even after your People are SAFE, MUSTERD keeps tracking them, so any MUSTERD device can tell you who's out of danger.
- Most important – any MUSTERD device will tell you who's still missing – still UNSAFE – and where they might be found.

Features & Benefits

MUSTERD provides Real-Time safety information in an Emergency.

MUSTERD keeps working even if your Access Control or Network is disabled by power failure or damage.

Unlike a Paper Roll-Call List, **MUSTERD** works in the rain, and in the dark.

MUSTERD can separately track the locations of Fire Marshalls, First Aiders and other Emergency Specialists.

MUSTERD can Capture and Report on Fire-Drill Performance.

MUSTERD can replace expensive, hard-wired fixed Muster Points.

MUSTERD provides Multiple Threat Management – for example, it can handle simultaneous Fire and Gas Leak Emergencies.

MUSTERD uses Secure, Encrypted Communications, to keep your data safe.

MUSTERD is Cloud-based, and built on the reliable, robust performance of Microsoft Azure.
