

Verve is a Woman-owned (**WOSB**) and Service-Disabled Veteran Owned Small Business (**SDVOSB**). Verve is a partner for our government in helping achieve agency goals by offering strategy solutions and implementation services. Our high-quality delivery model utilizes "Partnership for Success" approach to help government maximize citizens' tax dollars. We have experience working with Federal government agency leaders that helped tailor our solution to meet federal security, governance, and budget constraints.

CAPABILITIES

Strategy and Program Management

- Agile/SAFe/Waterfall/Hybrid Delivery
- Business Process Re-engineering

Data Analytics

- Predictive Modeling
- Operational Analytics
- Maps and Visualization

Digital Services

- DevOps/DevSecOps
- Full-stack, Databricks, Snowflake, ServiceNow, Oracle EBS

Cyber Security

- Emerging Technology Security Assessment
- Security Operations - safeguard and security methodology
- Security Control Assessment

Training and 508 Compliance

- Instructor-led Training
- Training Events Planning and Execution
- Instructional Design
- WCAG 2.0 AA level Compliance

Healthcare

- Quality Management
- Program Integrity (Fraud, Waste and Abuse)
- Healthcare Risk Adjustment

Contract Performance Experience

Client: Department of Veteran Affairs (VA)

Verve provides services to the VA's Office of Mental Health and Suicide Prevention under the SSG Fox Suicide Prevention Grant Program (SPGP). The SPGP is a program with an overarching aim to reduce Veterans Suicide through awards grants to eligible community-based organizations.

Verve provides Training, Technical Assistance (TA) and Outreach to help grantees set up services related to eligibility, intake, networking, suicide prevention services, and connecting Veterans to community resources and the VA. As part of this project, Verve collects data and provides operational analysis, thought leadership by recommending improvements to VA related to participation and improved Training content for grantees.

Client: Department of Health and Human Services, the Center for Medicare and Medicaid Services (CMS)

Project: Verve supports the CMS to provide electronic document review, Quality Assurance, technical writing, and WCAG 508 compliance check and remediation on electronic documents to conduct assessments of existing Program Integrity statistical extrapolation and estimation of overpayments.

Project: On the IT Modernization services side. Verve provides DevOps support from business requirements capturing, full-stack development and testing services for the development of Healthcare Plan Management System.

Project: Verve provides Cyber Security Specialist support to the CMS Software as a Service (SaaS) Governance to speed the secure use of SaaS through assessing the risk posture of SaaS in use, streamlining the process to authorize new SaaS deployments, and monitoring the security of SaaS solutions. Verve uses its knowledge of the NIST 800-53 control standard and Risk Management Framework (RMF) to enhance a risk-based model for evaluating the security posture of SaaS applications for approved business use. This includes evaluating associated tools and technologies, developing processes, assessing SaaS provider security capabilities, and creating a standardized approach for visualizing cyber risks to help business owners understand the level of risk associated with SaaS, and any options to lower that risk level. Verve also maintains and enhances a governance framework to manage the overall pipeline of SaaS requests from business owners by analyzing systems, software, and implementations from cybersecurity perspective.
