

WR CABINTRY

Price Catalogue

Todd Gladfelter, owner of WR Cabinetry, has been crafting quality furniture for more than 17 years. Todd began his career in woodworking in 2001 in Vermont, where he was refinishing and building cottage style furniture. He found his passion in building furniture from start to finish and being able to see what he created from scratch. In 2006, Todd moved back to Hagerstown, MD where he started building furniture in his two-car garage. As the company grew, he hired a longtime friend to help him expand the business. From there the company has continued to grow with a dedicated team, whose passion and attention to detail are paramount in creating quality cabinets that are built to last.

We use quality lumber and reclaimed materials sourced from local family-owned mills and suppliers. Our cabinets are always handcrafted with care and with attention to detail.

WR Cabinetry uses Sherwin Williams cabinet grade paint. Known for their quality and durability, you can choose from a variety of colors to add the finishing touch.

With our semi-custom catalog, you can be rest assured that your wants and needs will be met. W

We at WR Cabinetry take great pride in every project; customer delight is the foundation of our business. Beautiful quality cabinets, enjoyed for generations to come.

WR CABINETRY

The beautiful thing about cabinets is that they aren't just for your kitchen. Whether its an entry built-in, a wet bar that caters to your entertainment needs or hutch that perfectly displays all of your keepsakes. WR Cabinetry has what you need to create a space where form meets function.

Effects of Moisture In Wood

- Any solid wood product will expand or contract over time as moisture and climate conditions change. Wood products need stable moisture conditions in order for the joints to remain tight. Refer to the "Expansion Due to Moisture" chart.
- Effects of moisture (addition to/loss of) may include panel expansion, panel contraction, joint expansion or opening (especially on miter doors), stile bowing, stile/rail expansion and stave to stave lines becoming visible in panels. Contraction of finished panels may also produce an effect called "white line", in which a narrow strip of unfinished wood becomes visible at the point where the panel inserts into the framing.
- Wood products located in humid climates are especially susceptible to expansion due to moisture. WR Cabinetry will not warrant product failure caused by excessively humid conditions, including waterfront properties and coastal regions
- Indoor pools or marine applications such as nautical vessels are considered to be in high humidity conditions regardless of any residential climate control system.
- Wood products located in dry climates are especially susceptible to contraction due to lack of moisture in the air. WR Cabinetry will not warrant product failure caused by excessively dry conditions, such as desert and mountain locations.
- Cabinetry installed in new construction prior to climate control being activated will result in absorption of moisture from other building materials. These materials can include paints, drywall compound, concrete, stucco and wood framing material with high moisture content. Each of these construction materials releases high amounts of moisture into the home during the drying/curing process.
- Wood products installed in non-air conditioned homes, regardless of location, are very susceptible to expansion due to moisture and will not be warranted. All wood products, especially miter doors, need stable moisture conditions in order for the joints to remain tight. Refer to the Expansion Due to Moisture Chart.
- To minimize moisture expansion of wood products, secondary and vacation homes should maintain some form of climate control, even in off season. WR Cabinetry will not warranty products installed in uncontrolled environments.

Bow, Warp and Twist Tolerances

Allowable tolerances of bow, warp or twist for single panel, multi-panel, frame only and mullion doors are as follows:

- Single panel up to 26" wide and 48" high = 1/8".
- Multi-panel up to 26" wide and 48-1/16" to 64-15/16" high = 1/4".
- Multi-panel up to 26" wide and 65" to 83-15/16" high = 5/16".
- Single panel, single opening frame only and mullion doors over 26" wide and 48" high will not be warranted (mullion lites not to be included in opening count).
- Any door exceeding 26" wide or 83-15/16" high will not be warranted.

Allowable tolerances for contraction, expansion, bowing, warping and twisting for 1-piece products are as follows:

- Up to 12" wide and 21-15/16" high = 1/8".
- 12-1/16" to 22" wide or 22" to 43-15/16" high = 1/4".
- Any one-piece product exceeding 22" wide or 43-15/16" high will not be warranted.

Allowable tolerances for contraction, expansion, bowing, warping and twisting for 3-piece products are as follows:

- Up to 44" wide and 14" high = 1/4"
- Any 3-piece solid product exceeding 44" wide or 14" high will not be warranted.

Expansion Due to Moisture

How moisture levels effect movement in wood
Wood is a hygroscopic material, meaning that it will absorb and release moisture until it is in equilibrium with the moisture in the air. This is true of all wood, whether it is raw or finished. Finishing will tend to slow down this process, but will not eliminate it. When wood is exposed to a constant humidity, It will achieve a constant moisture content (MC). Wood will increase in width and thickness as it increases in MC, and will decrease in width and thickness as it decreases in MC. WR Cabinetry manufactures its products to an MC of approximately 7%, a level typical in climate-controlled homes. The graph below indicates how much a 10" wide panel of various species can expand as a result of an increase in moisture control at 10% and 3%, For instance, the chart reveals that a Red Oak panel 10" wide could expand by more than 7/32".

Wood expansion caused by an increase in moisture content			
10" wide sample of wood	7%	10%	13%
Bamboo	10.00"	10.06"	10.11"
White Pine	10.00"	10.06"	10.13"
Mahogany	10.00"	10.07"	10.14"
Alder/Cherry/Soft Maple	10.00"	10.08"	10.15"
Walnut	10.00"	10.08"	10.16"
White Birch/Red Birch	10.00"	10.09"	10.18"
Hard Maple	10.00"	10.11"	10.21"
White Oak	10.00"	10.11"	10.22"
Red Oak	10.00"	10.11"	10.22"
Hickory	10.00"	10.12"	10.25"

The chart below shows how the moisture content of wood increases with an increase in relative humidity. Example: At 70°F, relative humidity in the room is 23% This means the wood will stabilize at 5% moisture content.

Moisture Content/Relative Humidity in Wood	
Moisture Content	Relative Humidity at 70°
5%	23%
6%	30%
7%	36%
8%	43%
9%	50%
10%	55%
12%	66%
14%	75%
16%	80%
28%	99.9%

Damaged and Defective Product Policies

- Notify Customer Service in writing, within 12 business days after receipt of shipment, if you receive products that are damaged, defective, or in error. Submitted claims must include the following information:
- Original order and line numbers.
- A list of the defects or errors in the product(s).
- Returns of non-defective merchandise will not be accepted.
- WR Cabinetry will ship replacements or missing items as soon as possible after a claim is reported. Replacement product(s) will be invoiced at the original product cost. A credit will be issued against the original purchase order once the claim has been investigated and the product has been deemed defective. In some instances WR Cabinetry may require that the defective product be returned for inspection prior to a credit being issued, but this return will not impact the lead-time of the replacement item.
- A copy of our Return Merchandise Authorization Form, supplied by Customer Service, must accompany all returned merchandise.

Replacement Order Process

- Replacement orders will be processed as quickly as possible.
- All replacement orders will be processed according to the customer's normal payment terms. A credit will be issued against the replacement order for all replacement items.

Return Merchandise Authorization (RMA)

- Because our products are custom manufactured from natural materials, we will occasionally ask to have incorrect products returned for quality inspection. This inspection process is necessary to identify how the issue occurred and to improve our overall quality and delivery performance.
- Customer Service will issue a Return Merchandise Authorization (AMA) form to you via e-mail, automated fax acknowledgment or mail. This AMA form will list the products that you have identified as defective. Please mark your return cartons and boxes with the AMA number listed on this form.
- All returned merchandise must be shipped with secure, protective packaging materials.

Freight Damage Claims

- If a Common Carrier or freight shipment contains a damaged package or skid, the freight bill must be marked "DAMAGED". Both the receiving customer and delivery person must sign the freight document. If the freight bill contains no notation of damage, or is lacking the appropriate signatures, the freight carrier will deny the claim. Pictures of both the damaged box or pallet and the damaged product inside are necessary to file a claim with a carrier.
- WR Cabinetry will process all claims for damaged products shipped on WR Cabinetry's trucks and our preferred common carriers.
- Common carrier claims must be filled out by WR Cabinetry with the appropriate freight carrier. WR Cabinetry will replace damaged Items with no expedite up charges.
- FedEx and UPS Ground damage claims must be filed by WR Cabinetry and will be paid to WR Cabinetry. Valid claims will be credited to the customer. All packaging materials and damaged product must be retained by the customer for inspection or collection by the carrier.
- Damaged product must be reported within 12 business days after receipt of product. Claims for damaged product after 12 business days may be denied.

Missing Product Claims

- For missing product claims, WR Cabinetry will initiate an investigation of the original shipment. The research will include our picking documents, skid listing, and Bill of Lading. These documents will verify if the proper number of products were loaded on the delivery truck. The Bill of Lading will show proof of delivery or notations of any delivery or receipt issues.
- Based on the results of the investigation, WR Cabinetry will either issue a credit to your account or notify you that your claim has been denied.
- WR Cabinetry requests that customers verify the package count within 5 business days, and the total number of items and product sizes within 12 business days. Claims filed for missing products after 12 business days may be denied.
- If any portion of a shipment is lost, 3 business days must be given to locate it.

Warranty Information

- WR Cabinetry warrants that, for a period of one year from date of shipment, our products will be reasonably free of defects in materials and workmanship. When properly handled, our products will conform, within acceptable tolerances, to applicable manufacturing specifications. This limited warranty applies only to WR Cabinetry products which are stored, handled and installed properly. WR Cabinetry will not be responsible or liable for any indirect, consequential or incidental damages or costs sustained by the user.
- WR Cabinetry's warranty is limited solely to the value of the original materials purchased from WR Cabinetry and is further limited in amount to the purchase price paid for such materials. WR Cabinetry will not be liable for the cost of extraneous materials, labor, travel costs, installation expenses or other related expenditures.
- WR Cabinetry will not be liable for damages to products caused by improper handling, storage, assembling, finishing or installation by the customer. Our products are not warranted against expansion occurring as a result of high moisture or humidity conditions.
- Natural characteristics in the wood (burls, grain patterns, pin knots, mineral deposits, sapwood, etc.) that fall within WR Cabinetry's specifications will not be considered defects.
- Most wood species, particularly Cherry, will darken naturally with age. WR Cabinetry is not liable for the change in appearance of any product, finished or unfinished, due to this aging process. Results of aging will be more obvious when using light colored or natural finishes.
- Mitered doors allow a .010" joint gap on the interior corners of the door for up to 1/3 of framing to allow for the expansion/contraction due to seasonal changes.
- Mitered doors are not warranted against joint separations that occur as a result of high humidity or moisture conditions.
- Veneered panel doors are not guaranteed to match solid wood framing on the same door in either the raw or finished state.
- Solid wood moulding color may differ from doors of the same species.
- Because the individual staves of the panel continue to contract and expand, lines may appear on solid wood panels and offsets may develop from one stave to another. These stave lines will not be considered defective. To eliminate the chance of stave offsets, WR Cabinetry recommends utilizing an MDF panel option when using painted finishes.

Warranty Information (continued)

Vertical grain panels that exceed 22" wide by 43-15/16" high or horizontal grain panels that exceed 43-15/16" wide by 22" high in either single or multi-panel products are not warranted against expansion, warpage, cracking or open framing joints.

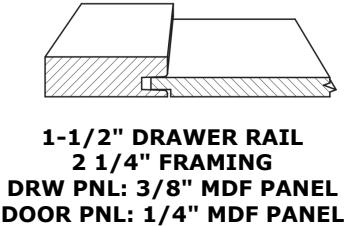

- WR Cabinetry will warrant 1-piece products against expansion, warpage, or cracking if they are within the following parameters:
 - o Product up to 12" wide and 21-15/16" high will be warranted if the expansion or warpage is greater than 1/8".
 - o If the product measures between 12-1/16" to 22" in width, or 22" to 43-15/16" in height, it will be warranted if the expansion or warpage is greater than 1/4"
 - o Any 1-piece product exceeding 22" in width or 43-15/16" in height will not be warranted.
- All solid wood 3-piece drawer fronts over 44" wide or 14" high are not warranted against expansion, warpage, cracking of panels, or cracked joints.
- WR Cabinetry expressly disclaims any and all other warranties, whether expressed or implied, including all warranties of merchantability and warranties of fitness for a particular purpose with respect to its products.
- Allowable tolerances of bow, warp or twist for single panel, multi-panel, frame only, and mullion doors are as follows:
 - o Single panel up to 26" wide and 48" high = 1/8".
 - o Multi-panel up to 26" wide and 48-1/16" to 64-15/16" high = 1/4".
 - o Multi-panel up to 26" wide and 65" to 83-15/16" high = 5/16".
 - o Single panel, single opening frame only and mullion doors over 26" wide and 48" high will not be warranted (mullion lites not to be included in opening count).
 - o Any door exceeding 26" wide or 83-15/16" high will not be warranted

Finishing Warranty Information

- WR Cabinetry's finishes carry a one year limited warranty against peeling, blistering or cracking, but no warranty against discoloration. WR Cabinetry assumes no responsibility for damages or poor color match when finish is applied by the customer.
- Most wood species will naturally darken with age. WR Cabinetry will not be held liable for the change in appearance of any product, finished or unfinished, due to this aging process.
- WR Cabinetry recommends that a finished sample door be ordered prior to ordering any finished job. We do not suggest ordering large or complex finished product based on small sample swatches.
- WR Cabinetry has established an acceptable range of color for finished products. Orders placed over an extended period of time may vary in color due to the natural aging of the finished substrate and slight variations from batch to batch in finish materials. These variations will not be considered defective and will not be warranted by WR Cabinetry.
- WR Cabinetry's finish materials are interior grade only and not intended for exterior use. Exposure to outdoor conditions will cause failure and will not be warranted.
- Due to the many variables involved in any finishing process. WR Cabinetry assumes no responsibility if products stained by tile customer using the DuraGuard system do not produce an exact match to prefinished products purchased from WR Cabinetry.
- Painted or opaque finishes are not recommended on mitered designs. To reduce the chance of joint separation, WR Cabinetry recommends using an MDF panel option.
- Veneers will absorb stain differently than solid wood. The mismatch of solid wood and veneers is not considered defective.

WOOD SPECIES

Maple

Maple is the go to wood species. This is why it is our standard face frame material. Predominantly off-white with light yellow-brown and pink hues, as well as tan or dark mineral streaks.

The prices throughout this catalog reflect this material choice.

Cherry

Brings a rich, elegant feel. Common in fine furniture. Darkens or "mellows" with age. May contain small knots and pinholes for added character.

Price for this material are applicable with a 10% upcharge per cabinet.

Red Oak

Characterized by a wheat-pink to red color tones. The pattern of the grain tends to vary with limited amounts of mineral streaking.

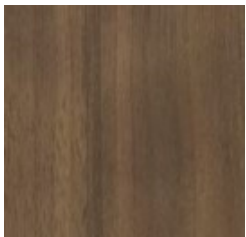

Price for this material are applicable with a 15% upcharge per cabinet.

White Oak

A versatile wood with rich textures and grain patterns that lends itself to practically any application. Some selections have naturally occurring green, yellow and black mineral deposits and may contain wide grain.

**Price for this material are applicable with a 20% upcharge per cabinet.
Rift Sawn are 25% upcharge**

Walnut

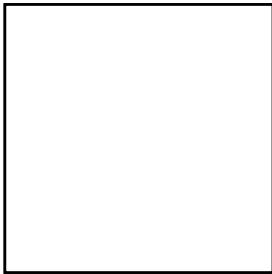

Walnut is prized for its luxurious chocolate-brown tone. Selection of this dense, strong premium wood species will elevate the appearance and feel of any space.

Price for this material are applicable with a 20% upcharge per cabinet.

The stain color samples provided in this Catalog serve as a general representation of the color tone. However, it's essential to recognize that wood is a natural material, and each piece possesses unique grain patterns, colors, and textures. Consequently, when your order is stained, there might be slight variations compared to the samples displayed here. Unfortunately, we cannot guarantee an exact match.

If precision is crucial to you, we recommend requesting more accurate wood and fabric samples before finalizing your order.

Cabinets can be modified in 1/8" increments; specify overall finished dimensions to the nearest 1/8".
Doors/Drawer fronts and cabinet openings will be modified to coordinate with the new dimensions
Height modifications will occur in the door portion of the cabinet
Shelf quantities will remain consistent with original cabinet when cabinet dimensions are increased or decreased.

CABINET DIMENSION MODIFICATIONS		
Choose from the following and apply to cabinet code:		
ONE DIMENSION	TWO DIMENSIONS	THREE DIMENSIONS

42"

-Available with a 15% upcharge

-Many cabinets can be modified to your desired height in 1/8" increments

-When selecting a cabinet that needs a height change to fit your needs; choose the next height size up from the overall height that is desired, then add the change height nomenclature to the end of that cabinet listing.

-Specify overall finished height.

Example: W3030-CH 29 1/2"

This will change the standard 30"W x 30"H to 30"W x 29 1/2"H

TALL CABINETS

U	18	84	42
CODE	WIDTH	HEIGHT	DEPTH

Construction Options and Modifications:

All modifications available within the limitations written in the construction option section

NOTE: Standard tall cabinet box depth is 12" or 24" unless stated otherwise. Add door thickness with bumpers for total depth.

Tall cabinets over 93" tall will automatically be built with a separate toe kick box to ensure clearance during installation.

REMEMBER: A cabinet designated as BD has no center stile and indicates a double door cabinet face layout

Construction Modification Options:
Notate modification in notes section on the order page

- (CH) Change Height
- (CW) Change Width
- (ID) Increased Depth
- (RD) Reduced Depth
- (XS) Extended Stile
 - *Indicate overall width in note
 - *Standard 1-1/2" wide
- (TWR) Top Wide Rail
 - 3" Top Rail
 - *Standard 1-1/2" wide
- (GD) Glass Doors
- (MI) Matching Interior
 - *Standard UV coated finish

Matching Side

- (MS-R) Right Matching Side
- (MS-L) Left Matching Side
- (MS-B) Both Matching Sides

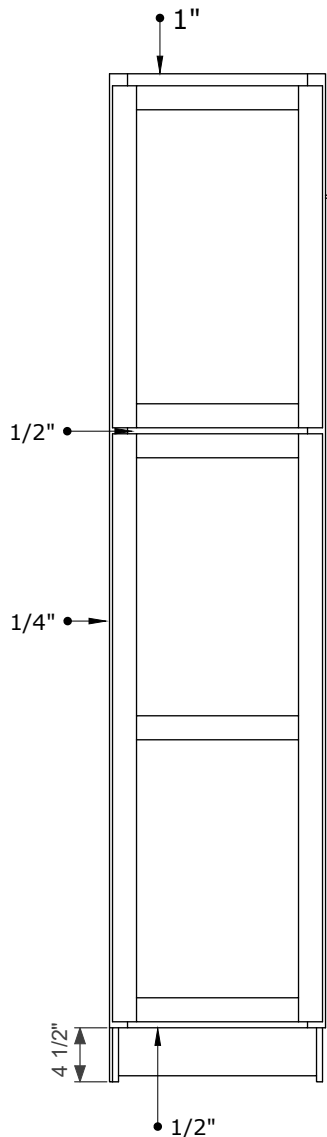

Decorative End

- (DE-L) Left Decorative End
- (DE-R) Right Decorative End
- (DE-B) Both Decorative End

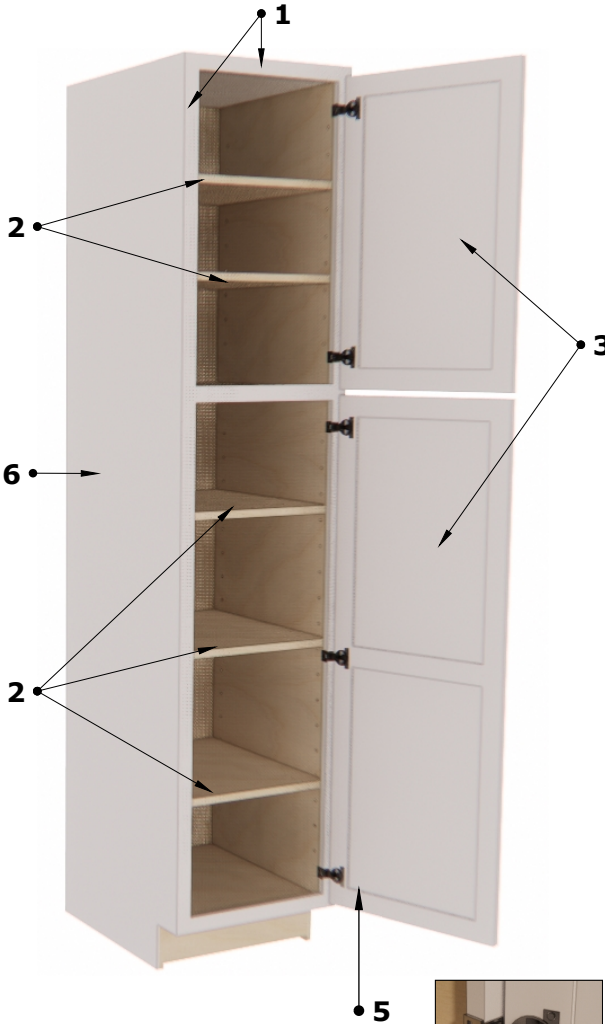

TALL CABINET SPECIFICATIONS

WR Standard Frame Reveal Construction
