

THE PRELUDE
TO A NEW STORY

ABOUT US

It all began in 1996 when a brilliant scientist from Berkeley, California invented a brand new product. He was fascinated by the properties of glass and developed an innovative mix of recycled glass that could be used to create highly durable, beautifully colored slabs.

Since then, we have introduced new colors and thousands of residential and commercial projects have been installed both in North America and overseas! Vetrazzo is now handcrafted in Tate, GA.

EACH VETRAZZO SLAB IS

HANDCRAFTED
by 8 artisans

**MADE FROM 100%
RECYCLED GLASS**

MADE IN THE USA
The glass and shells
found in each slab are
locally sourced.

VETRAZZO HAS ALWAYS BEEN AN ECO-FRIENDLY AND LOCALLY SOURCED PRODUCT.

Back when "green" was still just a color and did not imply that a product was sustainable, Vetrazzo was already using glass waste to create stunning surfaces.

Glass for Vetrazzo mixes is sourced from all types of surprising materials such as :

- Old traffic lights
- Jars
- Windshields
- Skyscrapers
- Beer & wine bottles
- Stained glass

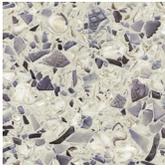

CREATING VETRAZZO SLABS REQUIRES BOTH
ATTENTION TO DETAIL AND PATIENCE, MAKING
EACH ONE A WORK OF ART.

CLASSIC COLLECTION

Our original formula made with cement. Each slab is handcrafted by 8 artisans making them unique masterpieces that will bring you joy every single day! This collection is perfect for indoor and outdoor applications.
