Quality Starts with Fundamentals

Manufacturing Pride

From the top level of Cedarapids management through every department involved in the design, production and service of your Stretch 16 screed, pride in a job well done is our fundamental philosophy. This assures quality. We strive for the same pride you feel in the completion of a top-notch road project. Our personal system of accountability works in your best interest. We stand behind our products.

Large Inventory of Cedarapids Parts

When replacement parts are needed, purchase genuine Cedarapids parts. Cedarapids parts are identical to the originals. Your Cedarapids distributor has them in stock or can get them fast. Factory-trained personnel are as close as your telephone. We have distributor outlets worldwide ready to serve you now.

We're Proud of Our Service

Your local Cedarapids distributor offers service professionals to handle all your paver repair needs. Many of these individuals have attended Cedarapids paver service schools for added in-depth training. If repairs can't be done at the distributor, Cedarapids offers at-factory repair services.

In either case, the scope of necessary repairs are determined and discussed with the customer prior to any work being done. All final repairs are done to customers specifications.

Our Paver Repair Specialists make all the difference in your post-purchase satisfaction. So look to your local Cedarapids distributor for service you can trust.
