

# Custom Teardrop Trailer Build Options

[www.baddogindustries.ca](http://www.baddogindustries.ca)

Our standard steel frame is built using 2x3 inch HSS (Hollow Structural Steel) for the A-frame style hitch assembly and 2x2 inch HSS for the main trailer/cabin frame. Sporting Independent torsion axels, L.E.D clearance/tail lights these trailers are built rugged.

Construction for the sleeper and galley we use 3/4" cabinet grade plywood and industrial grade Aluminum. Also included In both the sleeper and galley are 110 Volt outlets (Shore Power) USB ports and a 12V auxiliary power outlets. L.E.D camper lighting as follows: Four swivel lights inside the sleeper and two stationary lights inside rear hatch. Outside L.E.D area lights are on both driver and passenger side and are functioned from inside the cabin. Solar panel wiring is "Roughed in" for easy installation at a later time. Below you will find a curated list of options we offer. All Baddog trailers are assigned with a Vehicle Identification Number (V.I.N). To receive a custom quote just complete this PDF form and e-mail to [baddogin@live.ca](mailto:baddogin@live.ca)
