

About Us

STEM Detroit is digital platform showcasing advancements in STEM with a focus on Detroit, Michigan and beyond. Founder and CEO; Michael J. Robinson has an extensive background in computer science, engineering and executive management spanning over 30 years and working at the highest levels of some of Michigan's largest corporations. His technical understanding and experience bring abroad perspective to this knowledge base.

Our Mission is to inform educate and demonstrate the most amazing discoveries and breakthroughs in the fields of science, advancements in technology, inventions in engineering, the application of mathematics and to inspire the genius in everyone.

Detroit is at the forefront of industry, innovation, transportation, science, arts and architecture. This city has been a vital part of the great American story and continues building on that foundation.

A Legacy is the inspiration of STEM Detroit. Michael's mother and father dedicate their lives to science, education, social equity and human rights. Their example inspired his life and career. Amazing parents and leaders in the community, their profound love for Detroit was demonstrated consistently by their dedication and commitment to service.

(The Legacy of STEM Detroit)
