

Easter Island

Over the last 30 years this crag has probably seen less than a dozen ascents. The mixed gear and bolt routes became unpopular, neglected and overgrown. A significant waste of a resource. With permission from the first ascent climbers the mixed climbs have been refurbished into modern sport climbs. The pure trad lines have been cleaned with new anchors added for the enjoyment of gear and top rope climbing.

Considerable cleaning and loose rock removal may have altered the original lines and grades.

The new Fixe drop in anchors are for **safe** lowering, please use your own draws to top rope.
