# Empowering travel agencies & advisors in an Al World

## Introducing Voyager4D...

- Global-to-local destination discovery using travelers' "themes"
- Pinpoint local **things-to-do** matching client's vibe & style
- Connect with travel bloggers, peers, and locals
- Optimize journey (e.g., budget/timing, security, visualization)

### Currently, B2B prototype focused on Europe

#### **Travel Agency / Advisor Applications**

- One-of-a-kind destination discovery and experience tool
- Stand out by expanding your expertise / geographies (niche up)
- Fun and engaging way to gather client info and work interactively on itinerary building
- Easy to use, structured AI with guardrails, saves a lot of time
- Builds targeted market groups which leads to additional revenue
- Future applications include social and visualization

#### Roundtable & exhibit responses at LVTAF-24 (March 2024):

- "Haven't seen anything like it"
- Strong interest among Travel Advisors. Main values cited:
  - New, alternative or similar destinations
  - Enables engagement and return business
  - Will save time
  - Targeted marketing
- Brainstorming on specific use cases (e.g., cruise, destination twins, tours, others)
- Dozens wish to "see more" and perhaps advise on / test the app
- Strong appetite for powerful AI tech that's simple to use and saves time
- Discussions on advisor subscription vs host agency platform availability

## ...Let the power of AI drive clients to you
