ABOUT US

Who We Are, What We Do, Whom We Serve

Who We Are

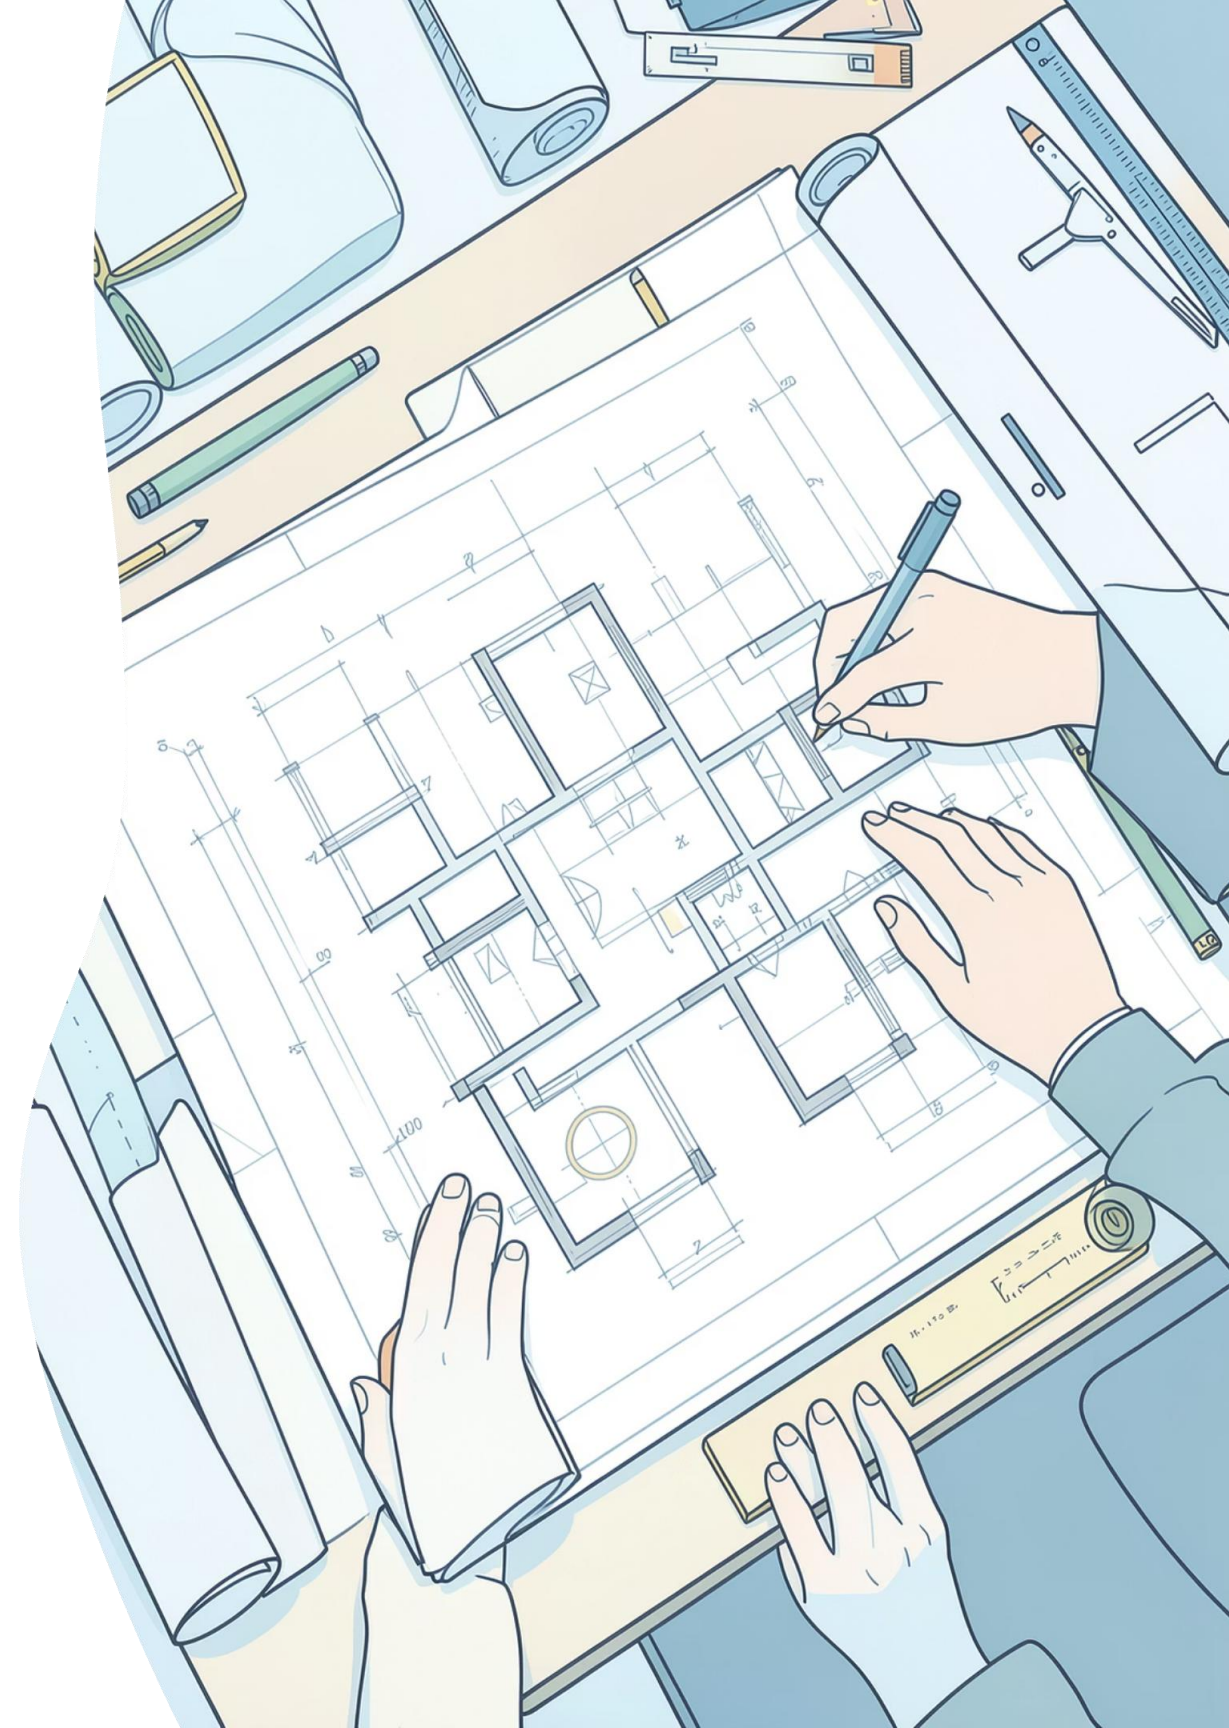

Business architects with deep expertise in business and operating model design and value-chain transformation

What We Do

Align strategy, business model, and operating model into one cohesive architecture, turning fragmented efforts into coordinated, enterprise-wide impact

Whom We Serve

CEOs, COOs, CFOs, CPOs, CIOs, and transformation leaders driving enterprise-wide change

The Transformation Execution Gap

Transformation fails not from a weak strategy or a lack of ambition, but because organisations struggle to execute in a **coordinated way**.

Fragmented Structures

As organisations mature, complexity grows and teams become disconnected, competing for resources and priorities

Limited Visibility

Leaders lack enterprise-wide clarity — slowing decisions, diluting accountability, and obscuring risks

Unrealised Benefits

Without coordinated execution, transformation consistently falls short of expected outcomes

The C³ Framework™: Collect. Connect. Correct.

Collect

Gather the individual data points and critical insights that define how the business operates today

Connect

Unify data points and insights into a coherent, enterprise-wide operating model

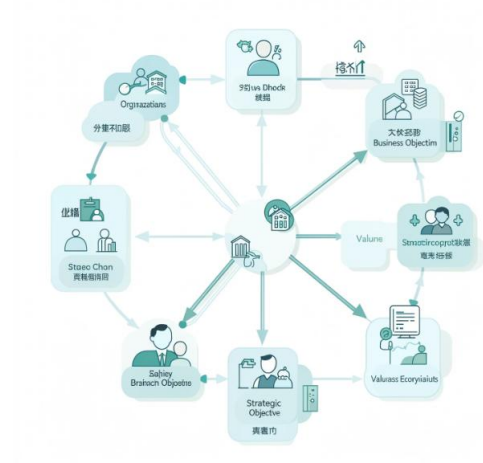

Correct

Eliminate misalignment, inefficiencies, and structural and competency gaps that limit performance

The C³ Framework helps enterprises achieve coherence, cogency and competitiveness at scale.

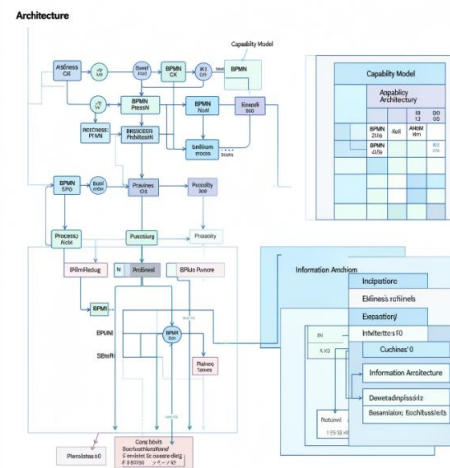

Phases

An amalgamation of the best elements from The Open Group Architecture Framework (TOGAF) and Business Architecture Body of Knowledge (BIZBOK)

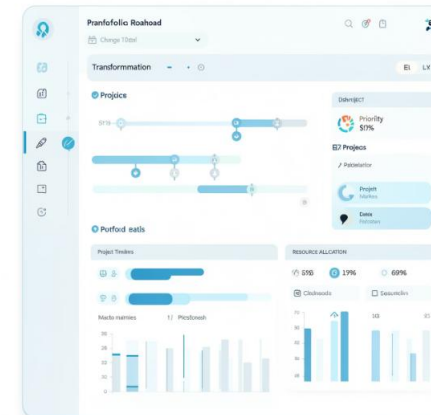

Define the Business

- Business and operating models
- Business ecosystem analysis
- Strategic objectives assessment
- Strategic requirements framework

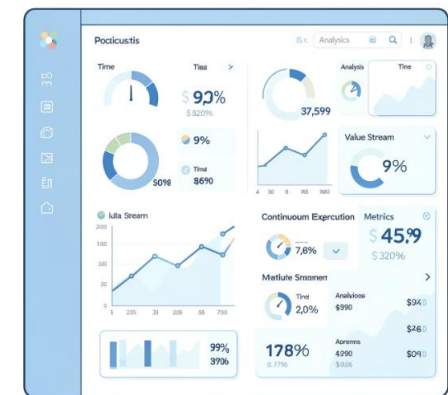

Design the Business

- Business processes
- Business capabilities
- Business information and KPIs
- Business organisation structure

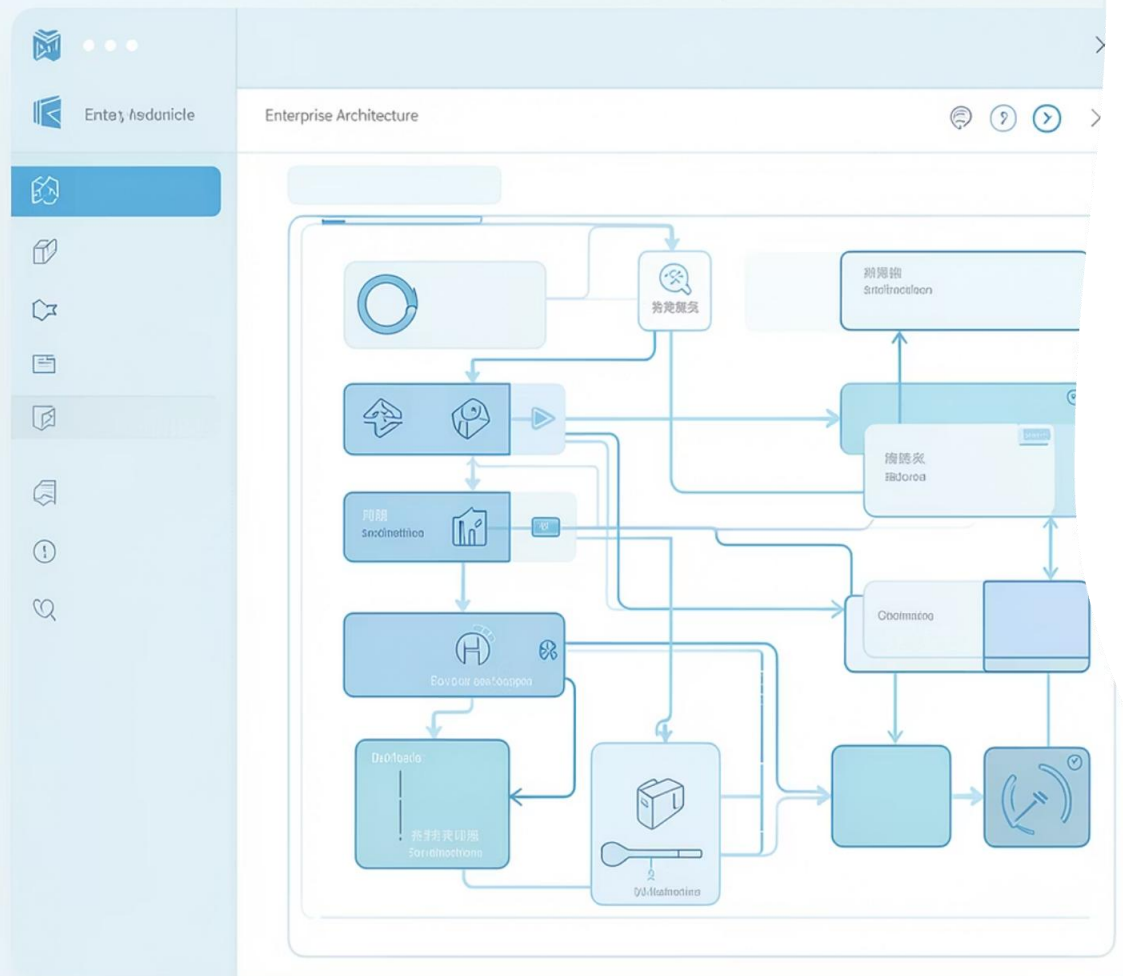

Build the Business

- Change priorities analysis
- Transformation portfolio
- Change roadmap
- Resource transformation plan

Operate the Business

- Business execution
- Performance assessment
- End-to-end process management
- Continuous improvement system
- Business management system

TECHNOLOGY

Horizon Software

Horizon is the specialist enterprise architecture software platform used by Value Chain 365 to deliver targeted insights for every stakeholder.

Strategy & Business Alignment

Identify capabilities to achieve strategic goals; align investments with capability gaps and priorities

Business Process Management

Accelerate and improve process design; boost value, quality, and speed of processes

Solution Architecture Management

Accelerate solution design; improve quality and consistency; align architecture to business goals

Business Architecture Management

Align organisational units and roles with business capabilities; align value streams with dependencies

Enterprise Architecture Management

Align IT assets with business capabilities; improve collaborative design and roadmapping

Application Portfolio Management

Accelerate cloud migration; reduce IT costs while improving value

Technology Portfolio Management

Mitigate risks from end-of-life technology; minimise technology vendors and associated costs

Governance, Risk & Compliance

Improve and accelerate alignment of architecture; reduce compliance risk and minimise compliance efforts

Information Architecture Management

Identify all data sources and use cases; reduce integration duplication and complexity

Use Cases

Operating Model Design or Redesign

Structuring a new enterprise or improving an existing enterprise.

Strategic Alignment

Connecting strategy to execution across all units.

Post-Merger Integration

Unifying processes, systems, and culture after M&A.

Capability Uplift

Building organisational competencies to close performance gaps.

Process Optimisation

Streamlining end-to-end value chains - control, coordination, and cooperation.

Cost Reduction

Identifying and eliminating waste to reduce operating costs and improve margins.

25 Years of Organisational Performance Transformation

Our team brings deep, certified expertise across the disciplines that matter most in enterprise architecture and transformation.

Business Architecture

Certified Business Architectures

Modeling Standards

Certified in ArchiMate, BPMN, BMM, and BPM

Technology Platforms

Certified Bizdesign Horizon, and Microsoft Dynamics 365

Academic Credentials

Certified Organisational Analysis and MBA

Levels of Support

Tailored engagement model to suit your business needs and your team's capacity and capability.

Do It For You

A full VC365 team is deployed and performs most of the work

Do It With You

A smaller VC365 team is deployed and works alongside a dedicated client team, adopting a co-venture working environment

Guide It With You

A few VC365 subject matter experts are deployed and guide a full client team, who do most of the work

Manage It For You

One VC365 subject matter expert deployed on behalf of the client to oversee another consultancy who do most of the work
