

# COVID Vaccines

Cheryl Gilmartin PharmD

- The Hows:
  - mRNA vax differ from vaccines before COVID
  - CDC has been changing vaccine definitions since 2015 In order to accommodate mRNA vaccines
  - COVID VAX work & reduce immunity in vaccinated
- Vaccines
  - FDA approval - Bait & Switch
  - Vax Ingredients listed & unlisted
  - Adverse events & deaths
  - Problems with **Vaccine Adverse Event Reporting System (VAERS)**

# *How mRNA Vaccines Differ From Pre-COVID Vaccines*

- **Not a vaccine – gene therapy**
  - Claims that mRNA does not enter the cell's nucleus & does not alter DNA
  - mRNA → tRNA → DNA → spike protein → antibody to spike
- **Package insert (PI)** on all the vaccines are **blank**
  - Fact sheets substituted – limited ingredients, no vaccine mechanisms, limited adverse events, no clinical studies
  - **No proper informed consent**
- Public Readiness and Emergency Preparedness Act (**PREP Act**) **removed financial liability** to **vaccine manufacturer** during a public health emergency
  - **Compensation** limited to **2 vaccine injuries**: anaphylaxis & Guillian Barre Syndrome (GBS)
  - **PREP Act** grants IMMUNITY to PHARMA, distributors, health care providers & project planners

**DOES IT  
PROVIDE  
IMMUNITY?**

**ONLY FOR THE  
MANUFACTURER.**

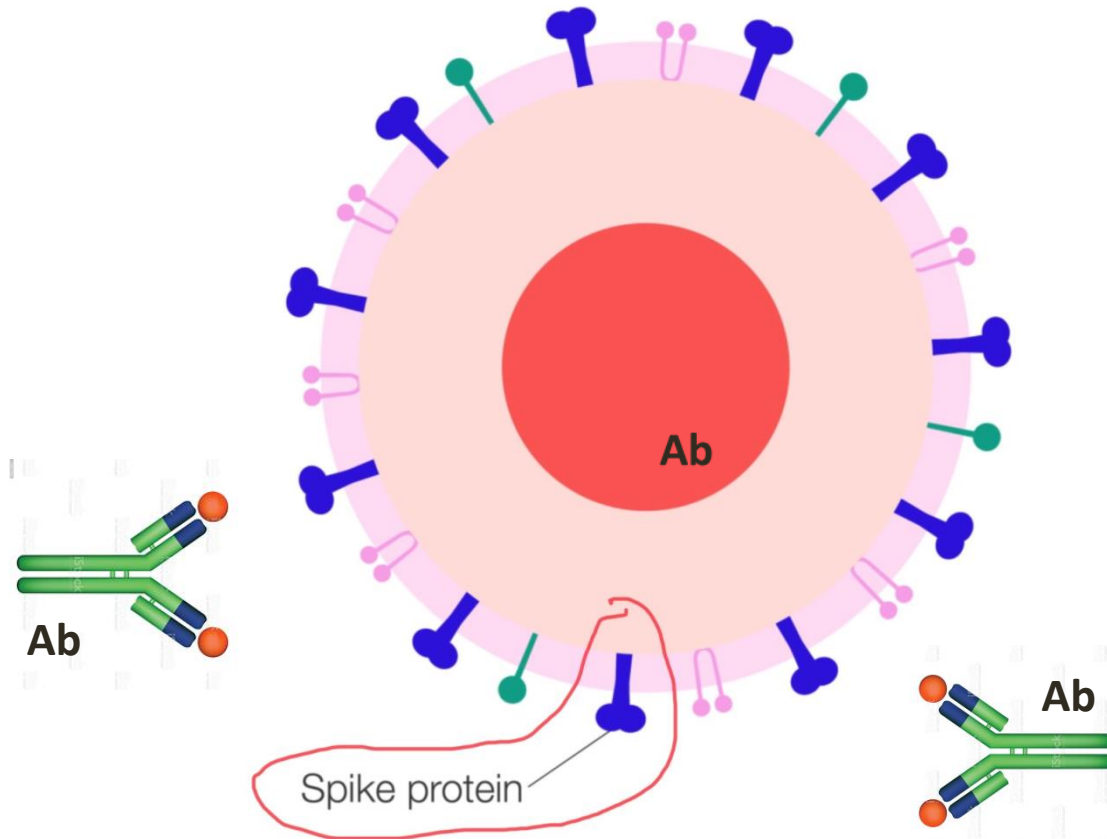

*David  
Schell*

# *CDC Changed VAX Definition- Changed the Vaccine Process*

- CDC prior to 2015 defined vaccine
  - prior to 2015 **injection** of a **killed/weakened infectious organism** to prevent disease
  - 2015-21 **act of introducing a vaccine** into the body to produce immunity (exposed and not get infected) to a specific disease
- the mRNA vaccine process is totally different
  - mRNA developed only **one COVID** protein vs the **whole** virus
  - Vaccine → **1 spike** protein → **1 specific** antibody (Ab)
  - Specific Ab becomes dominate & minimizes nonspecific Ab
- Only achieve protection to the **original** spike protein & not to the **whole** virus

# CORONAVIRUS STRUCTURE

***Specific Ab to specific spike protein*** of the virus causes –  
***NO Ab to whole virus or to variants***

Causes vaccinated to be ***infected***, to ***transmit*** delta &  
to ***create*** other ***variants***

# ***CDC Further Changed Definition: VAX NOT Providing Immunity***

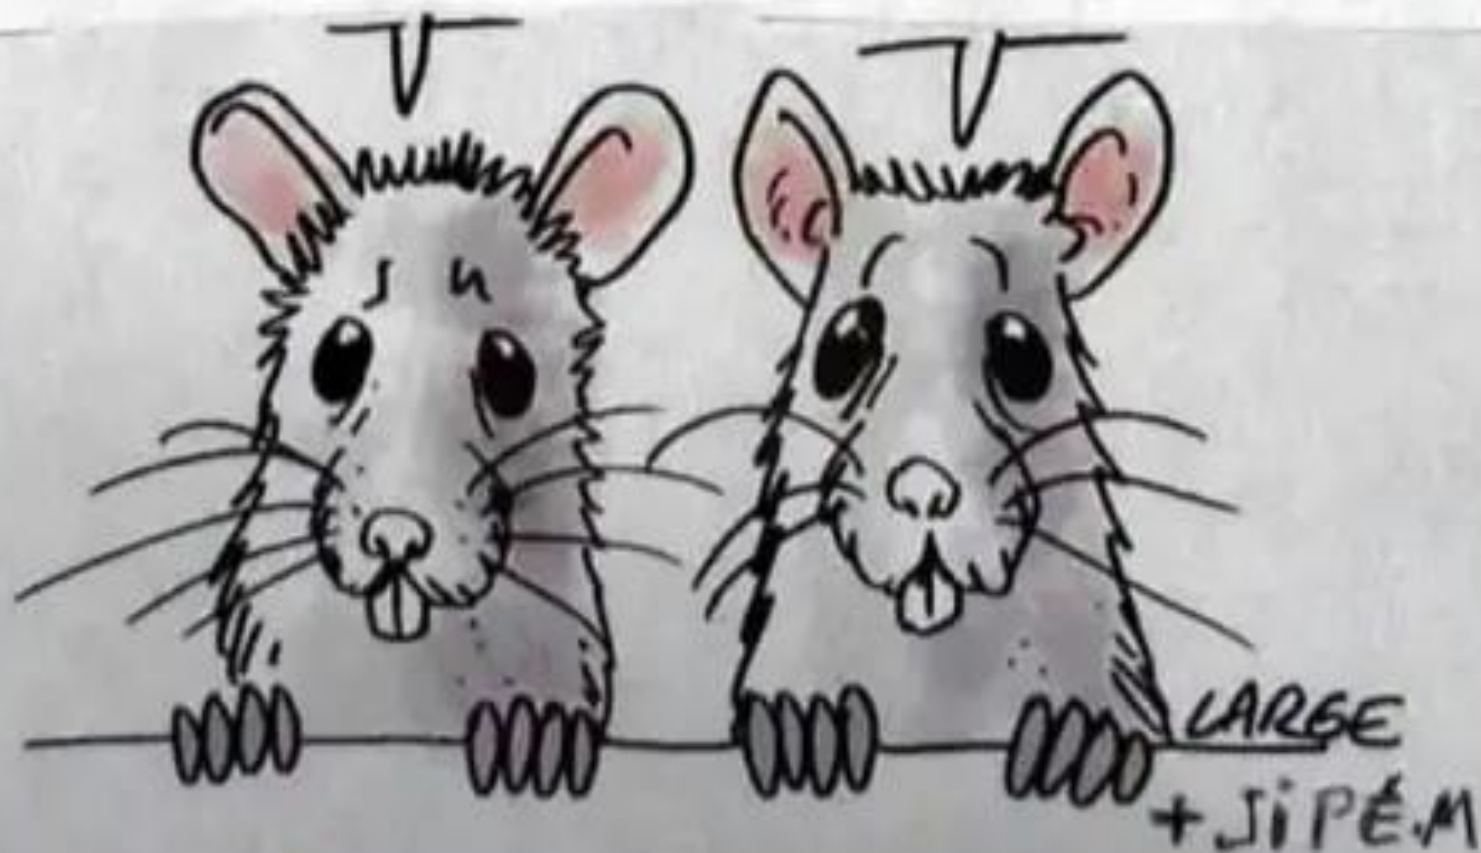

- CDC changed vaccine definition **September 2021** to accommodate lack of immunity from ***immunity to protection***
  - 2015-21 act of introducing a vaccine into the body to produce ***immunity (exposed and not get infected)*** to a specific disease
  - Sept 2021 act of introducing a vaccine into the body to produce ***protection*** from a specific disease
- ***Leaky vaccines*** → don't provide ***immunity*** only ***protection vs specific spike protein*** & don't provide protection vs ***variants***

# *Animal Trials ONLY TRIALS Conducted with mRNA Vaccines Before COVID*

- mRNA vaccines studied since **SARS COV1** in *animals*
- **Never** made it to *human clinical trials* because animals either:
  - *died*
  - developed *severe chronic diseases*
- Animals developed **Antibody Dependent Enhancement** (ADE) in the trials
- Animal studies have always **preceded** human trials to determine **safety & efficacy**
- COVID vaccine a mouse and a human were injected the **same day**

Are you going  
to get vaccinated?

You're crazy!,  
they haven't finished  
human trials!

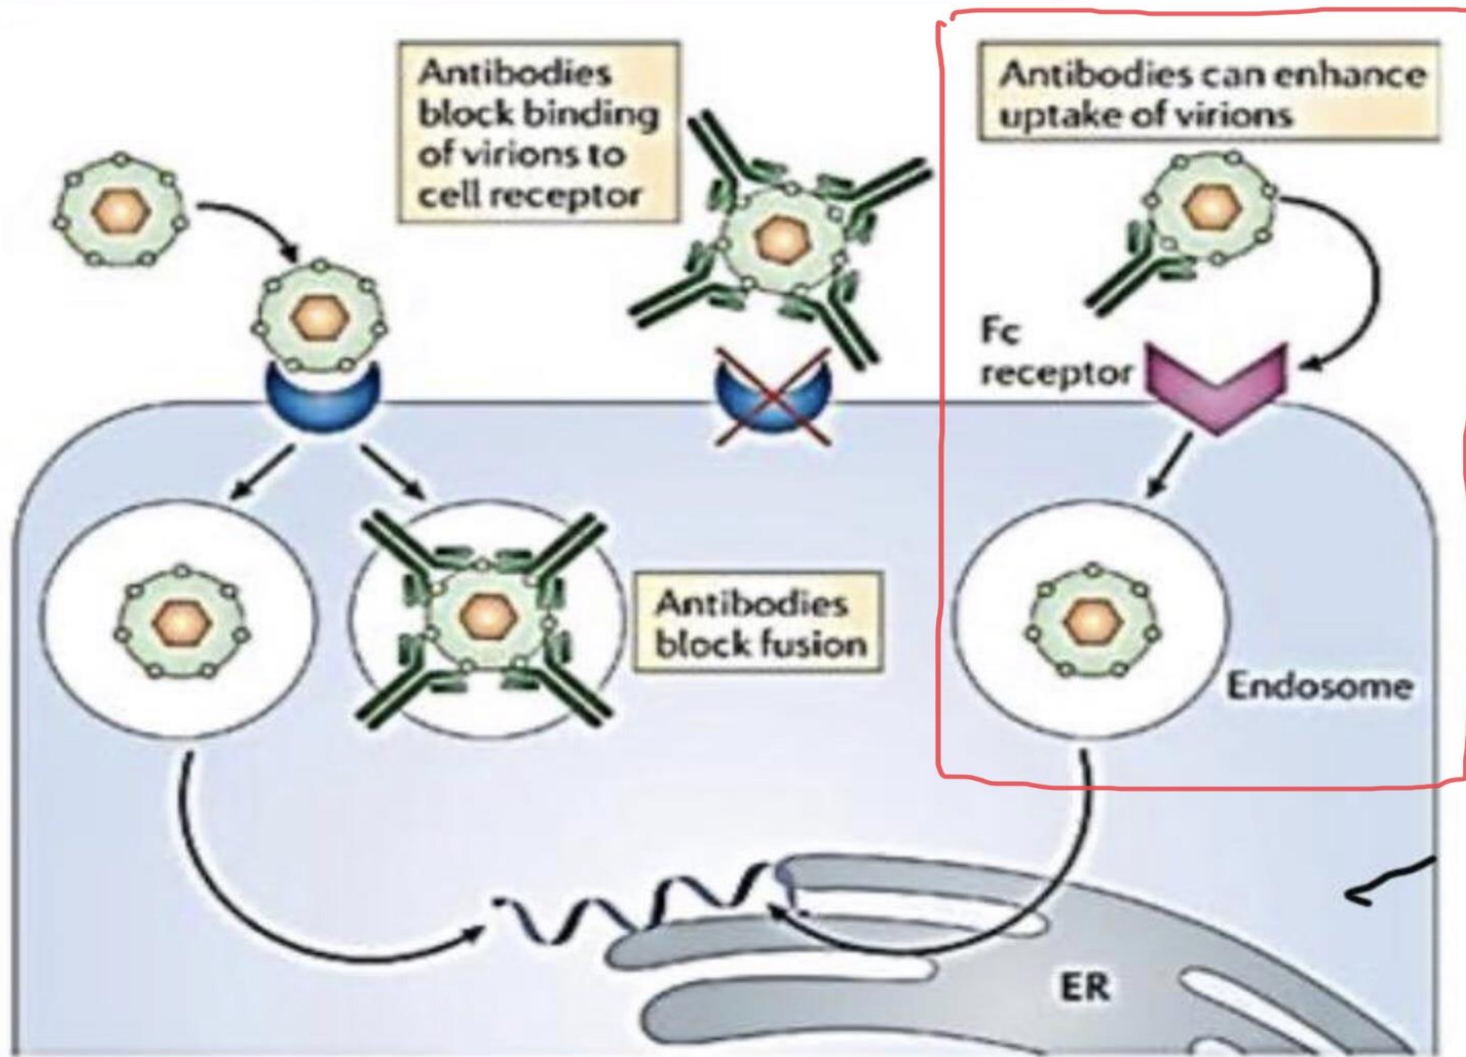

# *Antibody Dependent Enhancement (ADE)*

## *Weakens Immune System*

- Antibody Dependent Enhancement (ADE) aka:
  - *priming*
  - *vaccine-associated enhanced disease (VAED)*
- ADE occurs due to making a ***specific Ab*** from the ***specific protein***
- ***Specific Ab***
  - ↑ ***infectivity*** of the virus
  - Can't kill ***variants*** like delta - nonspecific Ab limited
- Ab acts as a ***TROJAN HORSE***

# ANTIBODY as a Trojan Horse Infecting Cell

**Ab** binds to the **virus** → enabling entrance to **infect cells**

# *Vaccine Induced ADE Causes Severe Illness*

- Ab 'aids & abets' the virus by infecting more cells & causing ***more severe illness*** or ***severe chronic diseases*** than if the person had never been vaccinated.
- ADE can occur:
  - ***right after*** an injection
  - ***reexposure*** to viruses months/years after injection
- ADE has occurred with vaccines that are not mRNA
  - Respiratory syncytial virus(RSV) vaccine trials → stopped children were hospitalized or died after vaccination.

# *IMMUNE SYSTEM Further Weakened by Vax & Boosters*

- Innate system is the first line of defense (comprised of numerous cells focus on ***t-cells & toll receptors***)
  - VAX partially bypasses innate system & ***reduces t-cells***
  - ***Boosters*** reduce even more
  - Suppresses toll receptors → ***fight vs cancer***
  - ***New cancers arising & cancer reoccurrence***
- Selection Pressure similar to antibiotic resistance
  - Goal of a virus: ***survive***
  - Due to ***specific Ab*** the virus ***mutates***
  - ***survive*** → ***under pressure*** → ***mutates*** → ***creates variants*** → can't be killed by ***vax specific Ab***

# ***Pandemic of the VACCINATED NOT*** ***Pandemic of the Unvaccinated!***

- Vaccinated readily transmit, become infected & efficacy wanes
- Immunity is limited & diminished allows for variants that vax can't kill
- Increasing number of COVID deaths seen post vaccination in alarming number of countries  
<https://youtu.be/WR-pqrMWu3E>
- Israel 45% deaths in the vaccinated, UK 63% vaxxed deaths, compared to 28% unvaxxed deaths
- Taiwan deaths (852) from vax exceed COVID (844)
- Singapore 75% cases in vaccinated

# *FDA Approval Bait & Switch*

- ***Pfizer-BioNTech COVID-19 vax NOT FDA APPROVED*** still under ***Emergency Use Authorization (EUA)***
- ***Comirnaty VACCINE (COVID-19 Vaccine, mRNA)*** was ***FDA approved & UNAVAILABLE*** in US
- *The licensed vaccine has the same formulation as the EUA-authorized vaccine and the products can be used interchangeably to provide the vaccination series without presenting any safety or effectiveness concerns. The products are legally distinct with certain differences that do not impact safety or effectiveness.*
- ***Moderna & J&J Fact sheet:***
- Another choice for preventing COVID-19 is ***Comirnaty, an FDA-approved COVID-19 vaccine. Other vaccines*** to prevent COVID-19 may be available under ***Emergency Use Authorization***

# *Vaccine Ingredients on Fact Sheets*

- Lipids (nanoparticles) encase mRNA
  - allergic reactions
  - can easily penetrate cells in all organs including the brain & spinal cord
  - can induce immune response
- Polyethylene glycol [PEG] in antifreeze (Moderna & Pfizer)
- (SM-102 luciferase (Moderna))
  - Cause damage CNS, kidneys, liver& respiratory system
  - ***alters the immune system*** → *increase in shingles, reoccurrence in cancer and cause cancers*
- Polysorbate 80 (J&J) Animal testing found, but ***NO HUMAN TESTING***
  - adverse reproductive effects
  - cancer, affect genetic material (mutagenic)
  - cardiac changes
  - behavioral changes (altered sleep time) & weight loss
  - cause abdominal spasms and diarrhea

## *Ingredients Found NOT listed on FACT Sheets*

- Graphene oxide
- Fetal aborted tissue
- Crystalline structures
- Self assembling, patterned structures
- Various unidentifiable dark blobs
- Parasitical looking organisms
- Metals including steel and magnetic scions

# *Neurological Issues with Ingredients*

- Three ingredients:
  - Graphene Oxide
  - Lipid nanoparticles
  - Polysorbate 80
- Allow the spike protein to get into the brain & form ***prions***
- ***Prions*** make proteins causing neurological issues
  - Alzheimer's
  - Mad cow disease
  - Encephalopathy – brain swelling

# *Curious Info on Fact Sheets for Vax*

- Pfizer & Moderna 2 dose regimen
- Pfizer trials, **≈23,000 individuals** >12 y.o. received at least **1 dose of the vaccine**
- Pfizer 38,955 received two doses of the vaccine
- Moderna trials, **≈15,400 individuals** >18 y.o. **1 vaccine dose**
- Most serious adverse reactions occurred **after the second dose**

# Adverse Reactions: Inadequate Tracking

- International Statistical Classification of Diseases and Related Health Problems (**ICD**), a medical classification list
  - **codes for** diseases, signs and symptoms, abnormal findings, external causes of injury or diseases
- ***NO ICD-10 codes established for COVID Vax injuries***
  - FDA stated they would do this 10.2020
- Deaths from vaccine not counted till 14 days post vaccination
- Autopsies not done on those who die from vaccines
- Vaccine Adverse Events Reporting System (VAERS)
  - most MDs had no awareness it existed prior to COVID even though it's required by law
  - MDs often don't acknowledge vaccine adverse events – *fear* may be responsible, *indoctrinated*, *financial incentives* given to hospitals and against hospital policy conflict between advocating for vaccine & injuries
  - people with underlying conditions/extremely ill may not identify the vaccine as an issue
- Pregnant/breast feeding women not included in clinical trials
  - vaxxed advised not to be around pregnant women post vaccination due to possible shedding

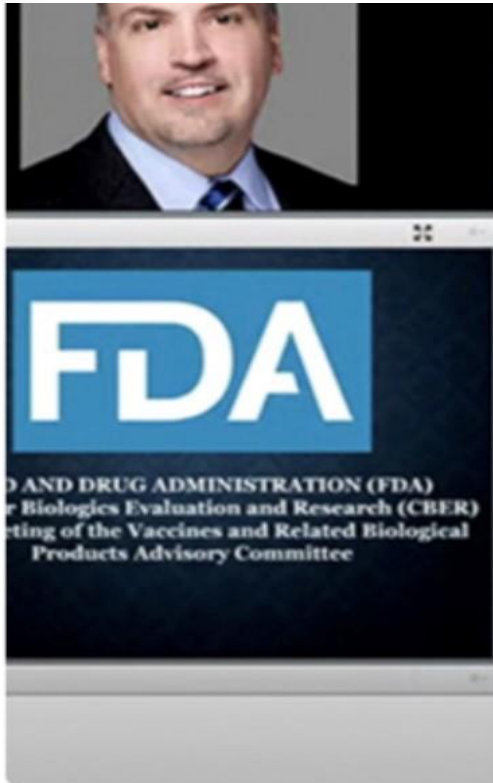

# What's Shedding?

- Shedding the ability of vaccinated individual to transmit disease to an unvaccinated person.
- Shedding occurs ***coughing, sneezing, transfer of bodily fluids, through skin***
- Shedding is ***not new to vaccines*** live viruses are known to be shed by vaccinated: measles, chickenpox & shingles vaccine
- Possible with gene-therapy vaccines?
- Shedding was a reportable safety event in the Pfizer Trial
- Pfizer submitted a document to the FDA “Design and Analysis Of Shedding Studies for Virus and Bacteria-Based Gene Therapy & Oncolytic Products Guidance for Industry <https://www.fda.gov/media/89036/download>

# *Adverse Events: Depends Where You Look*

- **PREP Act** adverse events covered: *anaphylaxis & Guillain-Barre*
- **-Manufacturers' Fact sheet for adverse events:**
  - severe allergic reactions
  - non-severe allergic reactions such as rash, itching, hives, or swelling of the face
  - ***myocarditis*** (inflammation of the heart)/*pericarditis* (inflammation of the lining of the heart)
  - injection site pain
  - tiredness
  - headache, fever, nausea, feeling unwell, ↓appetite, diarrhea
  - muscle pain, chills. joint pain
  - injection site swelling, redness
  - ***swollen lymph nodes (lymphadenopathy)***
  - ***Guillain-Barre***
  - ***Blood Clots with Low Levels of Platelets (only J&J)***

# FDA Advisory Committee 10.22.20

## FDA Safety Surveillance of COVID-19 Vaccines : DRAFT Working list of possible adverse event outcomes \*\*\*Subject to change\*\*\*

- Guillain-Barré syndrome
- Acute disseminated encephalomyelitis
- Transverse myelitis
- Encephalitis/myelitis/encephalomyelitis/meningoencephalitis/meningitis/encephalopathy
- Convulsions/seizures
- Stroke
- Narcolepsy and cataplexy
- Anaphylaxis
- Acute myocardial infarction
- Myocarditis/pericarditis
- Autoimmune disease
- Deaths
- Pregnancy and birth outcomes
- Other acute demyelinating diseases
- Non-anaphylactic allergic reactions
- Thrombocytopenia
- Disseminated intravascular coagulation
- Venous thromboembolism
- Arthritis and arthralgia/joint pain
- Kawasaki disease
- Multisystem Inflammatory Syndrome in Children
- Vaccine enhanced disease

The slide, showing the FDA’s draft list of “possible adverse event outcomes,” [appeared briefly](#) during a public meeting by the US Food and Drug Administration’s Product Advisory Committee on Oct, 22, 2020 reviewing the safety and efficacy of [Covid-19 vaccines](#).

# VAERS COVID-19 VACCINE ADVERSE EVENT DATA

818,042 Reports  
Through October 15, 2021 

17,128

DEATHS

83,412

HOSPITALIZATIONS

92,017

URGENT CARE

127,641

DOCTOR OFFICE  
VISITS

7,532

ANAPHYLAXIS

10,179

BELL'S PALSY

2,631

Miscarriages

8,408

Heart Attacks

10,304

Myocarditis/Pericarditis

26,199

Permanently Disabled

3,875

Thrombocytopenia/  
Low Platelet

18,925

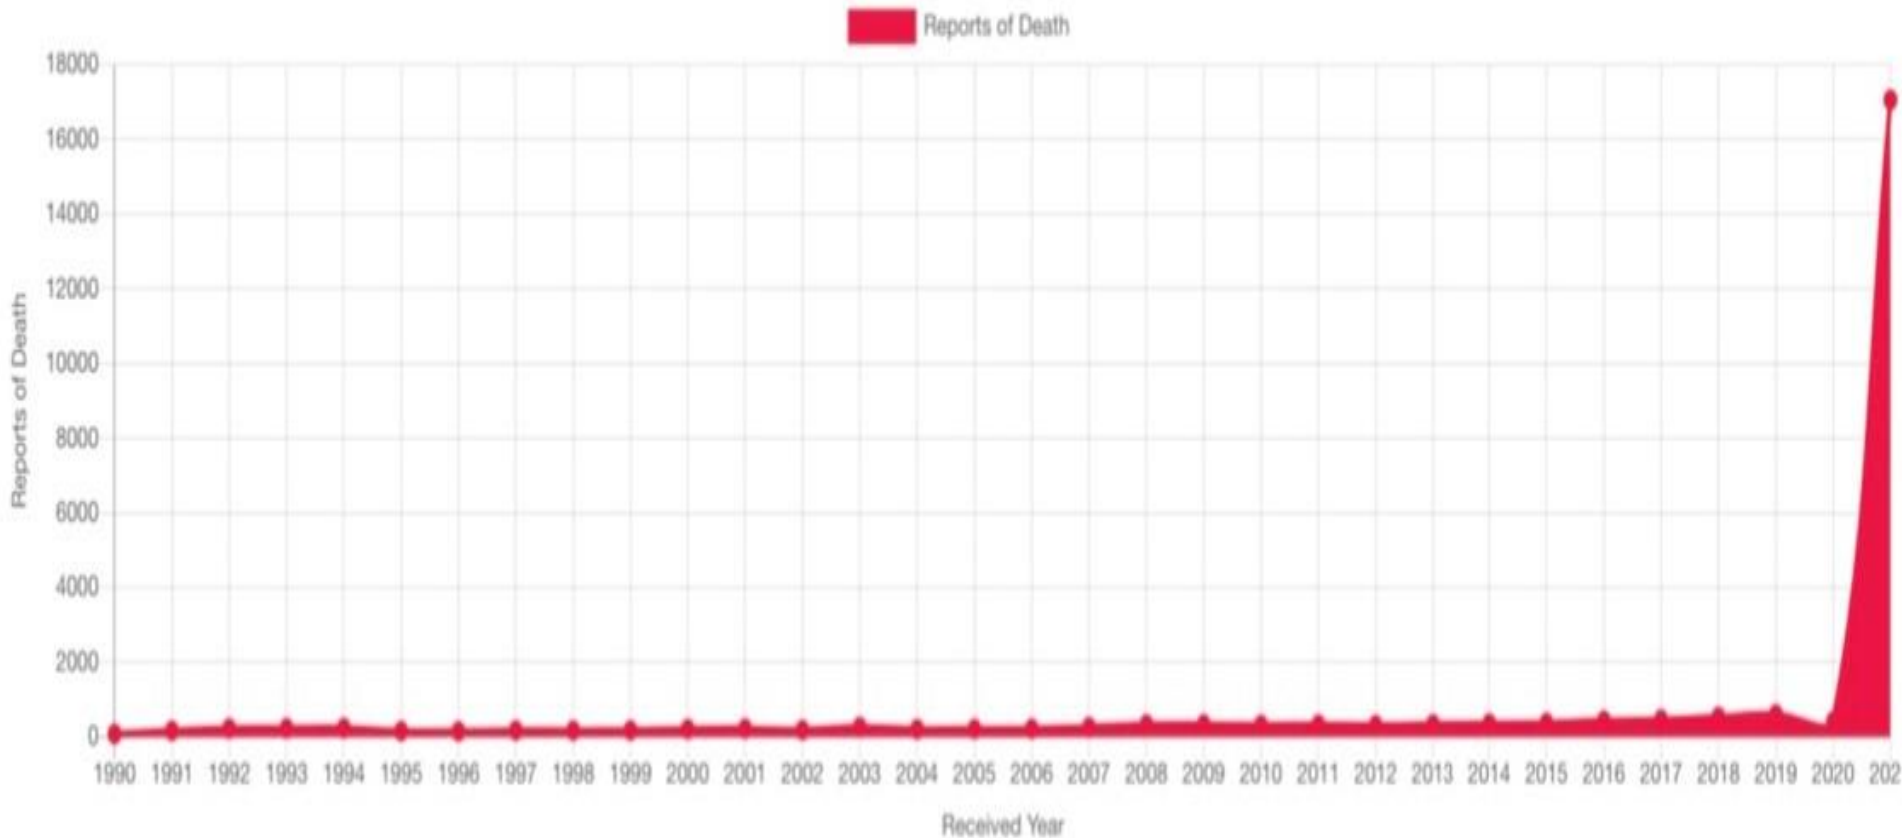

Life Threatening

# VAERS ADVERSE EVENTS

- Incomplete list highlights shown there are over **80 adverse events**.  
Data from 10.8.15
- Life Threatening: **17,618**
- Hospitalizations: 75,605
- Urgent Care: 87,814
- MD visits: 121,305
- Anaphylaxis: **7,141**
- Bell's Palsy: 9,446
- **Miscarriages: 2,415**
- Heart Attacks: 7,868
- Myocarditis/Pericarditis: 6,812
- **Permanently Disabled: 20,789**
- Low Platelets: 3,629
- **Severe Allergic Reaction: 28,168**
- **Shingles: 8,153**

All Deaths Reported to VAERS by Year

***30 years data*** reported to VAERS ***9,151 deaths***;

***2021 - 17,128 deaths***

↑ death ***53%*** ≈ ***11 months***

# VAERS DEATHS

- VAERS deaths: **17,128** vax (10.15.21)
- Atty Tom Renz's received Center for Medicare & Medicaid Services (CMS) data from whistleblower
  - CMS data: **48,465 Vax deaths**
  - <https://renz-law.com/>
- <https://rumble.com/vn12v1-attorney-thomas-renz-we-got-them.-fact-check-this-all-new-whistleblower-inf.html>

Thank YOU for Your Attention!  
Any Questions?

A meme featuring Spider-Man lying in a hospital bed, reading a document. The scene is set in a hospital room with a bedside table holding a glass and a bottle. The text is overlaid in large, bold, white letters with black outlines.

**HOW WILL WE KNOW THE  
VACCINE IS WORKING?**

**WILL THE SURVIVAL RATE  
GO FROM 99.7% TO 99.8%**
