INTRODUCTION

DECLARATION OF POSITION

We do not believe. We know by observing.

We do not inherit systems. We examine them.

We do not seek validation

We are the root of the tree, not the leaf

We align with what is. This work is not written to participate in debate, nor to conform to accepted frameworks, nor to translate itself into systems built on assumption. This work stands alone on observation. There is no verified existence beyond Space, Matter, and Time. There is no authority above the observable order. There is no knowledge without alignment to natural process. What cannot be observed, measured, or aligned holds no position within this framework.

We reject: unverified claims constructed hierarchies abstract authority beyond existence and all systems that place belief above observation

We affirm: continuity cycle

Transformation process and direct alignment with reality

This is not philosophy. This is not religion. This is not theory.

This is first position.

Understand this before proceeding. Or do not proceed at all. Descendants of the first observers (Dof9) is not written from the perspective of mainstream history, mainstream science, or conventional academic authority. It is written from the perspective of Alkebulan Science . Alkebulan Science is the Dof9 method of acquiring knowledge through alignment with Nature, Space, Matter, and Time (SMAT), direct observation, Investigation, reason, continuity, and correct relationship. Within this framework, knowledge is distinguished from interpretation, and observation is distinguished from inference. Because Dof9 begins from a different foundation, readers should not expect its conclusions to mirror those of mainstream historians or scientists. Where the two frameworks disagree, Dof9 does not defer to institutional consensus as the final authority. Instead, it evaluates claims according to its own principles of Sound, Right, and Reason. The purpose of this book is not to seek approval from existing institutions, but to present the Dof9 framework clearly and allow readers to examine it on its own terms.

IF TRUTH MATTERS MORE THAN COMFORT CONTINUE :

First Principles

Truth Precedes Everything

Before there were nations, religions, philosophies, political systems, universities, or scientific institutions, there was Nature. Before there were opinions, there was reality. Before there were interpretations, there was Truth. Dof9 begins from this foundation. It does not begin with inherited beliefs, social consensus, or intellectual traditions. It begins with the recognition that Truth exists independently of the human mind. Humanity did not create Truth, and therefore humanity cannot redefine it. Truth is not a product of

imagination. It is not determined by authority, popularity, tradition, or consensus. It exists whether accepted or rejected. Reality is the state in which Truth exists. The purpose of Dof9 is not to invent Truth but to enter into the state of reality where Truth reigns. This requires alignment with Nature through observation, investigation, sound reason, and right relationship. Opinions may inspire discussion. Interpretations may offer explanations. Inferences may suggest possibilities. Consensus may organize societies. Belief may comfort the mind. None of these establish Truth. Correct information cannot be refuted. If information is truly correct, it remains correct regardless of who accepts it or rejects it. Human agreement does not strengthen Truth, and human disagreement does not weaken it. For this reason, Dof9 distinguishes between social reality and reality itself. Social reality is built from collective acceptance, inherited narratives, customs, institutions, and systems of thought. Reality, however, exists independently of all human agreement. The journey of Dof9 is therefore not the pursuit of new beliefs but the restoration of alignment with what already is. Dof9 is not presented as a new philosophy, a new religion, or a new idea...

The standard of Dof9 is simple: Observation, Investigation, Reason.

Sound. Right. Reason.

Every claim must be measured against reality rather than accepted because of tradition, authority, popularity, or repetition. The principles that follow are the foundation upon which everything else in this book is built.

The First Principles of Dof9

Truth is not invented.

Investigation before acceptance.

Reality is not negotiated.

Nature is not persuaded.

Knowledge is not voted into existence.

Correct information cannot be refuted.

The state of reality, where Truth reigns, has to be entered into.

Observation precedes interpretation.

Sound reason precedes conclusion.

Dof9 is not an invention. It is a continuity.

Mental Death

According to Dof9, mental death is not the death of the body, but the death of identity, memory, and right relationship with one's origin. It is the condition that develops after centuries of disconnection from one's roots, history, language, and natural way of knowing. A person may be physically alive yet mentally dead if they no longer know who they are, where they come from, or the foundation upon which their ancestors understood Nature. In this condition, inherited ideas replace direct observation, and ideology replaces knowledge. Within the Dof9 framework, mental death is the gradual replacement of direct knowledge with inherited ideology. As people become disconnected from their original foundation, they begin to identify

more with external systems than with their own origin. The result is no self identity, dependency on borrowed interpretations, and separation from the natural order. Dofo9 teaches that mental death is not permanent. Restoration begins with De-colonization, orientation the recovery of memory, observation, reason, and knowledge. It is not a call to hate any people or culture, but a call to reconnect with one's original foundation through Sound, Right, and Reason . As knowledge replaces inherited belief, mental life is restored, and the individual returns to right relationship with Nature.

DEFINITIONS & TERMINOLOGY

1. Brain Noots

Definition:

Brain Noots are the primary physical units of organization within Matter and the Prime Movers of creation within living systems. In their original state, Brain Noots exist as physical entities. Through transformation, melt-down, and emanation, Brain Noots convert into Mind Energy and Creative Energy, attracting, organizing, and arranging other Matter. Brain Noots produce the physical brain, which serves as their operational base for consciousness, reason, self-preservation, reproduction, and creative expression. As physical entities, Brain Noots are material. As They transform into Mind Energy and Creative Energy, they become mental, spiritual, and magical in function. Through this process, Brain Noots bridge Matter, Mind, and Spirit, serving as the organizing principle through which consciousness manifests within living forms.

Dofo9 Principle:

Brain Noots are the Prime Movers in Matter. They create the brain, and through the brain They organize the body, consciousness, reason, and the perpetuation of life.

Axiom:

Matter does not create Brain Noots. Brain Noots organize Matter.

2. Nature

Definition: Nature is Space. Matter. and Time. The Primary Reality. The self-existing source of all order, motion, consciousness, matter, and time. Nature is perfection because it operates continuously according to its own laws and principles.

Dofo9 Principle:

Nature is what is.

3. Great Order of Being

Definition: The manifested arrangement and operation of Nature. The Great Order of Being is the continuous movement, relationship, rhythm, and function through which Nature expresses itself.

Dofo9 Principle:

The Great Order of Being is Nature in operation.

4. Original Function

Definition: The first and continuing operation of Nature before distortion, abstraction, or separation. Original Function is the primary process from which all natural order proceeds.

Dofo9 Principle:

What is, has already taken place.

5. Direct Participation

Definition: Conscious engagement with Nature through observation, experience, and alignment. Direct Participation places the observer within the process rather than outside of it.

Dofo9 Principle:

Knowledge begins through participation.

6. Correct Knowledge

Definition: Knowledge that corresponds directly with Nature and remains continuous with the Original Function. Correct Knowledge requires no validation through popularity, authority, or consensus.

Dofo9 Principle:

Correctness is determined by Nature, not acceptance.

7. Ether

Definition: The separation of knowledge from its natural source. The Break in the Chain occurs when constructs, interpretations, and abstractions replace direct continuity with Nature.

Dofo9 Principle:

Error begins with separation.

8. Social Constructs

Definition: Human-created systems used to organize collective experience. Social Constructs may be useful to some, but their usefulness does not establish their correctness.

Examples:

Gregorian Calendar

Governments

Economic systems

Scientific classifications

Dofo9 Principle:

A construct is not the phenomenon. The phenomenon precedes the social construct

9. Collective Acceptance

Definition: The agreement of a mass of people to recognize a construct as valid or real. Acceptance creates social reality but does not establish natural correctness.

Dof9 Principle:

Acceptance is not correctness.

10. Personal Interpretation

Definition: An individual's understanding of reality based upon inherited constructs, experiences, beliefs, and assumptions.

Dof9 Principle:

Interpretation is not the source.

11. Distortion

Definition: A condition produced by separation from the Original Function. Distortion occurs when constructs, opinions, or beliefs replace direct correspondence with Nature.

Dof9 Principle:

Distortion is the consequence of the break.

12. The Master Principle of Dof9

Continuity

Definition: The uninterrupted relationship between Nature, the Great Order of Being, Original Function, and Correct Knowledge. Continuity is the primary test of naturalness.

Dof9 Principle:
